[Sagar,Shah]

Peter Svidler and MVL have a very similar opening repertoire, both of course, being huge opening experts. So when they sat at the board it was realyl a battle of choosing the line in which the opponent would feel the most uncomfortable. **1.c4** 0 **c5** 1:20 **2.Nf3** 2:41 Peter played this move after quite some thought. **2...Nf6** 6 **3.Nc3** 3:14 **d5** 9 **4.cxd5** 17 **Nxd5** 4 **5.e4** 5:18 As Svidler said, White has many options at this point. He went for the one that would be the most uncomfortable for Maxime. **5...Nb4** 6 **6.Bc4** 4 **Nd3+** 6 **7.Ke2** 4 **Nf4+** 6 **8.Kf1** 6 **Ne6** 1:10 This knight diamond movement is quite well known now. Black makes all of these knight moves in the hope that he would be able to capitalise on the weakness of the d4 square. **9.h4!?** 4:41 Why would someone make a move like this? What is the point? The main idea of this move is to stop Black from playing ...g6.

[9.b4 is one of the main moves. cxb4 10.Nd5 g6 11.d4⩲ - 127/22]

[9.d3 can be met with a move like ... ♘c6 followed by ...g6 putting all the resources on the d4-square. g6=]

[14...Bg4 This was Maxime's main idea. So that he can now play ...e6, ... ♗e7, ...0-0 and finish his development. But he had missed something in the line starting with 15.b4! e6 *(15...cxb4 16.Rc1* seems to give White good compensation, but I would say Black's position looks fine.*)* 16.b5! This was the move that MVL had missed. Nd4 17.Bc7!!+- and it's game over.]

At this point I think Svidler had every right to believe that his position was very pleasant. **18...Na5** 3:08 **19.Qc3** 4:12 **b4** 4:05 **20.Qc2** 2:02 **Nb7** 8 **21.Qc4** 9:08 **Qxc4** 3:46 **22.Rxc4** 12 A queen exchange does not ease Black's situation. **22...Be7** 9 **23.Ke2** 1:57 **0-0** 2:30 **24.Nd2!±** 4:54 The knight comes to b3 and the other rook to c1. It looks really bad for MVL. **24...Rfc8** 4:35 **25.Nb3** 3:01 **a5** 17 **26.a4!?** 57

[26.Rhc1 This is a natural move, but now the h4-pawn is hanging. Bxh4 27.Nxc5 Nxc5 28.Bxc5⩲ White is surely better as he has won the c5-pawn for the one on h4. However,

Svidler wanted more. He wanted to keep his h-pawn and then win the c5-pawn as well.]

26...bxa3 19 **27.bxa3** 8 **a4** 28 **28.Nd2** 3:40 **Nd6** 2:21 **29.Rxc5** 3:13 **Rcb8** 3 Maxime is creating some threats of penetrating down the b-file. **30.Rb1!** 26 **Rxb1** 12 **31.Nxb1** 8 **Bxh4** 6 **32.Rc6?!** 57 Peter Svidler did not like this move. He thought that it gave Black good chances to equalise.

[32.Rc7!? Peter thought this was the better move after the game.]

[32.Nc3! is the best. It doesn't create any threats yet, but White is just dominating. Be7 33.Rc7± Bf8 34.Bc5± White has complete control.]

32...Be7 1:00 **33.Bc5** 5:24 **Nb5!** 15 This is the move that Svidler had missed. **34.Ke3** 8 **Kf8** 5:38 **35.Bxe7+** 3:49 **Kxe7** 5 **36.Rb6** 11 **Nd6** 1:55 **37.Nc3?!** 41 This is one of those moves that you make naturally. Your knight is on the first rank and you want to develop it. However, Svidler said after the game that stopping Black's ...h5 was important and he should have gone g4.

[37.g4!±]

37...h5! 4 After this Black has relatively lesser problems. **38.f4** 6:36

[38.Rb4 f6 39.Rxa4 Rxa4 40.Nxa4 Nb5=]

38...f6 2:58 **39.Nb5** 7:46 **Nxb5** 1:24 **40.Rxb5** 0 **h4** 5 **41.Rb7+** 5:50 I have a feeling that White has a small edge here, some slight pressure, but MVL had already passed the worst and the result would most probably have been a draw, so the players saved themselves some energy.

[Tadic,Branko]

Colovic,Aleksandar: 'English Opening The Black defences are very difficult to breach in modern chess, so when playing with White the players always try to find new ways to pose problems. We have already mentioned Svidler's change of repertoire with Black, while with White, instead of his usual 1.e4, he chose the English Opening ("the opening of the future") in all his games (except

the one against Topalov in Round 2, which saw a dull Berlin draw). The English in various versions was very popular in Moscow with 14 games played. The reason is that it is (still) less explored than the other openings after 1. d4 and 1. e4 and it is less forcing in nature, allowing for more creative play.'

[7.Qc2 is far more common. The entire line is not supposed to be terribly dangerous for Black, who will achieve a quick c5 and supposedly equalise. White doesn't score very well after 7.♕c2]
7...Bb7 8.0-0 Ngf6 9.Nc3 Be7 10.d3 0-0 11.a4 b4 12.Nb1 Black can't really complain about the result of the opening. His pieces are active, and although he has a few holes his activity should compensate for it. **12...Nc5 13.Qc2 e5!?** And the tactics begin. It was also possible to simply play 14... ♖b8 and hold the position, but I guess Kramnik felt a certain bloodthirstiness.
[13...Rb8 14.Nbd2 b3= and Black's

position looks good.]

14...e4 Forced, really.

[14...Nfd7 15.Nbd2 would hardly justify so many weaknesses.]

15.Bxc5 Bxc5

[15...exf3 16.Bxe7 Qxe7 17.exf3 Rad8± gives Black some compensation for the pawn but I doubt it's something to be seriously considered.]

16.dxe4 Nxe4 17.Nfd2

[17.Nbd2 probably would've forced Black into transposing into the note below.]

17...Bxf2+!?

[17...Nxd2 18.Nxd2 Bxg2 19.Kxg2 Re8 was still relatively ok for Black, but the simplifications have allowed White to basically retain a superior structure and Black will suffer for a while. Kramnik had no such intentions.]

18.Rxf2 Nxf2 19.Bxb7 Ng4 20.Nf3 Rb8 So in this position Black is down two pieces for a rook and a pawn, but he is hoping his initiative, combined with the weak squares around the white king, will provide compensation. Svidler, however, starts defending masterfully.

[23...Rfe8 24.a5 Qf2 25.Qc1 *(25.Nbd2 Ne3-+)* 25...Rxe2 26.Bxe2 Qxe2 27.Nbd2 is another draw with the ♘f2-h3 perpetual.]

24.Kg2 Nxd3 Trading the ♘ for the ♗ is risky. In many cases Black could always rely on invading on the 2nd rank and giving a perpetual with the ♘, as we saw in some variations. However, without this resource, Black is entirely relying on the lack of activity of the white ♘s, and the vulnerable position of the king, especially of the invasion point e2. If this is somehow patched up, the extra material and the passed pawn on the a-file will simply overwhelm Black.

[24...Ng4 Repeating moves was possible, as it seems that White can't get out of it. 25.Kh1 is perfectly possible if White is satisfied with a draw. *(25.Qc1* is like the only other move that is logical to thwart the ♘e3+ threat. *Rbd8! 26.Nbd2 Rxd3 27.exd3 Re8* Black has a seemingly very powerful attack, since there is no good way of meeting ♖e2+, however it seems like there is no immediate deadly threat either. *28.a5 Re2+ 29.Kh1 Nf2+ 30.Kg1 Qe3 31.Qxc7=* and there seems to be no checkmate, just a perpetual. However I highly doubt any human would willingly go into this line instead of just playing 25. ♔h1. *)*]

25.exd3 Rfe8 Black has lost yet a little more material, but this time White's position actually looks very dangerous. For starters, he can't develop his queenside, which seems to allow Black a huge initiative, however Svidler has an ace up his sleeve. **26.a5!** This passed pawn will be the key of White's defence. By ramming it forward, he intends to tie down the black rooks, allowing him to comfortably develop and eventually exploit his material advantage. **26...Qf6 27.Qf2**

[27.Kf2! covering e2 with the ♔ was an interesting alternative, as this

27...Rbd8 28.Ra4 c5

[28...Rxd3 29.Rxb4 Kramnik might have been reluctant to go into this line because it gives White the extra possibility of ♘c3, which covers pretty vital squares, however the game is opened which favours the rooks and the a5-pawn falls, which is the key. 29.a6 Rxd3 30.a7 Qc6 Black has recovered a pawn, and now he has obvious pressure. The a7-pawn looks dangerous but for the moment it is not going anywhere. **31.Ra5 Qa8**

[31...Rxf3 guaranteed a draw, however it wasn't easy to see, and Black is still pushing for that win. 32.Qxf3 Re2+ 33.Kh3? *(33.Kg1 Re1+ 34.Kf2 Rf1+ 35.Kxf1 Qxf3+ 36.Ke1 Qe3+ 37.Kd1 Qf3+=)* 33...Qh6+ 34.Kg4 Qe6+ and White will get mated.]

32.Nbd2 Rde3? But this is too much. It was imperative to take the a7-pawn while he still could.

[32...Rd7 33.Nc4 Rxa7 34.Rxc5 Rae7 35.Ra5= and Black has some ugly threats, but White should be ok.]

33.Nc4! A wonderful and not so obvious move. It gives White a huge advantage. Kramnik must have missed this.

33...R3e6

[33...Re2? 34.Nb6 Rxf2+ 35.Kxf2 is a fantastic position. Black has some annoying checks but nothing near a perpetual, much less mate, and he loses by force. Qe4 36.a8Q Qc2+ 37.Kg1 Qd1+ 38.Kg2 Qe2+ 39.Kh1+- and the checks have run out, as the ♘ will cover on g1.]

35.Ncd2 As opposed to so many different positions that we reached in variations, the a-pawn here is alive and healthy, and a major thorn in Black's position. Black is simply stuck defending against it and meanwhile the ♘s will roam freely. **35...c4**

[35...Rc8 36.Qf1!±]

36.Nxc4 Qe4 37.Nd4!+- White has no reason to be passive anymore. His ♘s dominate the board, and he has every single plus in the position. Black's position is hopeless. **37...R6e7 38.Nd6 Qb1+ 39.Kg2 Ra8 40.Qf3 Raxa7 41.Qa8+** A cute finish to a solid game by Svidler. He bravely took material and defended in great fashion. Marin,Mihail: 'Colovic,Aleksandar: 'English Opening The Black defences are very difficult to breach in modern chess, so when playing with White the players always try to find new ways to pose problems. We have already mentioned Svidler's change of repertoire with Black, while with White, instead of his usual 1.e4, he chose the English Opening ("the opening of the future") in all his games (except the one against Topalov in Round 2, which saw a dull Berlin draw). The English in various versions was very popular in Moscow with 14 games played. The reason is that it is (still) less explored than the other openings after 1.d4 and 1. e4 and it is less forcing in nature, allowing for more creative play.'' **1.c4** Marin,Mihail Marin,Mihail Marin,Mihail

[Berg,Emanuel]

John Watson: 'The best way to examine this line is to return to a game published in ChessPublishing a couple of years ago with a very different set of notes. Here I have the help of Emmanuel Berg and Rybka 4 to get closer to the truth of things.' **1.e4** Berg,E John Watson **1...e6 2.d4 d5 3.Nc3 Bb4 4.e5 c5 5.a3 Bxc3+ 6.bxc3 Ne7 7.Qg4** This is the critical test to the Winawer line of the French Defence. Recently Black has had great problems and I still havn't seen anything convincing. During the last few years I have tried a few different lines myself in order to find something satisfactory. After 7...0-0 Black might survive somehow after a stubborn defence, but there is no easy road for Black and usually a lot of suffering on the way. Therefore when playing on the first board for Sweden against Russia I decided to go for a pawn sacrifice where Black gets a lot of activity and development advantage. Maybe this line is better for White as well, but at least he will need to be carefull. Playing Black against Svidler was of course an excellent test to find out if the line was working. **7...cxd4**

[After 7...Qc7 White can transpose to the game with 8. ♕xg7, but he also has the additional option 8.Bd3 with the idea cxd4 9.Ne2 dxc3 10.Qxg7 Rg8 11.Qxh7 when White no longer has the usual development problems. Having the Bishop on d3 instead of f1 is a great improvement.]

8.Qxg7

[Here 8.Bd3 is well met by Qa5!]

8...Rg8 9.Qxh7 Qc7 10.Ne2 Nbc6 11.f4 Bd7 12.Qd3 dxc3 This is all very well know variations, but from here on White has quite a few possible choices. **13.Rg1!?** John Watson: 'We see this in the Shirov-Shulman game as well, where

I analyse it in considerable detail.' This came as a surprise to me as I hadn't seen this move beeing play right at this moment, although the idea is well know. White would like to push g4 in order to control the f5-square and restrict the Black Knight on e7. Usually White takes the pawn on c3 either with the Queen or the Knight, when Black gets some counterplay along the c-file. Now with the pawn left on c3, Black must act different. **13...0-0-0** Black completes his development and prepares to push...d4 in order to support c3 and aslo to restrict the White Bishop on c1.

[13...Qb6!? has been played in two previous game of of totally three games according to my database. However after 14.Be3 Qb2

A) John Watson: 'I think he underestimates White's chances after' Here 15.Qxc3 John Watson: '!' looks far too dangerous for White. After the forced line Qxc3+ 16.Nxc3 d4 John Watson: ', when he doesn't mention'

[15.h4!? (John Watson) is featured in this month's Shirov-Shulman game.]

15...Be8 John Watson: 'The idea is ... f6 and ...Bg6.' A standardmanuvre for Black in this line. Black protects the d4-pawn and prepares the f6-break followed by ... ♗g6 at some point. It is necessary for Black to do something active before White has strengthen his position and developed his pieces. If Black manages to open up the center, then White's King will be in danger.

16.Rg3 John Watson: 'Berg likes this move.' A useful move. Now it will be possible for WHite to develop the Kings Bishop to g2 without having the g4-pawn hanging. Moreover the Rook has a imortant work along the third rank where it protects against a possible comming ...d3-break.

[16.g5 was possible in order to prevent the ...f6-break. But here after Rh8 17.h3 Nf5 Black has excellent control over the light squares.]

16...f6 John Watson: '?!' John Watson: 'Probably not the best. Compare Shirov-Shulman, where the non-developing h4 had been played (instead of Rb1 and Rg3), so Black sucessfully broke down the centre with this move.'

23.Bxb7 Rae8 24.Rad1 White was a bit lucky to get away from a dangerous adventure with a bishop sacrifice with only a scare. The chances for a successful defence are good as Black has an exposed pawn on the e-file.
24...Kg7 25.Bc6 Re7 26.h3 This move might not have been the most accurate, but only engines can criticise it with any confidence. Black will not get far with sensible moves.

Candidates Moscow (4.1) 15.03.2016

[David Cummings]

1.c4 Nf6 2.Nc3 e5 3.g3 Following this game Svidler, and (indeed all the other participants) switched to the Four Knights System with 3 Nf3 Nc6 4 g3 for the remainder of the Candidates tournament. Nevertheless, White does get a little something out of the opening in this game. **3...Bb4 4.Bg2 0-0 5.e4 Bxc3 6.bxc3 c6**

[6...Re8 7.d3 c6 is a move-order which avoids the line played in the main game, and was played in Giri-Aronian from the 2015 London Classic. After 8.Nf3 d5 9.cxd5 cxd5 10.exd5 Nxd5 11.Qc2 *(11.Ng5!?* is the engine's choice and was suggested in my notes to Giri-Anand, but remains untested. It is not clear why Giri avoided this in London, but in any case, and perhaps significantly, Aronian decided not to repeat this line against Svidler.*)* 11...Qc7 12.0-0 Qxc3 13.Qxc3 Nxc3 14.Bb2 Na4 15.Bxe5 Nc6 with a balanced position, Giri, A (2778)-Aronian, L (2781) London 2015 1/2-1/2 (33)]

7.Nf3 The move introduced by Giri in his game against Anand at Bilbao 2015 (see below). Older moves, where Black is generally fine, are covered in the Archives, for example:

[7.Ne2 see Turov-Edouard]

[7.Rb1 see Mamedyarov-Giri]

[7.d4 see Vallejo Pons-Aronian]

[7.Ba3 see Grigoriants-Sadvakasov]

7...Nxe4 8.0-0 Another recent game saw:

[8.Nxe5 Re8 9.d4 d6 10.Bxe4 dxe5 11.0-0 Nd7 *(11...exd4* grabbing the pawn may be best, for example *12.Qc2 dxc3 13.Bxh7+ Kh8 14.Bf4* is unclear*)* 12.Bg2 exd4 13.Qxd4 *(13.cxd4* with a fluid pawn structure and the two bishops, should give White a slight edge*)* 13...Ne5 14.Bf4 Qxd4 15.cxd4 Nxc4 16.d5 cxd5 17.Bxd5 Na5 18.Bc7 Nc6 19.Rab1 Be6 20.Bxe6 Rxe6 21.Rxb7 Rae8 and Black holds, Jones, G (2645)-Gupta, A (2634) Reykjavik 2016 1/2-1/2 (47)]

8...d6 9.Nxe5 Nc5 The first new move, although it is clear that both players had analyzed this opening deeply. Other tries:

[9...dxe5 10.Bxe4 Be6?! 11.Ba3 Re8 12.Qb1 was Giri-Anand 2015, see the Archives]

[9...Ng5 10.Ng4 f5 11.f4 Ne4 *(11...fxg4 12.fxg5 Rxf1+ 13.Qxf1 Qxg5 14.Qe1* and White's lead in development is more important than his pawn deficit*)* 12.Ne3 Nf6 13.Qc2 g6 14.Ba3 Na6 15.d4 Rb8 16.Rfe1 gave White a slight edge in Wang, H (2707) -Mchedlishvili, M (2635) Al Ain 2015 1-0 (44)]

10.Ng4 White has the longer term asset of the two bishops, but in the meantime Black hopes to exploit White's loosely placed knight and disjointed c- and d-pawns before White gets coordinated.

10...f5 Blockading the backward d-pawn is another option, for example

[10...Nd3 11.Ba3 Na6 12.Ne3 Nac5 13.Qc2 Re8 14.Rab1 a5 15.f4 and White can gradually unravel, starting with Rf1-f3 and potentially Ba3xc5, while it is not obvious what Black's plan (other than waiting) should be.]

[10...Bxg4?! is a concession, and after 11.Qxg4 Nbd7 12.d4 Nf6 13.Qf5 White is clearly better as the bishops have a lot of scope]

11.Ne3 f4 Initiating a forcing sequence

[11...Nd3 can now be answered by 12.f4 when Black's bishop is restricted by the f5-pawn]

12.d4 White sacrifices a pawn to open the position for his bishops. Instead

[12.Nc2?! Nd3 13.Ba3 Na6 favours Black, as White's minor pieces are now more passive than their counterparts]

12...fxe3 13.dxc5 exf2+ 14.Rxf2 Rxf2 15.Kxf2 Qf8+ 16.Qf3 Avoiding the queen trade with

[16.Kg1 dxc5 17.Bf4 Nd7 doesn't bring White any advantage since Black's queen aids the defence]

16...Qxf3+ 17.Bxf3 dxc5 18.Bf4 After the dust settles, White is the one pushing in this endgame, though it is close to equality and tricky for both sides to play.

[18.Bg5!? was another possibility mentioned by Svidler, but the engine is rather unimpressed, for example Bf5 19.g4 Be6 20.Rb1 b6 21.Rd1 Nd7 22.Rd6 Kf7 23.Bxc6 and now the sneaky move Rf8 gets Black out of trouble by exploiting the open f-file, for example 24.Kg3 Ne5 and Black is fine]

18...Nd7

[18...Bf5?! gives White some targets, after 19.g4 Be6 20.Rb1 b6 21.Re1 Kf7 22.Rd1 Na6 *(22...Nd7 23.Bxc6 Rf8* doesn't work this time, after *24.g5* White is better*)* 23.Bxc6 Rf8 24.Kg3 White has regained the pawn and is slightly better]

19.Bd6
[19.Re1 Nf6 20.Rb1 was a possible improvement mentioned by players]
[19.a4 is the engine's recommendation, and now g5!? 20.Bc7 *(20.Bxg5?! Ne5 21.Be2 Be6* and Black equalizes*)* 20...Nf6 21.Rb1 Kf7 22.a5 Kg6 23.Bd6 with a slight edge]
19...Nb6 20.Re1 Bd7 21.Bxc5 Re8?! Black completes his development, but here he could relieve the pressure by tactical means with
[21...Nxc4! 22.Re7 Rf8! 23.Rxd7 Rxf3+ 24.Ke2 *(24.Kxf3 Ne5+* would lead to a drawn B vs N endgame *)* 24...Rf5 as given by Svidler. Black should hold this comfortably.]
22.Rb1 Be6?! Losing more time. Instead after
[22...Bc8 23.Bxb6 axb6 24.Rxb6 Re5 Black's rook will get to the a-file first]
23.Bxb6 axb6 24.Rxb6 Bc8 25.Rb4 Re5 26.Ra4 White is a pawn up but is only slightly better because of his damaged pawn structure **26...Kf7 27.Ra8 Bf5 28.Be2 Re7 29.c5?!** White ends up trading his c-pawns for the b7-pawn but Aronian is able to hold the resulting position.
[29.a4 keeps the pressure on - White still has some winning chances]
29...Kf6 30.a4 Re5 31.Rf8+ Kg6 32.Rb8 Rxc5 33.Rxb7 Rxc3 34.a5 Bd3 Black liquidates into a drawn rook endgame **35.Bxd3+ Rxd3 36.a6** Even if White wins a pawn with
[36.Rc7 Ra3 37.Rxc6+ Kf5 38.a6 Kg4 39.Ke2 h5 Black's counterplay will be sufficient to draw]
36...c5 37.a7 Ra3 38.Ke2 c4 39.Kd2 h5 40.Kc2 c3 41.h4 No further progress can be made so the players agreed the draw here,

1.f4 d5 2.Nf3 Nf6
[Svidler may have been inspired to give the Bird a go by an earlier game in the same Russian Championship. That had seen 2...g6 3.g3 Bg7 4.Bg2 c6 *(* waiting this should be compared with both *4...c5 5.0-0 Nh6* , as covered by Tony in Karlsson-Seirawan, Haninge 1990,*;* and *4...Nd7!?* , after which *5.0-0 c6 6.Nc3 Qb6+ 7.e3 h5 8.Qe2 Nh6 9.d3 Nf5 10.Qf2 d4* saw me equalising in Townsend-Palliser, York 2010 it's not so easy for White when Black develops flexibly in these reversed Leningrad lines*)* 5.Nc3 *(5.0-0 Qb6+* is again Black's idea Kuzmicz-Bindrich, Wroclaw (rapid) 2014, continued *6.d4 Nf6 7.Nc3 0-0 8.Ne5 Na6 9.e3 Nc7 10.a4 a5 11.g4 Nd7* and Black didn't have any problems*)* 5...Nh6!? 6.d3 d4 *(* ambitious instead, the creative *6...Qb6 7.e4 dxe4 8.dxe4!? 3.g3 g6 4.Bg2 Bg7 5.0-0 0-0 6.d3 c5 7.Qe1 Nc6
[Jakovenko doesn't fear White's main break. He's quite right not to, but 7...d4 is more popular and at least as

good. Here 8.c3 Nc6 9.Na3 received good coverage from John Bartholomew in the model game (for Black), Schnelzer-Andersson, Bad Wiessee 2012.]

8.h3!?

[As both Davies and Bartholomew have shown, 8.e4 can be met by dxe4 9.dxe4 e5! . *(*Instead, *9...b6* was the choice of a young Dutch talent, but after *10.e5 Nd5 11.Rf2!? 8...d4 Only now does Black turn to the thematic advance. **9.Na3 Nd5 10.Nc4 b6**

[This logical move turns out to be new. Previously, Black had forced the pace and 10...b5 11.Nce5 Nxe5 *(11...Ncb4 12.Qd1 f6 13.Ng4 Rb8 14.a3 Nc6 15.e4 dxe3 16.Nxe3* is also hard to assess Black should be OK, but must be careful having expanded in a fairly ambitious way*)* 12.Nxe5 Bb7 13.c4! dxc3 14.bxc3 Qc7 15.e4 Nb6 16.Rb1 a6 17.c4 was quite complex in Lund-Dineley, British League 1998.]

11.Bd2 Bb7 12.c3 Having brought his queen's knight to its most aggressive square, Svidler continues in true reversed Leningrad fashion by challenging Black's bridgehead. **12...e6 13.Rc1 Rc8 14.Qf2**

[Continuing to gradually improve. Many club players would be unable to resist 14.g4?! in such a position, but here Black is well placed to counter with b5 . The problem for White is that 15.Nce5 Nxe5 16.fxe5 *(* or *16.Nxe5* when Black has a number of good, undermining moves, including even *g5!?)* 16...Ne3 17.Bxe3 dxe3 18.Qg3 Qc7 19.Qf4 Bxf3 20.Rxf3 Bxe5 21.Qxe3 f5 would leave Black doing pretty well with his superior bishop.]

14...Nde7

[With the e3-square under White's control, 14...b5 might have been safely met by 15.Nce5 Nxe5 16.fxe5 , so Jakovenko prefers to manoeuvre.]

15.a4 Ba6! One has to approve of the way Jakovenko is happy to play slowly. In the reversed Leningrad positions White would normally be much more aggressive, albeit aided by an extra tempo. Black has abandoned the long diagonal, but his last two moves have avoided being hit by e2-e4. **16.Nce5**

[Once again, I'm not too keen on 16.g4?! . After Bxc4 17.dxc4 Qd7 it won't be easy for White to press ahead on the kingside and in the meantime his queenside is a tad vulnerable.]

16...dxc3 Swapping off a powerful pawn, but played in accordance with Jakovenko's desire to hold solidly as Black. **17.Bxc3 Nxe5 18.Bxe5**

[I doubt Svidler wanted to acquiesce to so many exchanges, but after 18.fxe5 Bb7 Black controls some handy central squares and it's not so clear what White is up to: for instance, 19.Nd2 Bxg2 20.Kxg2 Qc7 prevents Ne4 and 21.Nc4 Nd5 leaves the weakness of e5 the key feature of the position.]

18...Nc6 19.Bxg7 Kxg7 20.Ne5! Freeing the Bird bishop for action, but at the cost of another exchange and, indeed, now Jakovenko can remove the

queens to boot. **20...Nxe5**
[More ambitious would have been 20...Na5!? , and if 21.e3 f6 22.Nc4 Bxc4 23.dxc4 Qd3 with an imbalance and decent counterplay.]
21.fxe5 Qd4!?
[A big move, but Jakovenko seems to have judged things well. 21...f6 22.exf6+ Rxf6 was a different way to continue the simplification policy.]
22.Qxd4 cxd4 23.Rxc8 Rxc8 24.b4
[Seizing space. Similar would have been 24.Rf4 Rd8 *(24...Rc2? 25.b4 Rxe2 26.b5 Bxb5 27.axb5 Rxe5* doesn't quite work on account of *28.Bc6)* 25.b4 .]
24...b5 25.Ra1
[Black is in time to hold everything together and break after this. White would like to place his pawns on a different colour to his bishop, so might have gone 25.a5!? , but after h6 *(25...Rc2? 26.Rf4 Rxe2 27.Rxd4* is not what Black wants to be doing; and neither is *25...g5?! 26.h4! h6 27.hxg5 hxg5 28.Kf2 Rc2 29.Rh1 Bc8 30.Rh5 Kg6 31.g4 f6 32.exf6 Kxf6 33.Be4* when White will continue to press *)* 26.h4 Rc7 27.Rf4 Rd7 I can't see a great way to break Black's solid defence, despite the engines' praise for White's position.]

[It would be interesting to know what Peter had in mind after 8...cxd4 I believe that it is the most reliable continuation and Black can easily get

[6...b5 7.Bc2 Bb7 8.Re1 e5 9.d4 Be7 10.Nbd2 0-0 11.Nf1 actually reaches a main-line Breyer Spanish, but without the move h3! The reason is that White has gained a move by getting his bishop back to c2 quicker than in the Spanish (Bb5-d3-c2 versus Bb5-a4-b3-c2), but Black hasn't had to waste time on ...Nc6-b8-d7. This must favour Black just a little, but the improvement could be compensated by the fact that most Sicilian players don't know how to play the Breyer! [8...e5 9.d4 Be7 10.Nbd2 0-0 11.Nf1 Re8 12.Ng3 Bf8 13.d5 b5 and now 14.h3 would be a direct transposition to the Breyer thanks to Black's inefficient ...b7-b6-b5! Instead, 14.Nf5± was a little better for White in Rozentalis, E (2613)-Raznikov, D (2463)/ Cappelle la Grande 2013 0-1 (73).]

9.d4 cxd4 10.cxd4 Be7 11.Nc3 b5 12.d5! A great transition of the pawn structure. The key to the transformation comes on the next move: **12...e5 13.b4!** Now we again have a sort of Spanish structure where Black has wasted two tempi on ...b7-b6-b5 and ...e6-e5 while White hasn't played h3! 1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 Qc7 6.g3 a6 7.Bg2 d6 8.0-0 Bd7 Moro may have a reputation as a bit of a maverick, but that doesn't mean he can't play classically and well on occasion. Think too, for instance, of some of his recent games in the Qc2 Nimzo. **9.a4 Nf6 10.Nxc6 Bxc6 11.a5 b5!?**

[However, after first developing sensibly, we see a trademark Moro decision. The text, refusing to allow White his queenside bind, is actually a novelty. Previously, as we've seen, 11...Be7 12.Be3 Nd7 *(* Delchev and Semkov prefer *12...0-0* in their Taimanov repertoire work*)* 13.Na4 0-0 14.Nb6 Nxb6 15.Bxb6 Qd7 16.c4 f5 had appeared to give Black enough counterplay in Ponomariov-Bruzon Batista, Poikovsky 2012. Perhaps Moro feared an improvement, or maybe he just couldn't see what was wrong with the natural freeing break.]

12.axb6 Qxb6 13.Re1 Be7 14.Ra3

[Approved by the machine, but when Black upheld his idea in Leko-Morozevich, Beijing (blitz) 2013, White preferred to develop with 14.b3 Qc7 15.Bb2 . However, after 0-0 16.Qe2 Bb7 Black was quite well coordinated and 17.e5 dxe5 18.Bxb7 Qxb7 19.Qxe5 Rfc8 20.Re2 Rc5! 21.Qd4 Rd8 22.Qa4?! a5 saw him beginning to seize the upper hand.]

14...Qc7

[Covering e7 and to appreciate why we need just examine the line 14...0-0?! 15.Nd5! exd5 16.exd5 Bxd5 17.Bxd5 Nxd5 18.Qxd5 where White emerges with a pleasant advantage, since a6 and d6 are somewhat more vulnerable than b2 and c2.]

15.Nd5!?

[Tempting, but while this is dangerous, it doesn't appear to offer White more than reasonable compensation for his piece. A calm alternative is 15.Qe2 when it's hard to believe that giving up a6 will give Black sufficient compensation, so Bb7 *(15...Qb7 16.Rb3!* is surprisingly awkward: for example, *Qc7 17.Bf4 e5 18.Bg5* , taking control of d5*)* 16.Bf4 Nd7 seems indicated when it's hard to believe Black can be worse and 17.Rb3 0-0 18.e5 Bxg2 19.exd6 Bxd6 20.Bxd6 Qxd6 21.Kxg2 Nc5 22.Ne4 only simplifies down towards a draw.]

15...exd5 16.exd5 Bd7 17.Rae3 The main point of White's play is revealed: Black will have to undevelop his knight. **17...Ng8 18.Qe2 Qd8** Further undevelopment, but we should not forget that White has only one pawn

for the piece and must now act before Black unravels. Incidentally, it's hard not to like Steve Giddins' commentary at this point (from his notes for the Christmas issue of 'CHESS'): "Black covers up desperately on the ropes, in the style of the famous Ali-Foreman Rumble in the Jungle, but will he manage to 'rope-a-dope'?" **19.c4** Svidler is in a hurry and so throws his c-pawn into the mix in a bid to carry on harrying Black. **19...Kf8 20.c5! Bb5 21.Qh5?**

[The most aggressive square, but the engines may well be correct to prefer 21.Qd2!? when the arrival of the pawn on c6 will offer White some lasting positional compensation, since now dxc5? fails to just 22.d6 .]

21...g6?!

[Hardly terrible, but as indicated by Giddins, 21...dxc5! looks critical when 22.d6 Bxd6 23.Bxa8 Qxa8 doesn't look like something White would want to allow, but then again neither is it easy to find anything clearly better.]

22.Qd1 Bg5 23.c6! Offering an exchange for the dark squares, but as White is already a piece in arrears, he is basically happy to play minus a rook. **23...Bf6**

[Moro wants to keep his dark-squared prelate. Let's take a look at 23...Bxe3 24.Bxe3 when h5 *(* played to create squares for the rook White threatened Qd4 and if ...Qf6? then Bh6+! would be most embarrassing, while *24...Nf6?* fails to *25.Bh6+ Kg8 26.Qd4* followed by c7*)* 25.Qd4 Rh7 26.Bf4 Qc7 27.Bh3 remains hard to assess. Clearly White's pieces are on excellent squares, unlike Black's kingside trio, and it remains tough for Black to untangle, as shown by Re8 28.Rxe8+ Kxe8 29.Bd7+ Kf8 30.Qb4 Ke7 31.Qe1+ Kf8 32.Qb4 when neither side can easily avoid the repetition.]

24.Bh3 Taking control of some useful squares and clearly Black is now going to have to keep that c-pawn under lock and key. **24...Kg7 25.Bd2 h5 26.Qc2!** Threatening not just to queen, but also to make a favourable trade of bishops. By this stage it's certainly clear that White has obtained pretty decent compensation. **26...Qc7 27.Bc3 h4!?** Desperately trying to close out one of White's pieces, while hoping to find an avenue into the game for his dormant king's rook. **28.g4 g5!**

[This entails a pawn sacrifice, but he could hardly allow 28...Bxc3? 29.Qxc3+ Kh7 30.g5! with a complete bind on the position, which does not make for happy reading for the chaps on g8 and h8.]

29.Qf5 Rh6 30.Qxg5+ Rg6 31.Qf4 And so White has collected a second pawn and definitely dented the black position, albeit in returning for allowing one of the prisoners to escape. **31...Kf8 32.Bxf6**

[After this the game begins to fizzle out. 32.Rf3 was a logical choice to keep the game alive, whereupon Re8 33.Rxe8+ Kxe8 34.Qe4+ Kf8 would have remained quite unclear, although I wouldn't be surprised if Black's defences were holding.]

[Another try is 32.Qb4!? hoping to invade on the queenside, when Bxc3 33.Qxc3 Qb6 34.f4 *(34.Kh1!?* would be a calmer and possibly more dangerous approach*)* 34...Nf6

35.g5 Re8! is fine for Black according to the silicon, but one would have thought that all three results remained open here in an all-human encounter.]

32...Nxf6 Now the second prisoner is out, so White must hurry to force the pace. **33.g5! Nxd5 34.Qxh4 Nxe3** Allowing perpetual check, not that he had a large amount of choice about it. **35.Qh8+ Rg8 36.Qh6+ Rg7 37.Qh8+ Rg8 38.Qh6+ Rg7 39.Qh8+**

Here it is fine as d3 becomes a weakness and my control over d4 increases. Im Allgemeinen ist es nicht ratsam, Bauern zu verdoppeln. Hier ist es gut, da d3 eine Schwäche wird und meine Kontrolle über d4 zunimmt.

During the game, I believed that I would need to break white's grip on the center with ...f6, and that the setup with the N on e8, Qd7, and Rd8 would make the freeing move more effective. Engine says both are fine Dies ist eine sehr interessante Stellung. Während der Partie war ich der Meinung, dass ich mit ...f6 die weiße Umklammerung des Zentrums brechen müsste und dass der Aufbau mit dem S auf e8, Dd7 und Td8 den Befreiungszug effektiver machen würde. Die Engine sagt, dass beides in Ordnung ist.

8.Re1 The drawback of the knight transfer to g6 is that White can expand in the centre. Although he will play d4 later on, this won't be too effective. The immediate advance is played more often and seems to offer more chances to fight for an edge. However, it had already featured in Svidler's previous practice and hadn't brought him any advantage:

15.d5 Nb8 Black has tried every possible ♘-move at this point. Black needs to challenge White's ♙-wedge in the centre or he will have to suffer from lack of space. So ideally Black plays c6 and frees his game. The question where to put the ♘ to achieve this aim is still not settled.

[Svidler,Peter]

When I was preparing for the tournament at home, the only things I looked at were two possible black games- vs. Kasparov and Kramnik. None happened, which is one of the reasons of my success. When thinking about the white game vs Kasparov at home, I simply told myself that Najdorf 6. ♗e3 ♘g4 cannot be all that bad for White. But two rounds before me Alexei Shirov ran into 6...e5 and didn't really pass the opening stage, so I shelved the idea and decided to go for something not so optimistic. Cela expliquerait sans doute la mobilisation

optimiste des Fous en fianchetto, mais aussi et surtout, "l'oubli" du Roi au centre de l'échiquier. Peu importe la raison pourtant, car elle plaide pour cette remarquable intuition de Svidler, qui est parvenu à déceler un point faible dans l'incroyable arsenal théorique du champion du monde, jusqu'à le faire vaciller, dès la première tentative. Bien d'autres champions s'y étaient essayés avant lui, mais s'y étaient plus d'une fois cassés les dents. 8.d4!? Voilà! Les Blancs passent à la vitesse supérieure. La menace est double: soit, le coup stratégique d5, gagnant du terrain et enfermant le Fb7 pour de bon, soit le coup de bélier, e5-e6, dispersant les pions ennemis et ouvrant la voie au ♘f3 (♘g5-e6). Autrement dit, les Noirs éprouvent déjà certaines difficultés et ceci nous laisse supposer que Kasparov rejouera à l'avenir les parties du championnat intercercles français, où Jean-Luc Seret et Jean-Marc Degraeve avaient déjà essayé ce gambit bien avant son adversaire! 7.Bb2 Be7

[Somewhat more active is 7...b5 8.Qd2 *(*After *8.f3 Be7 9.g4 0-0 10.Qd2* , as in Manor,I - Tunik,G Israel 2010 Black could have played *d5!? 11.e5 Nfd7 12.f4 Bh4+ 13.Kd1 Nc5* , obtaining a comfortable version of the French.*)* 8...Be7 9.0-0-0 0-0 10.Bd3 *(* Worthy of attention is *10.a3!? Bb7 11.f3* , but I don't think Black should face problems then, either. *)* 10...Bb7⇄ Black was doing well in Melnikov,D - Kabanov,N St Petersburg 2018]

8.Qd2 Qc7 I am not sure if this spot belongs to the queen in this situation.

[More to the point was 8...b5 9.f3 0-0 10.a4 b4 11.Nd1 This position occurred a long time ago in Georgiev, K - Pinter,J Prague 1985 , and now Black could have exploited the awkward Nd1 by means of e5! 12.Nf5 Bxf5 13.exf5 d5⇄ The strong pawn centre provides Black full compensation for White's bishop pair.]

9.0-0-0 b5? This careless move is a novelty. Perhaps Hou Yifan missed (or underestimated) the standard piece sacrifice.

[The previously played 9...Nc6 is well met by 10.Nxc6! bxc6 11.g4 Bb7 12.g5 Nd7 13.f4± , and White's expansion on the k-side looks very promising. Valentin Pascual,C - Sanleon Pravisano,N Benimodo 2017]

[Insufficient is also 9...0-0 10.g4! b5 11.g5 Nfd7 12.f4↑]

[In my opinion, the best solution most likely was 9...h5!? 10.Kb1 Nbd7 11.f3 Nc5 I still prefer White's chances here, but his play on the k-side is slower.]

10.Bxb5+! Peter doesn't miss this chance! **10...axb5 11.Ndxb5 Qb6 12.Nxd6+** Peter manages to liquidate into a much better endgame. **12...Bxd6 13.Qxd6 Nc6?** This move leads to an immediate collapse.

[It was necessary to trade queens: 13...Qxd6 14.Rxd6 Bb7 15.Rhd1 0-0 16.f3± White is much better, but there is still plenty of play.]

14.Nd5! The second piece sacrifice

enables White to gain access to his opponent's king. **14...exd5 15.exd5 Nxd5** A sad necessity. **16.Rhe1+ Be6 17.Rxd5 Qb7 18.Rc5**
[Simpler was 18.Bxg7 Rg8 19.Bf6+-]
18...Ra6 19.Rd1 Black is practically paralyzed now. **19...Qa8**
[Or 19...Qd7 20.Qg3 Qe7 21.Qc3+-]
20.Bxg7 Ne7 21.Qd4 Rg8 22.Bf6 Nd5 23.a4 In addition to the attack White has also a material advantage. **23...Nxf6 24.Qxf6 Bxb3** Desperation. **25.Rd6 Rxd6 26.Qxd6 Be6 27.Rb5 Qd8 28.Rb8?** This careless move could have spoiled a lot!
[Much stronger was 28.Qe5! Kd7 29.Rb7+ Kc6 30.Qb5+ Kd6]
28...Bc8 29.Qe5+ Kf8? Luckily for Peter, Black immediately returns the favor.
[Had Hou Yifan played 29...Kd7! 30.Qb5+ Ke7 White could hardly have achieved more than forcing a perpetual.]
30.a5+- Now the a-passer easily decides the game. **30...Rxg2** There was no adequate alternative. **31.Qc5+ Kg7 32.Rxc8** The rest was just agony. **32...Rg1+ 33.Kb2 Qd1 34.Qf8+ Kg6 35.Rc6+ Kg5 36.Qg7+ Kf5 37.Qxf7+ 1-0**

Somehow I always end up annotating Andreikin's games. **1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.d3 d6 5.0-0 Bd7** Mikhalevski, V: 'One possible line, although it seems that the move isn't really necessary. In my opinion 5...Be7 should be preferred.' **6.c4** Mikhalevski, V: 'This way White is fighting for the d5-square. The idea is well-known in different lines of the closed Spanish.' This space grabbing system has been played quite a few times in recent years.
[Earlier we analysed for you. 6.c3

Hou Yifan (2509)-Jonkman, H (2425)/Wijk aan Zee NED 2007/[Olivier Renet].]

6...g6 Mikhalevski, V: 'Black develops the dark-squared bishop to the long diagonal in order to control the d4-square.'

[Black can also develop his dark-squared bishop to e7. 6...Be7]

7.Nc3 Bg7 8.Be3 Mikhalevski, V: 'A new move order, which transposes to 8. h3 on the next move.'

[8.h3 0-0 leads to the aforementioned transposition.]

8...0-0 9.h3 The pieces have all developed to their logical squares, and now Black has to make a decision. **9...Nb8** Mikhalevski, V: 'A novelty in a pretty rare position. Black's idea is to simplify the position.' This move is new, but the idea is a typical one in these positions. Black offers the bishop trade in order to free up some space.

[Another possibility was 9...Nh5 trying to play in King's Indian style.]

[9...a6 10.Ba4 Rb8 was tested in one recent game. 11.Rc1 Kh8?! (The immediate *11...Nh5* is better.) 12.Re1 Be6 Vaibhav, S (2527)-Sokolov, I (2636)/Jakarta INA 2013. Now White should have proceeded with 13.Nd5±]

10.Qb3!? Mikhalevski, V: 'White attacks the b7-pawn and provokes the advance of the c-pawn in order to later play d4 and create a weakness on d6.' White tries to force Black's hand on the queenside, though this move looks a bit awkward to me.

[10.Rc1 improves White's position while keeping the tension, and would probably be my choice.]

10...c6

[10...Bxb5 11.cxb5 and the open c-file would favor White.]

[10...c5 Mikhalevski, V: '±!?' Mikhalevski, V: 'is committal, but makes some sense as White won't be able to prepare d4. Weakening the d5-square is important, but Black also gets access to d4.' 11.Bxd7 Qxd7 These positions typically give a slight edge to White, since the e3 bishop is more active than the g7 one.]

11.Ba4 Qc8 The queen ends up being rather misplaced here.

[11...Qc7 looks better to me, though it is less forcing since ♗xh3 isn't an idea now.]

12.Qd1 Mikhalevski, V: '!' **12...Na6 13.d4** Mikhalevski, V: '!' Mikhalevski, V: 'Suddenly the position starts to resemble the King's Indian.' White chooses the proper moment to expand in the center. **13...exd4 14.Bxd4 Be6** If White can consolidate, he'll simply be better. Black's best chance is to take advantage of White's temporarily awkward pieces. **15.Qe2 Re8 16.Rad1 Nc5 17.Bc2** Mikhalevski, V: 'Now the similarity with the King's Indian is even greater. White is threatening 18.e5.' White has nearly consolidated, and if he succeeds he will have a large advantage due to the extra space and the weak d6 pawn. Black needs to act immediately. **17...Ncd7?** Mikhalevski, V: 'This looks passive.'

[17...b5! Mikhalevski, V: 'was better, obtaining typical King's Indian counterplay on the queenside.' was definitely the best chance. 18.cxb5 cxb5 19.Nxb5 *(19.Qxb5 Bxh3!* This shot always has to be covered. *20.gxh3 Qxh3 21.Qe2 Ncxe4 22.Nxe4 Qg4+ 23.Kh2 Qh5+ 24.Kg2*

Qg4+= with a perpetual.*; 19.b3 a6* and Black should be fine.*)* 19...Ncxe4 Mikhalevski, V: '!' and now the position is a complete mess. I've given a few sample variations. 20.Bxf6 Mikhalevski, V: '!' *(20.Bxe4 Bc4↑)* 20...Bc4 Mikhalevski, V: '!' 21.Qxe4!

A) Mikhalevski, V: 'or' 21...Rxe4 22.Nxd6 Qb8 23.Nxe4 Bxf1 *(23...Bxf6 24.Nxf6+ Kg7 25.Nd7 Qxb2 26.Bd3 Bxd3 27.Rxd3* and White has too many pieces.*)* 24.Rd8+ Qxd8 25.Bxd8 Bxg2 26.Kxg2 Rxd8 27.b3 Mikhalevski, V: ' ±' Mikhalevski, V: 'with the slightly better chances for White.' and I think White should have good winning chances once his pieces get organized.;

B) 21...Bxb5 22.Qd5 Bxf6 23.Bxg6 Mikhalevski, V: '!' hxg6 24.Qxb5 Rb8 25.Qa4 Rxb2 26.Rxd6 Re6 27.Rxe6 Qxe6 28.Qxa7 Rxa2 Mikhalevski, V: 'Black is a pawn down, but retains good chances for a draw as all the remaining pawns are on one side.' and while White can press, Black should draw this comfortably.]

18.Ng5! Mikhalevski, V: '±' Mikhalevski, V: 'Black is under pressure.' Now Black is close to lost. **18...Qc7 19.f4** Mikhalevski, V: '!' Mikhalevski, V: 'The bishop on e6 is not going anywhere.' **19...Qa5 20.a3 h6 21.Nf3?!** Mikhalevski, V: 'An inaccuracy, which doesn't spoil much however.'

[21.Nxe6 Mikhalevski, V: '!' Mikhalevski, V: 'was stronger.' This is a simpler way to do it. Rxe6 22.Qf2 Mikhalevski, V: 'is strong too.' and White has too much. For example, if *(22.f5!? gxf5 23.Qf2!±* and it turns out that *fxe4?* is bad in view of the simple *24.Nxe4+-* when White's pressure becomes unbearable.*)* 22...Rae8 23.b4! 21...Nh5?! This active try actually frees White a bit.

[21...Rad8 looks more resilient, and I don't see a clear way to proceed. The problem is that f5 can't be played due to the e-file pin, and the queen can't go to f2 because c4 is hanging. The computer wants to play ♕d3 for this reason, but you don't have to be an art critic to see why that move isn't pretty.]

[21...Rab8 was worth a try.]

22.Bxg7 Kxg7 23.Qd2 Mikhalevski, V: '±' Mikhalevski, V: 'White's strategy starts to bear fruit. The d6-pawn is going to fall.' and now we see the problem: c4 can't be captured due to Qd4+. **23...Qb6+**

[The immediate 23...Bxc4?? would be a blunder in view of 24.Qd4++-]

24.Rf2! Most accurate.

[24.Kh2 Bxc4 is now with tempo.]

24...Bxc4 This loses right away, but Black was busted anyway.

[24...Qxb2 was a good practical try, but after the accurate 25.Qd4+! *(25.f5 gxf5 26.exf5 Bxc4 27.Qd4+ Nhf6 28.Qxc4 Qxa3* and while Black should almost certainly get mated, at least White would have to do some work here.*)* 25...Nhf6 *(25...Kg8 26.f5* is curtains.*; 25...f6 26.f5! gxf5*

27.exf5 Bf7 28.Rb1 Qxa3 29.Rxb7+- is disastrous too.) 26.e5 dxe5 27.fxe5 and Black has to give up a piece, since if the knight moves Bf5! will be a killer.]

25.Na4 Mikhalevski, V: '!' **25...Qc7**
[25...Qa6 26.Qc3+ Kg8 27.Rxd6 and Black can resign, since all of his pieces are bad and his king is weak.]

26.Qc3+ Nhf6 Mikhalevski, V: '?!'
[26...Kg8 would have been better, although after 27.Qxc4 b5 28.Qd4 bxa4 29.Qxd6± Black's position remains difficult.]

27.Qxc4 b5 Svidler is accurate from here on out. **28.Qb4 bxa4 29.Rxd6** Mikhalevski, V: '+-!' Mikhalevski, V: 'Black's position collapses as he can't capture the e4-pawn.' **29...Rab8**
[29...Nxe4? 30.Bxe4 Rxe4 31.Rxd7!+-]

30.Qd2 Red8 31.e5 Ne8 32.Qc3! Mikhalevski, V: 'This strong intermediate move decides the game quickly.' **32...Nb6 33.Rxc6 Qb7 34.f5 Nd5 35.Qc5 Qxb2 36.fxg6 f6 37.Nd4** Mikhalevski, V: 'A great positional win from the 7-time Russian Champion. The line with 7.c4 promises a slight, but long-term advantage and so I would recommend that Black either go for 5...Be7 or 4...Bc5.' and Black resigned seeing that he's in no position to stop any of White's threats, the most important of which being ♘e6+.

1.e4 Arsovic,Goran **1...e6 2.d4 d5 3.e5** This is a specialty of Svidler's countryman, Grischuk, who used it to beat Ivanchuk twice, among others. A good psychologycal decision by Svidler to put Ivanchuk to the test once again.
3...c5 4.c3 Nc6 5.Nf3 Bd7 6.Be2 Nge7 7.0-0 This is how the game Grischuk-Ivanchuk had gone, too. Ivanchuk does not seem to be the kind of player to let his defeats pass without looking for improvements, so the theoretical duel is very much on...

12...Bxc6 13.f5 b4 14.Ne2 e5

[As I've mentioned before, 14...Bxe4?! 15.fxe6 fxe6 16.Nf4 gives White a dangerous initiative.]

15.Ng3 h5 16.h4 Qc5 17.Qe2 Just a few months ago in my notes to Kurnosov-Dubov, Tyumen 2012, I wrote that this "was Peter Wells' recommendation in 'Experts vs.' and it's a mystery to me why anyone would want to go in for this position as Black. Not only is he losing a pawn, but it's not clear that he is going to obtain the initiative in return." Evidently the young Russian star disagrees for he not only repeats the line, but uses it to draw with Svidler! **17...Ke7 18.Nxh5 Bb5 19.Qg4 Bh6 20.Rd5** Alekseev's novelty.

20...Qc7!

[This was my suggested improvement over Alekseev-Dubov, Tyumen 2012, where 20...Qe3?! 21.Qd1 Qxe4? 22.Bxb5 axb5 23.Rxd6 Rad8 24.Rd7+! Rxd7 25.Qxd7+ Kxd7 26.Nxf6+ Kc6 27.Nxe4 Rg8 28.g3 Rg4 29.Re1 left White with a winning endgame.]

21.Qd1 Bc6 22.Bc4! And here my analysis ended. Dubov, however, looked deeper and his play here has changed my mind about this variation. It's no longer a mystery why Black might continue to employ it! **22...Rac8**

[Prudent. 22...Bxd5 23.Qxd5 Rhf8 24.Rd1 followed by g4 would leave White in charge with his powerful light-square grip.]

23.Bb3

[23.Qd3 a5 24.b3!? is recommended by the machine, but I can't believe this is so bad for Black: for example, a4 25.g4 Bxd5! 26.Qxd5 Rh7 27.Nxf6 Kxf6 28.g5+ Ke7 29.gxh6 Qc5 .]

23...a5! Black is in time to stir up sufficient trouble on the queenside.

24.Rd3?

[This frees some squares for the bishop, but concedes the initiative for good. I suspect that White should have tried 24.Nxf6! Kxf6 25.Rxd6+ Ke7 *(or 25...Kg7 26.Qg4+ Kf8 27.Rhd1)* 26.f6+ Kf8 27.Rd3 when he obtains three pawns for the piece and a rather unclear position.]

24...a4 25.Bxf7!

[Spectacular and quite possibly necessary, since 25.Bd5 Bxd5 26.Rxd5 b3! would have left Black breaking through on the queenside.]

25...Bxe4!

[25...Kxf7? 26.Rxd6 would have left Black struggling with f6 dropping, in view of Bg7? 27.Nxg7 Kxg7 28.Qg4+ Kf7 29.Qg6+ . Dubov prefers to continue his own plans.]

26.Be6 d5 27.Bxd5

[Easy to criticise, but otherwise ...b3 was on its way and 27.Bxc8 Rxc8 28.Ng3 b3 29.c3 bxa2+ 30.Ka1 a3 would have left White doing well to survive.]

27...Bxd3 28.cxd3 Rhd8

[Svidler may have breathed a small sigh of relief after this. The hard-to-see 28...Qc1+!? was quite possibly even stronger when 29.Qxc1 Rxc1+ 30.Rxc1 Bxc1 would have left White in some trouble: for instance, 31.Nxf6 *(31.Kxc1 Rxh5* leaves White unable to save his kingside too*)* 31...Kxf6 32.Kxc1 Kxf5 33.a3 b3 34.Kd2 Rxh4 35.Kc3 Kf4 when it's not clear

that the first player will be able to hold.]

29.Bc4 Qxc4!

[Returning the exchange to regain some pawns and maintain the initiative. Instead 29...Rd4!? 30.Qxa4 Rxd3! *(30...Rxc4? 31.dxc4 Qxc4 32.a3* shouldn't give Black quite enough for two pawns in the endgame after *b3 33.Qxc4 Rxc4)* 31.Qxb4+ Qd6 32.Qxd6+ Rxd6 33.b3 Rcd8 might give White three pawns for the exchange, but once the black rooks invade that number will quickly fall, so perhaps this was a valid alternative.]

30.dxc4 Rxd1+ 31.Rxd1 Rxc4 32.g4

[Radical, but what else to do, seeing that 32.g3 b3! 33.axb3 axb3 would have left both the white rook and knight unable to achieve anything positive.]

32...Rxg4?

[Allowing a tactic. Dubov would have maintained some advantage against his illustrious opponent with 32...b3! 33.axb3 axb3 when White might be a pawn up, but can hardly move and is just in some trouble: for example, 34.Nxf6 *(34.Rg1 Rd4 35.g5* walks into *fxg5 36.hxg5 Bxg5!* , continuing to exploit White's vulnerable back rank*)* 34...Kxf6 35.g5+ Kxf5 36.gxh6 Rxh4 37.Kc1 Rxh6 when Black must have decent winning chances, such as after 38.Rd3 Rh1+ 39.Kd2 Rh2+ 40.Kc3 e4 41.Rd8 Rh3+ .]

33.Rd7+! Kf8

[Black must acquiesce to the repetition, since 33...Kxd7? 34.Nxf6+ Kd6 35.Nxg4 would have seen the knight returning from the rim with some effect.]

7...h5 8.g5
[A couple of weeks before Kurnosov had faced 8.Bg5 hxg4 9.Nd5 which secures White a grip on d5, but after Bxf5 10.Bxf6 gxf6 11.exf5 Bh6 12.c3 *(12.Qxg4? Qa5+ 13.Nc3 Nc6* can only favour Black*)* 12...Bg5 13.Qa4+ *(*or *13.Qxg4 Rh4 14.Qe2 Nc6 15.Bg2 Kf8* followed by ...Ne7 with rough equality*)* 13...Kf8 14.Bg2 Rh4 15.Rd1 Nc6 White's compensation for his pawn was beginning to look insufficient in Bezgodov-Kurnosov, Tyumen 2012.]
8...Nxe4 A standard idea in such positions. Black's strong centre will compensate for the gashes in his kingside. **9.Nxg7+ Bxg7 10.Nxe4 d5 11.Ng3**
[Sending the knight over to the kingside must be critical. Instead 11.Nc3 Be6 12.Bg2 e4! may well already even favour Black.]
11...Bg4
[Kurnosov elects to save his h-pawn. One of my fellow columnists has tried gambiting it, but after 11...Nc6?! 12.Nxh5 Rxh5 13.Qxh5 Nd4 14.Bd3 e4 15.c3 Nf3+ 16.Kf1 Bf5 I'm not totally convinced by Black's compensation for the exchange, even if in practice his chances must be quite dangerous. The machine approves of the game continuation 17.Be2 Qd7 18.Bxf3 exf3 19.Qxf3 Be4 20.Qe3 Kf8 21.f3 Qh3+ 22.Kf2 Qh4+ , but then points out that in Meister-Scherbakov, Moscow 1991, White should have gone 23.Kg1 *(23.Kg2 Qg4+* was agreed drawn in the game *)* 23...Re8!? *(23...Bf5 24.Qf2 Qh3 25.Be3 Be5 26.Rd1* looks insufficient too*)* 24.fxe4 Rxe4 25.Qf3 when, perhaps surprisingly, there's nothing good for Black.]
12.Be2 Nc6!?
[Only now does Kurnosov elect to give up h5. The text appears to be a novelty and deviates from 12...Qa5+ 13.c3 Bxe2 14.Qxe2 e4 15.0-0 Qa6 16.Qxa6 Nxa6 17.f3! which saw the position opening to White's advantage in Malisauskas-Kulon, Koszalin 2009.]
13.Nxh5
[White can also win a pawn with

13.Bxg4 hxg4 14.Nf5 Qd7!? 15.Qxg4 Bf8 , but Black's strong centre undoubtedly supplies reasonable compensation.]

13...Bxh5 14.Bxh5 e4! It's time to get those pawns rolling. **15.h4 d4**

[Consistent and strong. Kurnosov may also have considered 15...Nb4?! , trying to exploit the bishop on h5, but after 16.Bg4 Qc7 17.c3! Nd3+ *(*and not *17...Bxc3+? 18.bxc3 Qxc3+ 19.Bd2 Nc2+ 20.Kf1 Qxa1 21.Qxa1 Nxa1 22.Bc3)* 18.Kf1 Qb6 19.Qe2 Black may not have quite enough for his pawn.]

16.Qe2 Kf8! The king needed to get off the e-file and it certainly makes sense to retain the king's rook on its start square to press down the h-file. At this stage Black has pretty reasonable compensation from what I can see.

17.Bg4 Qd5 18.Rh3?!

[18.Kf1 would have been a better try, but in any case it's clear that White's position isn't at all easy to handle at such a quick time limit, even for a genius like Svidler.]

18...d3

[Tempting and far from bad, but preparing the advance with 18...Ne5! would have been pretty strong: for example, 19.Qd1 *(*or *19.f3 e3 20.Kf1 Ng6* and White can scarcely move *)* 19...d3 20.cxd3 exd3 21.Bf3 Qe6 22.Bg2 Nf3+ 23.Kf1 Qe2+! 24.Qxe2 dxe2+ 25.Kxe2 Ng1+ and Black wins the exchange.]

19.cxd3 Nd4?

[And this definitely asks too much. Black had to settle for 19...exd3 20.Qxd3 Qxd3 21.Rxd3 Rxh4 , retaining at least full compensation for the pawn, such as after 22.Bf3 Ne5 23.Rb3 Nxf3+ 24.Rxf3 Rh1+ 25.Kd2 Rd8+ .]

20.Qd1 exd3 21.Kf1! White is just in time to prevent Black's queen and knight from invading with devastating effect. **21...Nc2 22.Rb1 Re8 23.Bd2 Qxa2** A sign that things have gone wrong, but what else could Black do with White having untangled his queenside and kept control on the kingside? **24.h5**

[24.Bf5! Bxb2 25.Bxd3 Nd4 26.Qg4 would have been pretty strong, but Svidler's choice also leaves White very much in the driving seat.]

24...Bxb2 25.Rxd3 Qc4 The only real way to scare White... **26.Be2?** ...and it works.

[Without much time it certainly wasn't easy to find either 26.Bf5 Nd4 27.Qg4!]

[or 26.Ba5! Ne3+ 27.fxe3 Rxe3 28.Qd2! Rxd3 29.Qb4+ when White should win.]

26...Rxh5! 27.Kg1

[The machine believes that White is OK after 27.Bxh5 Qxd3+ 28.Kg2 Ba3 29.Rxb7 , but with so many loose pieces I certainly can't blame Svidler for steering clear.]

27...Be5?

[Tempting, but misguided. It seems that Black should either have settled for the simple 27...Bd4 (when 28.Rxd4 Qxe2 29.Qxe2 Rxe2 30.Rd8+ Re8 31.Rxe8+ Kxe8 32.Rxb7 is likely to finish in a draw),]

[or 27...Rxe2! 28.Qxe2 Qh4 when 29.Rd8+ Kg7 30.Qf3 Qh2+ 31.Kf1 Qh1+ 32.Ke2 Nd4+ 33.Rxd4 Qxf3+ 34.Kxf3 Bxd4 35.Rxb7 again results in a level ending.]

28.Bxh5 Qxd3 29.Rxb7?

[Now Black is OK, but as we've remarked this is not a position to play without much time. Stronger would have been 29.g6 , and if Rd8 30.Bh6+ Bg7 31.Qxd3 Rxd3 32.Bxg7+ Kxg7 33.Rxb7 with some winning chances.]

29...Re7??

[And neither is the position so easy for Black to handle. Here 29...Qh3! 30.Rxf7+ Kg8 would have forced 31.Qf3 when Bh2+ 32.Kh1 Bg3+ repeats moves.]

30.Qg4??

[One dear. Not only does Svidler blunder material, but he misses 30.g6! which would by now have been devastating, since there's no good defence to the check on h6 even if Black can save his queen.]

30...Qxd2 31.Qc8+ Kg7 32.Rxe7

The point of White's 'combination', but there is a nasty sting in the tail...

32...Qe1+?

[... which Kurnosov fails to find. After the text neither player can prevent a highly entertaining game from finishing in a draw, but 32...Qc1+! 33.Kg2 Ne1+ would have won the white queen and the game.]

33.Kg2 Qe4+ 34.Kg1 Qe1+ 35.Kg2 Qe4+ 36.Kg1 Qe1+

ETCC 2011 Porto Carras (5.1) 07.11.11
[Jones, Gawain]

1.e4 c5 2.Nf3 Nc6 3.Nc3 g6 4.d4 cxd4 5.Nxd4 Bg7 6.Be3 Nf6 7.Bc4 d6 8.f3 Bd7 9.Qd2 Qc7!? Earlier this year we saw Ivanchuk play the Chinese Dragon at Gibraltar. Now he repeats the Dragon in this very important match between the top two seeds. This is a very offbeat line. Ivanchuk delays castling and focuses on picking on White's light square bishop.

[Instead 9...0-0 10.0-0-0 Qc7 is fairly similar and I've actually had quite a detailed look at these lines in recent months, most recently in Jones, G (2595)-Jianu, V(2545) Ennis Open 2011. That continued 11.Bb3 Na5 12.h4

A) Instead a subscriber Michael Brown asked me a question concerning the line 12...Rfc8 13.h5 Nxb3+ 14.axb3 which I didn't cover in my notes to Kekelidze-Gorman earlier this year, instead looking at the other two captures. He writes: " However there is no mention of 14. axb3 which appears alright to me as taking with 14...Nxh5 looks incredible risky for Black. The best I could find for Black was 14... Qa5 15.Kb1 e5 15.N(d)e2 Rc6 but 16. Nd5 looks like a pleasant endgame for White and not what a Dragon player is looking for. As Gawain does not mention 14. axb3 am I overlooking something obviously wrong with it? It would appear to be important for the line because Gawain's annotations to this game and his own against Jianu annotated in June put 13...Nc4 under a cloud as he says". I apologise for the delay in replying, a very busy few months playing, but will see what I can do. My first thought was that

A1) I agree 14...Nxh5?! looks very suspicious when White can continue either with 15. g4 or 15.Nd5 Qd8 16.Bg5 Nf6 17.Nxf6+ exf6 18.Bh6 when Black's position looks really ugly.;

A2) 14...Qa5 15.Kb1 e5 *(15...gxh5* is a rather ugly suggestion of the computer's.*)* 16.Nde2 Rc6 17.Nd5 was the line given by Michael which is indeed a little better for White, although maybe not as bad as all that for Black. *(17.h6!? Ra6! 18.Na4 Bf8* allows Black to prevent that bishop being entombed on h8.*)* 17...Qxd2 18.Nxf6+ Bxf6 19.Rxd2 Be7 20.g4 g5 21.Nc3 Be6 allows Black to grovel on.;

A3) 14...a5 15.hxg6 fxg6

A3a) 16.Ndb5 looks critical here Qd8 *(16...Bxb5 17.Nxb5 Qc6 18.Na7! Rxa7 19.Bxa7 b6 20.e5! Nd7 21.exd6 exd6 22.Qd5+ Qxd5 23.Rxd5 Ra8 24.Bxb6 Nxb6 25.Rxd6* and the rook and two look stronger than the bishop and knight.*)* 17.Kb1 Qf8 with quite a complex position but White should have an edge.;

A3b) 16.Rh4 a4 17.bxa4

Bxa4 would in fact transpose to a position from Roubaud, D-Calvo, R (2193) ICCF email 2009, seen in the Kekelidze-Gorman notes via the move order 11... Na5 12.h4 Nxb3 but White of course has alternatives to 16.Rh4. Perhaps the best solution is to play the 11...Na5 move order if Black wishes to continue to play this line, or perhaps switch to Chucky's 9...Qc7!?;

B) 12...Nc4 13.Bxc4 Qxc4 14.h5 when it seems that Black has some problems.]

10.Bb3

[10.Ncb5 would try to exploit Black's move order but the knight will be forced back again and Qb8 *(or even 10...Qc8!? are probably ok.)*]

10...Na5

[10...a6 has been tried a few times but now the position resembles a Dragadorf.]

11.g4 This is logical but of course White has a few different paths here, and if Ivanchuk's idea catches on, I'm sure we'll see White try out other eleventh moves.

[11.0-0-0]

[11.h4]

[11.Bh6!?]

[and even 11.0-0!? could be tried.]

11...Nc4 12.Bxc4 Qxc4 13.0-0-0 Svidler decides it's time to castle.

13...0-0 And so does Ivanchuk. The computer is fairly happy with these positions but it strikes me as much easier for White to play. His plan is simply Bh6, h4-h5 and opening up the Black king while it's not so easy for Black to find good counter-chances. In fact we've now transposed to a position seen a few times before (with earlier castling).

[A previous game to reach this position continued with 13...b5?! Afek, Y (2349)-Plukkel, S Soest 2000 but this allows White to win a pawn with 14.b3!]

14.Bh6

[Afek has also been on the Black side of this position. A game of his continued 14.h4 b5 *(14...Rac8* would prevent b3 ideas and might be more circumspect. *)*

A) 15.b3! is critical Qb4 *(15...Qc8 16.Ndxb5 Qb7 17.Nd4 a5 18.a4* doesn't really look like sufficient compensation but these positions are always tricky for White to play.*)* 16.h5 *(16.Ncxb5* is still possible although *Qxd2+ 17.Rxd2 e5* wins the piece. White grabs three pawns and the position after *18.Nxd6 exd4 19.Bxd4 Bc6* is far from clear.*)* 16...Qa5 17.Kb1 and White's attack looks more threatening. *(*Instead *17.Ncxb5 Qxa2 18.c4 Qa1+ 19.Kc2 Qa2+ 20.Kd3 Qxd2+ 21.Kxd2 e5 22.Nc2 Bxb5 23.cxb5 Rfb8* looks respectable for Black. *)*;

B) 15.Kb1 b4 16.Nce2 a5 Black seems to be doing quite well here, as the game showed. 17.h5 a4 18.hxg6 fxg6 19.Bh6 Bxh6 20.Qxh6 Rf7 21.g5 Nh5 22.Rxh5 gxh5 23.g6 hxg6 24.Nf4 Rh7 25.Qg5 Qf7 26.Nd5 Rf8 And White had little to show for the exchange and pawn deficit. Demagnee, A (2020)-Afek, Y (2324) Paris 2002.]

14...Bxh6 The computer's top choice but

rather dangerous. Ivanchuk hopes that Svidler's queen will be misplaced on h6 but he has to watch out for his king's safety.

[14...b5 is an alternative but 15.Bxg7 Kxg7 16.Kb1 b4 17.Nd5! Nxd5 18.exd5 Kg8 19.h4 Qxd5 20.h5 gives White great compensation for the pawn.]

15.Qxh6 b5 16.Kb1 b4 17.Nd5! Nxd5 18.exd5 Rfe8?! This strikes me as rather slow.

[Maybe Ivanchuk should have gone for 18...Rac8 with the idea of replying to 19.h4 with f6 Initially I thought White's position was more comfortable but maybe Black is just fine here.]

[Meanwhile grabbing the pawn is simply bad. 18...Qxd5?! 19.Nf5 Qe5 20.Rhe1 Qf6 21.Nxe7+ Kh8 22.Nd5 Qxf3 23.h3 followed by 24. Rf1 wins.]

19.h4! Svidler's play is very straightforward while Black struggles to defend. **19...Qxd5**

[Now 19...f6 doesn't tie in so well with Black's last. With purposeful play White can seize a clear advantage 20.h5 g5 21.f4! Qxd5 22.Nf5 Qf7 23.fxg5 Bxf5 24.gxf5 Qf8 25.Rhg1! Kh8 *(25...Qxh6 26.gxh6+ Kh8 27.Rg7* also looks very unpleasant.*)* 26.Qxf8+ Rxf8 27.g6 and I feel Black is probably simply lost.]

20.h5! Qe5 Forced. **21.hxg6 hxg6 22.Nf5!** Energetic play **22...Bxf5**

[22...gxf5? 23.Rh5! rapidly mates.]

23.gxf5 Qg7 24.Qh4 At the cost of a pawn White has a very pleasant initiative while recapturing the pawn isn't going to be difficult. A rather depressing position for Black, and somewhat surprising that Svidler didn't make more of this position.

[24.Qh3! has the same idea as the game while preventing Black from playing ...g6-g5 with gain of tempo. It also has the advantage of Qh3-e6+ ideas after an exchange on g6. Rac8 25.Rdg1! *(25.Rh2 e6 26.fxg6 fxg6 27.Rxd6* is also very pleasant.*)* 25...Kf8 26.Rg4 e6 27.fxg6 fxg6 28.Rh4! winning heavy material.]

24...Rac8 25.Rh2

[25.fxg6 fxg6 26.Qxb4 was also possible but Svidler is going for more.]

25...g5 26.Qg4 e6 27.fxe6

[It's not yet time for 27.Rdh1 exf5 28.Qxf5 as Black has Qe5! with back rank mating threats and following 29.Rh8+ Qxh8 30.Rxh8+ Kxh8 he probably has no more than a draw.]

27...Rxe6 28.Qxb4

[Maybe it's more accurate to throw in 28.Rh5 Rc5 before reclaiming the pawn 29.Qxb4 when again Black has a difficult defensive task in store.]

28...Qe5 29.Rdh1

[29.Rh5!? could still be considered.]

29...a5! 30.Qd2 White's queen is forced to return to this slightly more passive square to prevent the back rank mate threat. **30...Rc5** Ivanchuk has at least managed to activate his pieces but with the Black king so vulnerable White still has an edge. **31.a4 Kf8 32.Qd3 Qf5**

[32...Qf4!? might be a more stubborn defence. The point is that 33.Qb3 can be met by Re1+! With every exchange the Black king feels more secure.]

33.Qb3 Kg7 34.Qb8?! Letting Ivanchuk off the hook.

[Instead 34.Rh5! would leave Black

with continuing problems, for example: d5 35.f4! Qxf4 36.Rh7+ Kf8 37.Qb7 Rcc6 38.Rh8+ Kg7 39.Qa8 and it seems unlikely to me that Black's king will survive with all the major pieces chasing it over the open board.]

34...Rh6! Perhaps Peter overlooked this rook deflection. Now White has no better than to accept the draw. **35.Rxh6 Qxc2+ 36.Ka2 Qxa4+** Despite holding onto the draw, Black had some problems, and I don't think it's sufficient to equalise. However the positions are still fertile and I wouldn't be surprised to see some players try and improve on Ivanchuk's play.

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Bd3 e5 7.Nde2 Be7

[Deserving of attention is 7...Be6!? , which was also faced by Peter recently in Svidler,P (2714)-Shankland, S (2709) Saint Louis USA 2021 [Roiz, M]]

8.0-0 0-0 9.Ng3 Bg4 A relatively rare move, that was previously employed by one of the leading Najdorf experts Anish Giri.

[9...Be6 10.Nd5 was seen on our site in a couple of games.]

10.Be2 The best reaction. The Bd3 did its job.

[After 10.Qe1 Nbd7 11.h3 Be6 12.Be3 b5⇄ Black was doing well in Mikus,T - Sabik,R Slovakia 2013]

10...Be6

[The bishop's trade clearly favors White: 10...Bxe2?! 11.Qxe2 Nc6 12.Rd1±]

11.Nd5 As after 9... Be6, White mostly relies on his pawn majority on the q-side.

[The quieter 11.Be3 is traditionally met by g6 12.Qd2 *(*After *12.a4* White scored a victory in Karjakin,S - Giri,A Riga 2019 However, it looks like after *d5 13.exd5 Nxd5 14.Nxd5 Bxd5 15.Bf3 Bxf3 16.Qxf3 Nc6* Black is close to full equality.*)* 12...d5! 13.exd5 Nxd5 14.Bh6 Re8 This position has been tested in some correspondence games. In my opinion, Black should be able to neutralize the temporary activity of White's pieces. For instance, 15.Bf3 Nxc3 16.Qxc3 Nc6 17.Rad1 Qc7= 1/2 (26) Casser, A (1557)-Martinez,J (1430) IECG email 2006]

11...Nxd5 12.exd5 Bc8 The position is closed, so Black can afford to move the bishop to its initial spot. **13.f4** Peter comes up with a natural novelty.

[In the only preceding game White didn't manage to demonstrate any superiority: 13.c4 f5 14.Qc2 Qc7

15.Bd2 a5= Costa,L - Pikalow,M Willingen 2020]

13...Nd7

[The immediate 13...f5!? comes into consideration, too.]

14.Kh1 This feels rather slow.

[Seemingly, 14.f5!? would be a more challenging choice. Black's position looks somewhat cramped in this case, but after something like Bg5 15.Ne4 Bxc1 16.Qxc1 Nf6 17.Nxf6+ Qxf6 18.c4 Bd7 19.b4 e4⇄ the situation remains unclear.]

14...f5! This decent move makes the location of the Ng3 quite awkward. **15.a4** GM Svidler reasonably decides to grab some space on the q-side.

[After 15.fxe5 Nxe5 16.Nh5 Bd7 17.Nf4 Qc8⇄ Black can cope with the weak e6 spot.]

15...g6 Alexander also has some useful moves to make before releasing the pressure in the centre. **16.a5 Bf6** Black has reached a harmonious setup. Obviously, all his problems are solved.

17.c4 Bg7

[17...Re8!?]

18.b4!? A brave decision by GM Svidler!

[After the safer 18.Ra3 b6 19.Bd2 Rb8 20.b4 a dynamic balance would have been kept.]

18...h5

[GM Donchenko naturally deviates from the 'greedy' 18...exf4 19.Bxf4 Bxa1 20.Qxa1 Qf6 21.Qc1 , and White's full compensation for an exchange is undeniable.]

19.Bxh5! This decent sacrifice... was practically forced!

[In case of 19.Re1?! Qh4!↑ the lack of harmony causes White lots of problems.]

19...gxh5 20.Nxh5 Nearly all of White's pieces are ready to join the attack. Therefore, Black has to act very precisely. **20...e4** A double-edged continuation. The Pe4 is strong, but now the long diagonal is very exposed.

[Possible was 20...Rf7!? 21.Bb2 Nf6 22.Nxg7 Rxg7 23.fxe5 dxe5 24.Bxe5⇄ with double-edged play.]

21.Nxg7 It was very tempting to liquidate the main defender of his opponent's king.

[There was a decent alternative at Peter's disposal: 21.Ra3!? Nf6 22.Rg3 Nxh5 23.Qxh5 Qf6 The only move! , and here White can at least force a draw with 24.Rg6 Qc3 25.Rg3 Qf6 26.Rg6=]

21...Kxg7 22.Bb2+? Too straightforward.

[The aggressive 22.g4! would have forced GM Donchenko to act creatively: Qh4! 23.g5 Kg6 24.c5 Ne5! 25.fxe5 dxe5 In this sharp and unbalanced position the chances are mutual.]

22...Nf6 23.Ra3 Rh8 Now Black's play is much easier. **24.c5** White is reasonably aiming for complications.

[After 24.Rg3+ Kf7 25.Rg5 Bd7 26.Re1 Qe7 White doesn't have sufficient compensation for a piece.]

24...Bd7 25.Qd4 Kf7 26.Rc1 Rc8 27.Rac3?

[Better was 27.Rg3 Qe7 28.Rg5 , but even then White is in trouble.]

27...dxc5

[Good enough was also 27...Ng4! 28.h3 Qf6 29.R3c2 Ba4-+]

28.Rxc5 Rh6?! There was no reason for such prophylactics.

[Black should be able to convert his material advantage into a full point after 28...Rxc5 29.Rxc5 e3 30.d6

Re8-+]
29.d6 Qh8
[29...Rxc5! 30.Rxc5 Qg8 would have still put White under strong pressure.]
30.Kg1 The only defence. **30...Rxc5 31.Rxc5 Qe8** Black's king is safe now - White just doesn't have enough pieces left. **32.Re5 Be6 33.Rc5 Bd7?** Luckily for Peter, his lower-rated opponent decides to call it a day.
[Had Alexander played 33...Kf8! 34.h3 Bd7 35.Re5 Qh5 it would be very difficult for White to secure his king as 36. ..Rg6 is coming next.]

1.e4 e6 2.d4 d5 3.Nc3 Nf6 4.e5 Nfd7 5.f4 c5 6.Nf3 Nc6 7.Be3 a6 8.Qd2 b5 The starting position for the variation: White has set up a stable centre, is pushing for an advantage in space and would like to start a kingsde attack as quickly as possible with f4-f5. With the moves a7-a6 and b7-b5 Black has delayed his development in order, for his part, to achieve an initiative on the queenside. Should White now stereotypically go for queenside castling, Black's attack would immediately become very dangerous with b5-b4 and c5-c4. White now has several possible ways in which to interpret the position. Die Ausgangsstellung der Variante: Weiß hat ein stabiles Zentrum errichtet, pocht auf Raumvorteil und möchte möglichst rasch mittels f4-f5 zum Königsangriff übergehen. Schwarz hat mit den Zügen a7-a6 und b7-b5 die Entwicklung zurückgestellt, um seinerseits am Damenflügel eine Initiative zu erreichen. Sollte Weiß nun schablonenhaft zur langen Rochade greifen, würde der schwarze Angriff mittels b5-b4 und c5-c4 bereits brandgefährlich werden. Weiß verfügt nun über verschiedene Möglichkeiten, die Position zu interpretieren. **9.Bd3** Black has two logical continuations: Schwarz hat zwei logische Fortsetzungen:
[9.dxc5 Bxc5 10.Bd3 For some time this was considered to be the critical option, based on the following idea: dies wurde eine Zeit lang als kritische Möglichkeit angesehen, basierend auf folgender Idee: Qb6 *(10...d4?* fails to scheitert an *11.Nxd4 Nxd4 12.Ne4± Qh4+ 13.Bf2 Qg4 14.Bxd4 Bxd4 15.Nd6+ Ke7 16.Be4 Bxb2 17.Rb1 Ba3 18.Bxa8 Bc5 19.Bf3 Qg6 20.Ne4 Rd8 21.Rd1 Bb6 22.Qb4+* 1-0 Karjakin,S (2782)-Topalov,V (2784)/Kiev 2013/CBM 154 Extra *)* 11.Bf2! White is hoping to reach a favourable endgame in which Black would suffer from the typical weakness of the French bishop on c8; see for example Giri's model game. Weiß hofft darauf, ein günstiges Endspiel zu erreichen, in dem Schwarz an der typischen Schwäche des Französischen Läufers auf c8 laborieren wird; siehe beispielhaft die Musterpartie Giri's.

He will play ♘c3-e2 and then ♘e2-d4 (or f3-d4) and fix the weak pawns on the queenside with b2-b4. After that he can break through on the queenside (a3-a4) or on the kingside (f4-f5). Dieser Stellungstyp gilt als deutlich besser für Weiß. Er wird Sc3-e2 nebst Se2-d4 (oder f3-d4) spielen und mit b2-b4 die schwachen Bauern am Damenflügel fixieren. Danach kann er am Damenflügel (a3-a4) oder am Königsflügel (f4-f5) durchbrechen. B) 11...h6! This move has led to a fresh evaluation of the variation (after 9.dxc5). On one hand, Black removes from the position a potential sacrifice on h7 (0-0) and on the other he prepares to inject some dynamism into the static and bad position (like in the Giri-Fier-game) by means of g7-g5. Since Black's results in this line were satisfactory, White sought out new ways and tried with the move 9. ♗d3 (see main game) to entice Black into an unfavourable transposition of moves. Dieser Zug hat zu einer Neubewertung der Variante (nach 9. dxc5) geführt. Schwarz nimmt zum einen potenzielle Opfer auf h7 (nach 0-0) aus der Stellung und bereitet sich zum anderen darauf vor, die statisch schlechte Stellung (wie in der Giri-Fier-Partie) mittels g7-g5 zu dynamisieren. Da die Ergebnisse des Nachziehenden in diesem Abspiel zufriedenstellend waren, hat Weiß nach neuen Wegen gesucht und mit dem Zug 9. 11.Be2 Now Black has to make haste: if White could(e.g.by means of b2-b3) fix the structure on the queenside, Whte's advantage would again be obvious. Black's initiative would be deadlocked whilst White can, sooner or later, turn to f4-f5. Nun muss sich Schwarz beeilen: Könnte Weiß (z.B. mittels b2-b3) die Struktur am Damenflügel festlegen, läge der weiße Vorteil wieder auf der Hand: Die schwarze Initiative wäre festgefahren, während Weiß über kurz oder lang zu f4-f5 greifen kann. **11...c3!** is therefore the only logical choice. ist daher die einzig logische Wahl **12.Qc1!?** The idea linked to this move was previously played only once: in what follows White does not only concentrate on his kingside play, but he would also like to challenge Black's plan of delayed development by taking aim at the far advanced queenside.. die mit diesem Zug verbundene Idee wurde zuvor erst einmal gespielt: Weiß konzentriert sich in der Folge nicht alleine auf sein Spiel am Königsflügel, sondern möchte das schwarze Konzept einer verzögerten Entwicklung auch dadurch in Frage stellen, dass er den aufgerückten Damenflügel ins Visier nimmt.

12.Be2 Na5 13.Qb1 Rc8?! The ♙c3 is not really hanging, therefore Black could make a more useful move.

[13...Bc6 14.0-0 Bd6 is okay for Black. Now the careless 15.Bh6?? would lose on the spot to Bxf3 16.Bxf3 Qh4]

14.0-0 f6?! A standard way of restricting White's knight, but in this particular case Black spends an important tempo which could be used for development.

1.Nf3 c5 2.e4 d6 3.Bb5+ Nd7 4.0-0 a6 5.Bd3 Ngf6 6.Re1 b5 7.c4 Rb8 A new move for us. In the Archives, Dave has looked at 7...g5 a lot, and 7...bxc4 and 7...Ne5 a bit. **8.cxb5** This seems critical. We will examine the alternatives in the next game. **8...axb5 9.a3** Svidler departs from the praxis of his grandmaster colleagues.

[9.a4 bxa4 10.Nc3 e6 11.Bb5 Be7 12.e5 was S. Haslinger - L.Vereggen, Delft 2015 (1-0 in 49). Now Black got a worse position after 12...Ng4, but after dxe5! 13.Nxe5 Bb7 he has no problems *(*Or *13...Rxb5!? 14.Nxb5 Nxe5 15.Rxe5 0-0* with full compensation for the exchange *)*]

[9.Bc2 e5 10.b4 Be7 11.bxc5 dxc5 12.a4 was the energetic continuation of M.Illingworth -G.Havasi, Budapest 2014 (1-0 in 30). Black would have his full share of the chances after b4]

9...Ne5 True to form, MVL goes for the most dynamic choice.

[9...e5 10.b4± is better for White]

[9...e6 10.Nc3 b4 11.axb4 cxb4 12.Na4 is fine for Black according to the engines, though I think White has easier play after 13.Bc2 and 14.d4.]

10.Nxe5

[10.Be2 Nxf3+ 11.Bxf3 e5 is very comfortable for Black, since after 12.b4 Be7 trading a pair of knights compares favourably with the note to 9... e5.]

10...dxe5 This is a tough position to evaluate. In many lines (such as in the game), Black sacrifices a pawn on the queenside, relying on his central control and active pieces. White certainly has some work to do in order to mobilise his queenside. **11.Qe2** The critical try, attacking b5. **11...Ba6**

[11...c4 is another reasonable way to sacrifice a pawn. After 12.Bc2 e6 13.d3 Bc5! Black seems to have decent compensation in all lines. Note that 14.dxc4 bxc4 15.Ba4+ Ke7 doesn't really inconvenience Black since his king is safe on e7 (there is no possibility of White opening the centre given Black's doubled e-pawns) and the rook can be brought to d8.]

12.b4! Fixing b5 and pressurising c5. Of course ...cxb4 is impossible, now or over the next several moves, since the Ba6 would hang. **12...e6 13.Nc3 Nd7!** A very accurate move.

[13...Be7? 14.bxc5± threatens 15.a4 and destroys Black's construction.]

14.Nxb5

[14.Bxb5 Bxb5 15.Nxb5 allows cxb4=]

14...Be7

[14...Qb6 is also possible. 15.bxc5 *(15.Nc7+ Qxc7 16.Bxa6 cxb4=)* 15...Nxc5 16.a4 Nxd3 17.Qxd3 Bc5 18.Qg3! gives chances of an edge, in view of 0-0? *(18...Bxb5 19.axb5 0-0 20.Rb1* looks like a fortress, but perhaps White can play on*)* 19.d4! and Bh6.]

15.Bc4

[15.Bb2 0-0 looks similar to the game.]

15...0-0 16.bxc5 Nxc5 Possibly inaccurate. 15.Bc4 was directed against this, since Black doesn't win a tempo now.

[16...Bxc5 17.a4 Nb6= and Black is

likely to regain the pawn.]
17.a4 Qd7 18.Ba3 Rfc8 19.Reb1± Now White has consolidated, although further progress is extremely difficult. Maybe this is a positional draw but I would recommend the alternative at Black's 16th move. **19...Bd8 20.Bxc5 Rxc5 21.d3 g6 22.g3 Be7 23.Rd1 Bxb5 24.Bxb5 Qc7=** Now I'm confident in declaring this a safe position. With queens and rooks the drawing tendencies of opposite coloured bishops diminish, but Black has no problems (despite his pawn deficit) since his pieces are active and his king is so safe. Once the bishop arrives on the a7-g1 diagonal the a-pawn isn't a threat and White has no active plans. **25.Bc4 Qa5 26.Qc2 Rcc8 27.Kg2 Bc5 28.Rab1 Bd4 29.Rxb8 Rxb8 30.Bb5 Kg7 31.Qd2 Bc3 32.Qc2 Bd4 33.Qd2 Bc3 34.Qc2** The world no.2 has some of the most interesting preparation against 1.e4 at the moment, and this game (and the ideas underlying it, as I've hopefully explained) will likely open a new chapter in the trendy 7.c4 line.

1.c4 c5 2.Nf3 Nc6 3.Nc3 g6 4.e3 Nf6 5.d4 cxd4 6.exd4 d5 7.cxd5 Nxd5 8.Qb3 Nxc3 Overall, this is Black's most common move in the database, although in recent Updates, we have focussed more on the topical alternative:
[8...e6 9.Bb5 Bg7 - see Giri-Mamedyarov and earlier games in the Archives.]
9.Bc4 e6 Black's other choice here is:
[9...Nd5 10.Bxd5 e6 11.Bxc6+ bxc6 12.0-0 which is covered in several games in the Archives, most recently Predojevic-Lovik]
10.bxc3 Bd7 This idea has held up well for Black in recent games. Black intends to push White's queen back and contest the queenside light squares with ...Nc6-a5 and ...Ra8-c8. Instead:
[10...Bg7 11.Ba3 Forcing Black to castle by hand. Now Bf8 12.Bxf8 Kxf8 13.0-0 Kg7 14.Qb5 Qc7 15.Be2 Rd8 16.Rfd1 b6 17.c4 Ne7 18.Qb2 is Aronian-Stevic in the Archives. White has a slight edge due to his space advantage and Black's tender dark squares.]
11.Bb5!? Svidler thought for 10 minutes over this move, which indicates it may have been an over-the-board invention, but in provoking 11...a6, it contains a very clever idea. White has also played two other bishop moves:
[11.Bd3 Na5 and now:
A) 12.Qb1 Bg7 13.Ba3 Bf8 *(13...Bc6!? is a possible improvement, since Black still has time to play ... Bg7-f8 on a subsequent move.)* 14.Bb4 Bxb4 15.Qxb4 b6 16.h4 Qe7 17.h5 Nc6 18.Qxe7+ *(18.Qb2 playing the middlegame, also gives White a pleasant position.)* 18...Kxe7 19.Kd2 with a space advantage for White in this endgame,Bruzon Batista,L (2653)-Robson,R (2682) Saint Louis 2018 1-0 (77);
B) 12.Qc2 Bg7 13.0-0 0-0 14.Bf4

Rc8 with the dark-squared bishops on the board, Black is fine here. 15.Ne5 Nc6 16.Nxd7 Qxd7 17.Qe2 Rfe8 18.Rfd1 e5! and Black is for choice, Fridman,D (2640)-Dubov,D (2666) Tbilisi 2017 1/2-1/2 (39)]

[11.Be2 Na5 when White has played:

A) 12.Qb1 Rc8 13.0-0 Bg7 14.Ba3 Bf8 15.Bb4 Other than trading bishops on the f8-square, this is the only way to resolve the repetition of bishop moves. *(15.Bxf8 Kxf8* doesn't work as well for White as in Aronian-Stevic (see the note to Black's 10th move above) line since Black is covering the c4-square*)* 15...Bxb4 16.cxb4 *(16.Qxb4* can be answered by *b6* followed by ...Qd8-e7, but this was likely a better try for White*)* 16...Nc6 17.b5 Ne7 18.Ne5 0-0 19.Bf3 b6 20.Qb4 f6 21.Nd3 Be8 with a balanced position, Ding,L (2791)-So,W (2778) Stavanger (blitz) 2018 0-1 (36);

B) 12.Qc2 Bg7 13.Ba3 Bf8 14.Bb2 In this game from the Candidates, White just went straight for the draw. Bg7 15.Ba3 Bf8 16.Bb2 Bg7 17.Ba3 1/2-1/2 (17) Aronian,L (2794)-So,W (2799) Berlin 2018]

11...a6 Black kicks the b5-bishop and then plays by analogy with the previous notes. It was likely better to instead go for:

[11...Bg7 12.Ba3 Ne7!? and Black should be able to complete development without big worries.]

12.Be2 An earlier game saw:

[12.Bxc6 (White can't hope for much after this concession) Bxc6 13.0-0 Pogosian,G (2201)-Shushpanov,V (2364) Soukhumi 2007 0-1 (31), and now Black should be at least fine after Bg7 14.Ba3 Bxf3 15.gxf3 Bf8 etc.]

12...Na5 13.Qb1 Rc8 14.0-0 f6 This is already an awkward move to make, loosening the king's cover. Alternatives:

[14...Bg7 15.Ba3 Bf8 16.Bb4 Bxb4 17.Qxb4 and this is where we see the great point of Svidler's idea. Compared to similar lines without ...a7-a6 inserted (see notes to White's 11th move above), Black cannot here play b6? because the a6-pawn is hanging!]

[14...Qc7 15.Ne5 Bg7 16.Bf4 gives White a slight initiative]

[14...Rxc3? is too dangerous, since after 15.Bb2 White opens up the a1-h8 diagonal]

15.c4 b6 16.c5! Energetic play, opening the position up while Black's king is still in the centre. **16...bxc5 17.dxc5 Bxc5 18.Bxa6 Rb8 19.Qc2 Qb6 20.Bd3 Ke7?!** The king ends up being seriously exposed here. Instead:

[20...Kf7 would give the king a better chance of safety, and limit White's edge]

21.Bf4 Or:

[21.Bb2! Rhc8 22.Rab1 Qd6 23.Qd2 and the queen penetrates via the h6-square]

21...Bd6? Black tries to simplify, but the trade of bishops further opens up the dark squares around Black's king.

[21...Rbc8 was more tenacious.]

22.Bxd6+ Qxd6 23.Rfd1 White has huge pressure against Black's huddled pieces. **23...Qb6 24.Rab1 Qa7 25.Qd2 Ba4** Here:

[25...Kf7 running with the king, was

more resilient. After, for example 26.Rxb8 Rxb8 27.Qh6 Kg8 28.Bxg6 Bc6 *(28...hxg6 29.Qxg6+* is hopeless for Black*)* 29.Bh5 White is a pawn up with ongoing play against Black exposed king.]

26.Rxb8 Rxb8 27.Qh6 Rf8

[27...Bxd1 28.Qxh7+ picks up the a7-queen]

28.Rc1 Rf7 29.Qf4 Nc6 30.Be4 g5 31.Qd2 Qb6 32.Qc3 Kd7 33.Qd3+ Kc7 Or:

[33...Ke7 34.Qc3 Kd7 35.Qa3 and Black won't survive for long]

34.Qc4 White picks up a pawn, and Black is hopelessly lost after

[34.Qc4 Bb5 35.Qxe6 Rd7 36.h3 and Black's kingside pawns will drop off.]

1.c4 c5 2.Nf3 Nf6 3.Nc3 d5 4.cxd5 Nxd5 5.e4 Nb4 6.Bc4 Nd3+ 7.Ke2 Nf4+ A sharp alternative is:

[7...Nxc1+ 8.Rxc1 a6 9.d4 b5 10.Bd5 Ra7 and now:

A) 11.dxc5 e6 12.c6 b4 13.Qd4 Rc7?! *(13...Qe7!* should be tried, with a very unclear outcome*)* 14.Na4 exd5 15.exd5 Be7 16.Qxg7 Bf6 17.Qh6 Re7+ 18.Kf1 Qxd5?! *(18...Be5 19.Nxe5 Qxd5* is a better try*)* 19.Qxf6 Rg8 20.h3 *(20.g3!* is a quicker way to consolidate*)* 20...Re6 21.Qf4 and White is much better but later let Black off the hook, Giri,A (2773)-Harikrishna,P (2766) Wijk aan Zee 2017 1/2-1/2 (36);

B) 11.Ne5 e6 12.Bc6+ Ke7 13.Qd2 f6 14.Nd5+ exd5 15.Rxc5 dxe4 was the wild continuation of Jakovenko-Sutovsky, see the game in the Archives for further details.]

8.Kf1 Ne6 For many years, this was Black's standard move, although a popular alternative these days is:

[8...Nd3 9.Qe2 Nxc1 10.Rxc1 which is covered in Erdos-Svidler and Aronian-So in the Archives.]

9.h4!? White takes pre-emptive action against the fianchetto with ...g7-g6 and so forces Black to find a different development plan. The old main line is:

[9.b4 - see Aronian-Topalov and earlier games in the Archives.]

9...Nd4 10.d3 e6! A key improvement over the game between the same two players from earlier in their World Cup match:

[10...Nbc6 11.Nb5 Be6 *(11...Nxb5 12.Bxb5 Bd7 13.Be3 e6 14.Rc1* worked out well for White in Wang Yue-Salem, in the Archives*)* 12.Bf4 Nxb5 13.Bxb5 Qb6 14.Ba4 Qa6 15.Rc1 b5 16.Bb3 Bxb3 17.Qxb3 e6 18.Be3 gave White strong pressure on the c5-pawn in Svidler,P (2751)-Vachier Lagrave,M (2804) Tbilisi 2017 1/2-1/2 (41). That game was played at the classical time control. Svidler, perhaps unwisely, repeats this line in the main game, played in the rapid playoff portion of the match.]

11.Bf4 The most logical developing move. Now:

[11.Nb5?! is pointless, since after Nxf3 12.Qxf3 when compared to the

previous note, White no longer attacks the f7-square with both bishop and queen, so Black can simply kick the b5-knight away with a6 etc.]

11...a6 Black continues flexibly, denying White a chance to play Nc3-b5 and setting up a Sicilian-style formation where White's king is out of place on the f1-square. Another game saw:

[11...Bd6?! 12.e5 Be7 13.Nxd4 Qxd4 Diermair,A (2450)-Paravyan,D (2506) Moscow 2016 1/2-1/2 (59) , and now 14.Qg4 Kf8 15.Nb5 gives White the initiative since Qxb2? 16.Qd1 traps Black's queen.]

12.Nxd4 cxd4 13.Ne2 Nc6 14.a3 This looks a little slow. Perhaps White should try something like:

[14.Ng3 for example Bd6 *(14...Na5?! 15.Rc1* is good for White, so he didn't need to create a retreat square for the c4-bishop*)* 15.Bxd6 Qxd6 16.Qg4 with chances for both sides.]

14...Bd6 15.Bxd6 Qxd6 16.Qd2 Bd7 17.f4 e5 Black prevents White from playing e4-e5, even though this gives the c4-bishop more scope.

[17...0-0-0 18.e5 Qe7 19.b4 f6 was also quite good for Black, since White's king is likely to become more exposed than its counterpart.]

18.f5 g6 19.Ng3 Ne7 20.Qh6 0-0-0 Vacating the scene of the kingside attack! **21.h5** White continues to press ahead, but he may have missed Black's counter. Instead:

[21.Bxf7? is suicidal since after Rdf8 White's king's position gets completely opened up.]

[21.Kg1 is sensible. After f6 22.Rf1 chances are roughly balanced.]

21...Kc7! A very surprising move which soon turned the momentum in Black's direction. In fact the alternative:

[21...Qf6! was also good for Black, for example 22.Kg1 Ng8 23.Qd2 gxf5 24.exf5 Bc6 with better attacking chances for Black.]

22.Bxf7 Instead:

[22.Rc1 is the natural move, but after gxf5 *(22...Bc6* likely comes to the same thing*)* 23.Bxf7+ Bc6 24.Qxd6+ Rxd6 play transposes to the next note]

22...gxf5 23.Qxd6+?! After this move Black goes quickly downhill. He should have tried:

[23.Rc1+ Bc6 24.Qxd6+ Rxd6 25.Ke1 Black is only slightly better.]

23...Kxd6 24.exf5 Nxf5 25.Ne4+ Ke7 26.Bb3 Ne3+ Black installs the deadly 'octopus' knight! **27.Ke2 Bc6 28.Rac1 Rhf8 29.Rh3** Losing more material, but after:

14.Kh2 Nh7 Black prepares ...Ng5 trying to provoke h4 and then either to come back with the knight to f6 or e6.

[14...h5 15.Rad1 h4 16.g4 Bxg4?! Too aggressive. 17.hxg4 Nxg4+ 18.Kg1 and White should be able to stop Black's attack. Khurtsidze, N - Banikas, H / Patras 2001.]

15.Nf3 White moves the knight from attack and prevents ...Ng5.
[There was also nothing wrong with 15.Rad1 Ng5 *(*After *15...Bxd4 16.Rxd4 Ne6 17.Rdd1 Nxf4 18.gxf4 Qd8 19.Qd3* with the idea of Qg3 White looks better.*)* 16.h4 Nge6 *(16...Nh7!?)*]
15...Be6 16.b3 a5 First of all Black secures the position of the knight. **17.Rad1** However I prefer White here, who has more space and comfortable play. **17...g5?!** An attempt to create counterplay, which has a serious drawback, however -Black weakens the f5 and f4-squares. **18.Bc1 g4**

19.Nd4! Probably an underestimated resource, which underlines the erroneousness of Black's plan.

[Black's calculations were based on 19.hxg4 Bxg4]

19...h5

[19...gxh3? would only destroy Black's pawn structure. 20.Nxe6 Nxe6 *(20...hxg2 21.Nxg7 Kxg7 22.Nd5±)* 21.Bxh3 Nhg5 22.Bxg5 hxg5 23.Bf5±]

20...Be5 21.Nd5! Kh8 In anticipation of f4 Black opens the g-file for the rook.

[23...Bxd5?! allowing the exchange of the dark-squared bishop is hopeless. 24.Nxe5! Rxe5 25.exd5]

24.Bb2!± Exchanging Black's dark-squared bishop White gets to the weakened king. **24...Bg4**

[24...f6 25.Nd4± also looks awful for Black.]

25.e5! A decisive break in the centre. Black's position collapses surprisingly fast. **25...Bf5 26.Qc1!**

[26.Qd2 would allow Nd3]

26...dxe5 27.Rxe5! Rxe5! Without the dark-squared bishop Black would get mated in a few moves. **28.Nxe5 Be6 29.Qf4** The most human move. White attacks the f7-pawn, which Black can't protect without losing the c7-pawn.

3...Nd7 4.0-0 Ngf6 5.d4 cxd4 6.Qxd4 a6

[Black could opt for a Najdorf like structure in the centre with 6...e5 7.Qd3 h6 for instance 8.c4 Be7 9.Nc3 0-0 10.Bxd7 Bxd7 11.a4 Bc6 Grischuk,A (2764)-Nepomniachtchi,I (2707)/Moscow 2012/CBM 152 Extra (1/2, 25)]

7.Bxd7+ Bxd7 8.Bg5 After this move, ... e7-e5 is out of question, of course. **8...e6 9.Nbd2** Not the most popular way to develop the queen's knight in any kind of Sicilians.

[9.Nc3 looks more natural, when a comparison with the tabyia mentioned in the introduction may be instructive. White seems to be a bit ahead with his development, since instead of ... ♗c6 Black has ...a6 on the board. However, White has castled short, which has a double drawback. First of all, he is behind by one tempo in the process of centralising his rooks. Secondly, the kingside pawn storm, one of the main plans in the 4. ♕xd4 line, is virtually impossible here.]

9...Bc6 This position has repeatedly ocurred in the practice of the modern anti Sicilian guru Rublevsky. **10.Rfd1** By placing this rook on d1, Svidler probably wanted to keep the option of gaining queenside space with a4-a5. However, after the early opening of the d-file, the choice will lose any relevance.

[10.Rad1 Be7 11.Nc4 Rublevsky,S (2672)-Vorobiov,E (2547)/Krasnoyarsk 2003/CBM 098/[Psakhis] (1-0, 21)]

Rublevsky,S (2686)-Misailovic,N (2349)/Budva 2004/CBM 102 ext (1-0, 28). A spectacular sacrifice, typical for the main lines of the 6. ♗g5 Najdorf. We can see that Rublevsky plays the so-called side lines only to avoid heavy theory, but not the big fight at all! Black rejected the sacrifice and got a simply worse position. However, White seems to have a strong attack after: exd5 13.exd5 Bb7 14.Rfe1+ Kd7 *(14...Be7 15.Bxf6 gxf6 16.Qxf6* Threatening ♖xe7+ followed by ♖e1, apart from the obvious ♕xh8+. *Kd7 17.Qf5+ Kc7 18.Qxf7 Re8 19.Re3+-)* 15.a4!?→]

10...Be7 11.e5 This leads to simplifications with little chances for an advantage.

[11.Nc4!?]

11...dxe5 12.Qxd8+ Rxd8 13.Nxe5 Rd5N Exposing the rook to an early exchange will lead to a position with a symbolic developmental advantage for White.

[A new idea, but one that is unlikely to catch on, is 11...Rd8 12.Bxg7 Kxg7 13.d5 a6 14.Nc3 Qe8 15.h4 f6 16.h5 (White's attack is scary) e5 17.hxg6 Qxg6 18.Qf2 Nd4 19.f4 with a big White initiative, Sadler, M-Hawkins, J English league 2013.]

12.Qxh6 a6 13.Nc3 Nxd4 14.f4 f6!

[The main alternative is 14...c5 when there have also been games in the last year:
A) 15.Nf3 f6 16.h4 Qe8 *(after 16...Qg4* the forceful *17.h5 g5 18.fxg5 Nxf3 19.gxf6!* Hammer, J-Erdos, V Greek league 2012, gave White excellent compensation)

17.h5 Bg4 18.Nxd4 cxd4 19.hxg6 Qxg6 20.Rxd4 Rac8 Jones, G-Aronian, L London 2012, led to a draw (see the PGN Archive) but here Rybka prefers White after 21.Qh4 (Vigorito describes this as 'more challenging') a plausible continuation being Rfd8 22.Rxd8+ Rxd8 23.Qf2 Rd6 24.Kb1 but Black is not without resources e.g. Na4! *(or 24...h5 25.Be2 Na4!)*;

B) 15.h4

B1) 15...f6 16.h5 Qe8?! *(* according to Vigorito, more precise is *16...Qg4 17.hxg6 Qxg6* which transposes*)* 17.hxg6?! *(* Vigorito analyzes *17.Rd3!* as leading to an advantage *)* 17...Qxg6 Glenn Flear: 'which transposes' 18.Qh2 Bg4 19.f5 Grover, S-Konguvel, P Kolkata 2012, isn't too worrying for Black;

B2) 15...Qc6 16.Nf3 Qf6 17.e5 Qg7 18.Qxg7+ Kxg7 19.Nxd4 cxd4 20.Rxd4 Mamedyarov, S-Petrosian, TL Antalya 2004, with a small space edge. Note that the ideal set-up with the bishop on c6 isn't possible as Bd7? is strongly met by 21.Rb4]

15.Nf3 e5 16.fxe5

[The direct 16.h4?! is neutralized by Qg7 e.g. 17.Qxg7+ Kxg7 18.Nxd4 exd4 19.Rxd4 (White regains the pawn, but without queens there is no attack) Bd7 20.Be2 Bc6 21.Rhd1 f5 22.g3 fxe4= 1/2-1/2 Jones, G-Erdos, V Bratto 2013.]

19...Qe7 20.Nd5! Nxd5 21.Bc4 Kh8!N

[21...Qg7 - 118/(141) 22.Qh4! Kh8 there is an interesting way of playing for an attack: 23.Rhf1! A rare guest at the top level, but Andreikin sticks with his strategy of surprising his opponents early on. '' **5.Nb5 d6 6.c4**

[White can also continue with the classical Sveshnikov setup with 6.N1c3 Atalik,Suat: 'Negi,Parimarjan']

6...Be7 To justify the Kalashnikov Variation's idea of delaying ... ♘f6, Black needs to keep the option of ♗g5 alive otherwise White will just have an ideal setup with c4. [8...Nf6 Atalik,Suat: 'Negi,Parimarjan' Here White needs to avoid the tricks related to ...b5, after that Black will find it hard to generate counterplay as ... ♘f6 prevents both ♗g5 and f5. 9.Be2 *(9.Nc2* now it will be hard to control b5, as the following game shows: *Be6 10.Be2 Rc8 11.b3 0-0 12.a4 b5! 13.axb5 axb5 14.Nxb5 Nxe4 15.0-0 d5= ½-½* (18) Kramnik,V (2759)-Radjabov,T (2756) Baku 2009 *)* 9...0-0 *(9...Nd4* lets White get a pleasant bind after *10.Be3 Nxe2*

A possible way to continue although the assessment isn't clear: *Ne8 14.Qd2 Bg5 15.Nc2 Bxe3 16.Qxe3* with slightly better chances.*)* 13...Ng4 14.Bxg4 Bxg4 15.Nc2! I don't think White should play ♘d5 - after that ... ♗g5 becomes viable for Black. [8...f5 Atalik,Suat: 'Negi,Parimarjan' has been tried a few times by Radjabov. 1.e4 Gershon Svidler,Peter **1...e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0** Svidler invites his opponent to try the Marshall Attack, but lately heroes to stand up to accept the challenge are quite hard to find. **8.h3** This move is an entrance into the so called "Anti Marshall systems". The general idea here is to postpone the c3 and d4 advances, and finish the development meanwhile. Actually, there are different ways for Anti Marshal, in this game we will observe one of them.
8...Bb7
[8...d6 is a transposition into the classical Ruy Lopez after 9.c3]
9.d3 Re8!? An infrequent and yet promising continuation. Black tries to manoeuvre without d6 which allows the e7 bishop to find some more appropriate places to live in (such as b4 or c5).
[More popular is 9...d6]
10.a4
[Kramnik tried here 10.Nc3 Svidler,Peter: 'Ü 91/(305)' against Leko and after Bb4 11.Ng5 Rf8 12.a3 Bxc3 13.bxc3 Na5 14.Ba2 c5 he could have only thought about equalizing. 15.f4 exf4 16.e5 Nd5 17.Bxd5 Qxg5 18.Bxb7 And here the opponents agreed to draw, Kramnik-Leko, 2004.]
[Another, an even more popular approach here is 10.a3 Svidler,Peter: 'Ü 91/(305)']
10...h6 De facto, this is a novelty as nobody played here h6 before. However, in a few moves we will realize that it was just a different move order. The idea here is, in fact, very simple - h6 will be played anyway and Black doesn't want to run with d6, so why not now?
[10...d6 Svidler,Peter]
11.Nc3 Leko was hoping to advance d5 in one fling and Svidler deprives him of this option.
[It is very interesting in those schemes to develop the knight via 11.Nbd2 which bring us to a very similar position to those in a classical Ruy Lopez positions.]
11...b4 When Black plays b4 he should be aware of some positional dangers, like White's advance a4-a5 at some point. **12.Nd5 Na5N** Svidler,Peter: '!?' This is a real novelty, which looks very logical. a5 is taken away which leaves White with one idea only - settling on d5.

[Not for Wells the fashionable 9...a6 , although here too Svidler might well have plumped for 10.f3 with a likely transposition after 0-0 .]

10.f3 a6

[Very natural, but Black doesn't have to move the a-pawn. Indeed, 10...Bd7!? 11.h4 Qa5 has been essayed by former U.S. Champion, Patrick Wolff. The game Kudrin-Wolff, U.S. Online League 2008, continued 12.Bd2 *(12.Kb1 Rfd8 13.g4 Bc6* prepares ...d5 and seems OK too for Black *)* 12...Qc5! (solid and sensible) 13.Qxc5 dxc5 14.e5 Nd5 15.Bg5 *(15.Nxd5 exd5 16.Bg5 Bxg5+ 17.hxg5 Bc6 18.Bd3 g6* doesn't lead anywhere for White either*)* 15...Bxg5+ 16.hxg5 Nxc3 17.bxc3 Bc6 18.Bd3 g6 19.Rh4 Kg7 20.Rdh1 Rh8 21.Kd2 b5 22.Ke3 Rab8 23.Be4 Bxe4 and 1/2-1/2.]

11.h4 b5 12.Kb1 Bb7

[As I've said before in my notes to Demchenko-Miroshnichenko, this has been quite common, but is not forced. Indeed, 12...Qa5!? deserves attention, although 13.a3! *(13.g4 b4 14.Ne2 e5* gives Black good counterplay*)* 13...Bb7 14.g4 is perhaps a little better for White.]

13.g4

[Black fared better in another recent game: 13.h5 h6 14.Be3 Rc8 15.g4 Nd7! (it's important to hold up g4-g5) 16.Rg1 d5!? 17.exd5 Bf6 18.Qb4 Rxc3! 19.bxc3 Bxd5 with good play for the exchange in Corrales Jimenez-Delgado Ramirez, Las Tunas 2009.]

13...Rc8 14.Bd3 Qc7

[This might have been prepared by Wells. Previously Svidler had faced 14...Nd7!? and after 15.Be2 Rc6 16.a3 *(* now Dreev takes up the challenge *16.Bxe7!? Qxe7 17.h5* may be a simpler route to an edge*)* 16...Bxg5! 17.hxg5 Qxg5 18.Rh5 Qf4 19.Rdh1 Nf6 20.R5h3 Rfc8 21.Bd3 h6 matters were far from clear in Svidler-Dreev, Russian Championship, Moscow 2007. White later won this game, but this initially solid path may well not be such a bad one for Black.]

15.Qe3 Rfd8 16.Ne2! A standard regrouping the knight may come to d4 or even join in the attack via g3. **16...d5?**

[The ideal break, but here it fails to convince. Previous practice had seen

16...Qc5! 17.Qd2?! *(missing a neat trick 17.Nd4 should be preferred, although I suspect that Black is OK after h6 , partly due to the tactical defence 18.Bxh6? gxh6 19.Qxh6 Bf8! 20.Qxf6 Bg7 followed by regaining the piece on d4)* 17...d5 18.e5 Ne4! 19.Qe3 Bxg5 20.Qxc5 Rxc5 21.hxg5 Nf2 22.Bxh7+ Kf8 23.Nd4 Ke7 and White didn't obtain quite enough for the exchange in Aveskulov-Balogh, Beijing (rapid) 2008.]

[Balogh's idea deserves further testing, but Black does well to avoid 16...b4 17.Nd4 h6? which runs right into 18.Bxh6! gxh6 19.Qxh6 with some attack, especially as Nd7 20.Nf5! is crushing.]

17.e5 d4

[By this the point there wasn't anything better. Black does obtain the d5-square for his pawn, but I'd be surprised if that was enough White has hardly been stymied on the kingside. That said, the text is a much better try than suffering in a horrible version of the French after 17...Ne8 18.Nd4 b4 19.f4 .]

18.Nxd4 Nd5 19.Qe2 Nb4 20.Be4 Bxe4 21.Qxe4 Qc4!?

[Tempting, but in view of what happens, perhaps Black would have done better to play more slowly with 21...Nd5!? , although I'm not totally convinced by his compensation in any case.]

22.Bxe7! This needed to be accurately calculated and this was the third round of the day (!), but Svidler was up to the challenge. **22...Qxa2+ 23.Kc1 Nxc2 24.Nc6!** A key block and one which had to be seen in advance. **24...Rd5?**

[This loses, but there was a miraculous resource available! Indeed, Black had to find 24...Nd4 25.Rxd4 *(25.Bxd8 Rxc6+ 26.Kd2 Qxb2+ 27.Ke1 Qg2!* is a key point which would have been easy to miss over the board here Black has perpetual after *28.Qxd4 Rc2 29.Rd2 Rc1+ 30.Rd1 Rc2* , as the white bishop crucially blocks the d8-square!*)* 25...Rxd4 26.Qxd4 Qa1+ 27.Kc2 Qxh1 , which is still better for White after 28.Bc5! , but at least the game would have continued.]

25.Rxd5 exd5 26.Qxc2 Now Black's problem becomes totally clear: he won't pick up a rook along the back rank. **26...Qa1+ 27.Qb1 Rxc6+ 28.Kd2 Qa5+ 29.Ke2 Qc7 30.Bd6 Qc8 31.Kd2**

FIDE World Cup (5.1) 03.12.2009
[Rogozenco,Dorian]

The World Cup 2009 was one of the most successful tournaments in Malakhov's career. His outstanding result with the Black pieces in the Chebanenko Slav contributed enormously to this performance. Malakhov's idea in the Chebanenko Slav of not being bothered about getting slightly passive positions proved to be very effective in Khanty Mansiysk. In their wish to take advantage of the white pieces his opponents often crossed the line when trying to break through Black's solid bastions. At those moments Malakhov made full use of his chances, pointing out the weaknesses in opponent's positions. In the present encounter Svidler was aiming for a sharp game and had prepared a novelty in order to get a new and fresh position. The passivity would have led to unpleasant play for Black, therefore Malakhov reacted in a very active way at an early stage, which resulted in a highly tense battle which had already started on move 10. Svidler's determined play led to a strong initiative on the kingside for White. However, Malakhov kept his cool and in the end it was White who collapsed under the pressure. **1.d4** Rogozenco,D Rogozenco Rogozenco Rogozenco: 'Rogozenco,Dorian Rogozenco,Dorian: 'Rogozenco'' **1...d5 2.c4 c6 3.Nc3 Nf6 4.Nf3 a6 5.e3 b5 6.c5 g6 7.Bd3 Bg4** After the exchange of the bishop for the knight White gets an edge, but in the resulting positions it is generally difficult to make further progress. In the event of the much more popular 7... ♗g7 White can consider 8.h3, preventing simplifications in a position in which he has a space advantage. **8.h3** **Bxf3** **9.Qxf3**

[Malakhov seems to be fond of the pawn structure arising after 9.gxf3 Nbd7 10.f4 which represents an important alternative for White.]

9...Bg7 **10.g4!?N** An interesting and somewhat provocative novelty. White prepares the optimal arrangement of pieces - ♕g3 and f2-f4.

[10.Qg3 Nbd7 11.f4 e6 12.Bd2 h5!? 13.0-0 h4 14.Qf3 Nh5 15.Ne2 a5 16.e4 f5 17.e5 Bf8 18.Kh2 Be7 19.g4 hxg3+ 20.Nxg3 Nxg3 21.Qxg3 Rh6 22.Rf3 Bh4 23.Qg2 Nf8 24.Be1 Bxe1 25.Rxe1 Ra7 26.Rg1 Rah7 27.Bf1 Rh4 28.Qd2 Ra7 ½-½ Marcelin,C (2481)-Prie,E (2507)/ Besancon 2006]

10...e5 This standard advance is the most natural reaction to White's kingside actions. Now the position becomes very sharp.

[10...Nbd7 11.Qg3 0-0 12.f4±]

11.Qg3

[11.dxe5? Nfd7∓]

11...Nfd7
[In the event of 11...e4 12.Bc2 White will decide the moment when to open up the centre with f2-f3.]
12.Ne2 Qe7 13.0-0 h5
[Less committal and therefore more cautious is 13...0-0 14.a4 b4 15.Bd2 a5∞]
14.f3 Ruling out Black's possibility to close the centre with e5-e4. Now White will himself prepare the advance e3-e4 in order to open the position quickly, trying to exploit of his lead in development and the bishop pair.
[The immediate 14.a4 b4 15.Bd2 a5 16.e4 is too early: dxe4 17.Bxe4 hxg4 18.hxg4 exd4 19.Bg2 *(19.Rae1? Qxe4 20.f3 Be5 21.Nf4 Qc2-+)* 19...Nxc5∓]
14...Nf8 Another standard manoeuvre in such pawn formations - the knight goes to e6 where it will point out the weakest point of White's structure: the pawn on d4. On the other hand Black remains with development problems and the knight retreat helps White to open the centre quickly.
[14...a5 15.Bd2 Na6 deserved attention, since the a5-pawn is not hanging: 16.Bxa5? Naxc5 △17.Bb4 exd4 18.exd4 Qe3+-+]

[18...exd4 19.Bf4↑ is much too dangerous.]
19.Rae1 h4
[Another option was 19...hxg4!? Δ 20...0-0.]
20.Qf2 0-0 21.f4 Very energetic play by Svidler. **21...exd4**
[Again Black had a reasonable alternative: 21...exf4
A) 22.Bb1!? Na6!∞ *(22...g5 23.Nxf4! gxf4 24.Bxf4⩲)*;
B) 22.Bxf4 Nxc5! 23.dxc5 Qxe4 24.Bd6 Na6 25.Bxf8 Rxf8 and with a pawn and strong bishop Black has compensation for the exchange, since White's structure is weak and the king quite exposed.]
22.f5 This logical desire to continue active actions without wasting time allows Black to get counterplay.
[After 22.Nc1 (bringing the knight to d3 or b3) Black has no time to take the pawn c5 and White's prospects are clearly preferable. Nxc5 *(22...Qxc5 23.f5→)* 23.Bxc6]
22...Nxc5 23.Bb1 d3! 24.Nc1

24...Qd6 25.Ba2? A blunder, losing material.
[It is understandable that Svidler rejected 25.f6 Bxf6 26.Qxf6 Qg3+ 27.Kh1 Qxh3+ 28.Kg1 Qxg4+ 29.Kh2 *(29.Kh1?! Ne4)* 29...Qg3+ 30.Kh1 when Black is left with a pleasant choice between forcing a draw, or continuing to play on with Nbd7∓]

17.h4 This is it. By pushing his h-pawn to h6 White creates discomfort to black King. After h4-h5, Black must play g5, otherwise the opening of the h-file in absence of the g7-Bishop is disastrous for Black. Then White continues to play in the center, speculating on opening the position. Strange enough, but Black couldn't show a clear counterplan yet. It seems that White is just quicker. 1.e4 Marin,M Marin,M Marin,M: 'Marin, Mihail Marin,Mihail: 'Marin,M'' **1...e6 2.d4 d5 3.Nd2 c5 4.Ngf3**

[As far as I understand, this move order aims to avoid the variation 4.exd5 Qxd5]

4...cxd4 The French Defence allows a wide range of interpretations. Personally, I play this opening for the sake of getting an Isolani or a blocked centre, while the positions without pawns in the centre are a bit boring to my taste.

[Therefore, I would choose either Korchnoi's and Uhlmann's old favourite 4...Nc6 5.exd5 exd5]

[Or 4...Nf6 giving White a choice: 5.exd5 *(*Or else *5.e5 Nfd7 6.c3 Nc6)* 5...exd5 6.Bb5+ Bd7]

5.Nxd4

[Once again avoiding 5.exd5 Qxd5]

5...Nf6 6.exd5

[This time it was White's choice whether to open the centre or block it. Here is a recent example with 6.e5 Nfd7 7.N2f3 Nc6 8.Bf4 Qb6 9.Rb1 h6 10.h4 g6 11.c3 Bg7 12.Bb5 Nxd4 13.Nxd4 a6 14.Bxd7+ Bxd7 15.0-0 0-0-0!? 16.Re1 Kb8∞ Kobalia,M (2655)-Zatonskih,A (2471) Germany 2014 (1-0, 41)]

6...Qxd5 Black has developed his queen to d5 anyway, but along the way he has activated the white king's knight. There is little or no strategic plot at all in this kind of position. Play is rather concrete and White's main hope lies in obtaining some initiative or advance in development. But in the event of simplifications, Black would be doing great. **7.Nb5 Na6 8.Nc3 Qd8** Reminiscent of Black's queen retreat in the 3... ♕d8 Scandinavian, as, for instance, in Caruana-Carlsen, Tromso (ol) 2014. **9.a3 Be7 10.Qf3** Both players are eager to develop the queens as soon as possible. Strictly speaking, Black succeded in doing it first, but after the retreat to d8 he actually

conceded this moral victory to his opponent. The last move has two possible purposes: slowing down Black's queenside development (...b7-b6 or ...♗c8-d7) or else starting a kingside attack with ♕h3/g3. White's intentions regarding his d2-knight are clouded as yet clouded in mystery. It could move to the left to put pressure on the black queenside or to the right, to sustain the attacking operation.

11.Bd3

[The main alternative is 11.Nc4 , allowing the development of the other bishop. Ncd5

A) 12.Be2 does not seem to bother Black too much: 0-0 13.0-0 b6 14.Nxd5 Nxd5 *(This is not a good moment for re-centralising the queen: 14...Qxd5 15.Rd1↑)* 15.Bd3 Bb7 16.Qh3 g6 17.Bh6 Re8 18.Rad1 Qc7 19.Qg3 Qxg3 20.hxg3 Red8 21.Rfe1 Bf6 22.c3 Ba6= Adams,M (2740)-Wan,Y (2512) Tromso 2013 (½-½, 39);

B) 12.Bd2 , preparing long castling, may be a bit more venomous: 12...0-0 13.0-0-0 Even if the kingside attack fails, the king's presence on the queenside may prove useful for sustaining the slow advance of the pawn majority. b6 14.Qg3 Qc7 15.Nxd5 Nxd5 16.Qxc7 Nxc7 17.Bb4 Bxb4 18.axb4 After this exchange White finally has a small strategic plus, at least on the left half of the board. Nd5 19.b5 Rd8 20.g3 Bb7 21.Bg2 Rac8 22.Rd4 Kf8 23.Rhd1± Black is in no imemdiate danger, but White's position surely looks more active, Smeets,J (2620)-Tratar,M (2494) Warsaw 2013 (1-0, 50)]

11...Ncd5 It is a good idea to clear matters in the centre as soon as possible.

[11...0-0 is premature, offering White a good orientation for his planning. 12.0-0 b6 13.Nde4 Ba6 14.Rd1 Bxd3 15.Rxd3 Qe8 White is better coordinated and exerts some dangerous kingside pressure. In Yilmazyerli,M (2413)-Drasko,M (2459) Zenica 2013 (1-0, 37) the most promising continuation would have been 16.Bf4!? planning to complete the development and combine the pressure in the centre with creating concrete kingside threats.]

12.Nxd5

[I would think that it would make sense to avoid the queen exchange with 12.Nde4 The following game has to be taken with a certain reserve, due to the huge rating gap between the opponents. Nxc3 13.Nxc3 0-0 14.0-0 Qa5 15.Bf4 Qh5 16.Be4 Qxf3 17.Bxf3 Nd7 18.Rfd1⟳ Adams,M (2752)-Rendle,T (2384) England 2014 (1-0, 52)]

12...Qxd5 13.Qxd5N

[Rather than avoiding simplifications, 13.Ne4 would actually amplify them: Bd7 14.Nxf6+ *(14.0-0* would avoid the queen exchange, but offer Black very active play: *Bc6 15.Re1 Rd8 16.Bh6!? 0-0 17.Bg5 Qxg5 18.Nxg5*

13...Nxd5

[With knights on board it makes less sense playing with an isolani: 13...exd5 14.Nb3 In the absence of queens, Black cannot create kingside counterplay, being confined to defending in a very slightly worse position.]

14.Nf3 Bf6 Black's minor piece pressure faces White with difficulties completing his queenside development. The only way to solve the problem is to start the massive advance of the pawns, but this will create some weaknesses, too. **15.c4 Ne7 16.Rb1**

[16.Be4 does not prevent Black's queenside development at all: Bd7 17.Bxb7 Rb8 18.Be4 Bxb2 19.Rb1 Bc3+ 20.Ke2 Rxb1 21.Bxb1 f6!?=]

16...Bd7 17.b4 Bc6 18.Ke2 0-0-0 This is the most effective way of occupying the only open file. The king can be a useful defensive piece for the queenside minority. **19.Be3**

[With his development incomplete and the king relatively exposed in the centre, White does not get much out of such active incursions as 19.Ng5 Black has several good continuations, but the most active is Nf5!? 20.Nxf7 *(20.Bxf5? exf5∓ 21.Nxf7? 19...Bxf3+ 20.gxf3 Nc6 21.Be4 Nd4+ 22.Kf1 Be5 To me, this came as a slightly surprising manoeuvre, but the game proves there is nothing wrong with it.

[The bishop stands quite OK on f6 and I would have thought of generalising the fight for the dark squares with 22...g5!? for instance 23.Rg1 h6 24.f4 gxf4 25.Bxf4 Bg5 26.Be5 f6 27.Rxg5 fxg5 28.Bxh8 Rxh8∞]

23.f4

[White is more or less forced to expose the more advanced of his doubled pawns, since after the developing 23.Kg2 Black could play Ne2]

23...Bb8 24.Rd1 Nf5 25.Ke2 A wordless (and therefore perfectly legal) draw offer, shortly earlier than the 30th move.

[White could have kept some tension with 25.Rxd8+ Rxd8 26.Bxf5 exf5 27.Ke2 The higher mobility of his pawn majority is compensated for by the weakness of the f4-pawn, though, making a draw the most probable result anyway.]

1.c4 Roiz,M **1...e6 2.Nc3 d5 3.d4 Nf6 4.cxd5 Nxd5 5.e4 Nxc3 6.bxc3 c5**

7.Rb1 Peter is emloying a considerably rare continuation, that enables White to avoid the major simplifications.

[The main line 7.Nf3 cxd4 8.cxd4 Bb4+ 9.Bd2 Bxd2+ 10.Qxd2 0-0 has proved to be very solid for Black.]

7...Be7 8.Nf3

[8.Bb5+ was also recently tested on the highest level: Bd7 9.Bxd7+ *(9.Nf3 Bxb5 10.Rxb5 b6 11.0-0 0-0=)* 9...Qxd7 10.d5 exd5 11.exd5 0-0 12.Nf3 Bf6 13.0-0 b5⇄ Aronian,L - Vallejo Pons,F Sharjah UAE 2017]

8...0-0 9.Bc4 This is the most natural way of development. White's bishop is supporting the thematic d4-d5 advance now.

[9.Bd3 cxd4 10.cxd4 Nc6 offers Black comfortable play due to the pressure on the d4-pawn.]

9...Nc6

[The more modest 9...Nd7 10.0-0 Qc7 11.Qe2 b6 12.d5 exd5 13.Bxd5 Bb7 14.Bf4 Qxf4 15.Bxb7 Rab8 16.Bc6± (Vitiugov,N - Miton,K Czech Republic CZE 2013) didn't offer Black a full equality.]

10.0-0 b6N A natural novelty. There is no reason for delaying the development of the passive c8-bishop.

[The preceding encounter was played almost half a century ago: 10...Qc7 11.Qe2 b6 12.Rd1 Na5 13.Bd3 Bb7 14.d5 c4 15.Bc2 e5 16.Be3± Polugaevsky,L-Petrosian,T Soviet Union 1970]

11.d5! Only this ambitious continuation might pose Black any problems.

[11.Bf4 Bb7 12.Re1 cxd4 13.cxd4 Rc8=]

11...Na5

[11...exd5 12.Bxd5 Qc7 13.Re1± looks rather passive for Black.]

12.Bd3 c4 This move makes the d5-pawn vulnerable. On the other hand, the a5-knight is definitely misplaced now.

13.Bc2 exd5 14.exd5 Bb7 Black's main counterplay is based on attacking the ♙d5, but the ♔g8 is getting more exposed now.

[Possibly, a safer try was 14...Bg4!? 15.Qe2 *(15.h3 Bh5 16.Re1 Bd6⇄; 15.Bf4 Nb7 16.h3 Bh5 17.Re1 Bd6⇄)* 15...Bh5! 16.Re1 Bd6⇄ securing the king and intending to attack the d5-pawn in the long run.]

15.Re1 Bf6? This move is inviting serious troubles - Black shouldn't let White advance the passer.

[A much better move was 15...Qd6! 16.Ne5 *(16.Rb5 a6 17.Rb1 Rae8 18.Be3 Bd8⇄)* 16...Qxd5 17.Qg4 Rad8 18.Qh3 f5 19.Bf4 Bc8! , and it looks like White has sufficient play for a pawn, but hardly more. For instance, 20.Rbd1 *(20.Ng6 hxg6 21.Rxe7 Rfe8 22.Rxg7+ Kxg7 23.Qh6+ Kg8 24.Qxg6+ Kh8* with a perpetual*)* 20...Qc5 21.g4 Rxd1 22.Rxd1 Bg5! 23.Bg3 h6 24.gxf5 Nc6 25.Nd7 Bxd7 26.Rxd7 Ne5 and Black is OK.]

16.d6! Of course, GM Svidler doesn't miss this chance.

[16.Ba3?! is much weaker: Re8 17.Rxe8+ Qxe8 18.Qd2 Qd7 19.Rd1 Rd8 20.d6 Bxf3 21.gxf3 g6⇄]

16...Re8

[In the event of 16...Qd7 17.Ne5 Bxe5 18.Rxe5 Rfe8 19.Bf4 Rxe5 20.Bxe5 Re8 21.Bg3± White's powerful bishops would support the passer, so Black is in big troubles.]

17.Rxe8+ Qxe8 18.Bf4 Rd8

[18...Qd7 19.Nd4 g6 20.Ba4 Nc6 21.Qd2±]

19.Bf5! Now the passer has perfect support from both White's bishops. **19...g6?** The decisive mistake.

[A more stubborn option was 20...Qe7 21.Bh3 Bc6 22.Bc7 Rxd7 23.Bxd7 Qxd7 24.Qxd7 Bxd7 25.Be5+- , but White should be able to convert his material advantage into a full point.]

21.Bh3 Be4 22.Rc1 White is not in a rush. **22...Qc5**

[22...Nb7 offered no hope either: 23.Bc7 Nc5 24.Bxd8 Qxd8 25.Qe2+-]

23.Qe2 Bf5 Alas, this move doesn't help Black to release the tension. **24.Rd1 Bxh3 25.gxh3 Kg7**

[6...e4 is the much sharper line.]

7.d3 h6 8.Na4!? Of course, the idea of this move is to catch the bishop on b4. **8...a5 9.b3 Re8 10.Bb2 Bf5 11.e3 Qe7** The main reason why the queen is not so well placed on e7 is because from d7 it can prepare the bishop going to h3, and also the e7 square can be kept free for the knight on c6.
[After the game Hikaru said that he knew Qd7 wasn't a good move. It seems like he confused this position with some other position, or he saw something really deep, because on the surface Qd7 looks perfectly alright. The thing to worry about is surely d4 trying to trap the bishop. So let's have a look at that move. 11...Qd7 12.d4 e4 13.Nh4 Bg4 14.Qc2 d5!? *(14...g5* now doesn't work due to *15.f3!* and now Black would have hoped that his queen was on e7.*)* 15.a3 Bf8 16.Nc3 and this might be the position which has to be delved into.]

12...Bc5 13.Nc3
[13.h3!?± I like this move because it takes advantage of the fact that the queen and the bishop have not taken control of the c8-h3 diagonal.]

13...Qd7 Now that d4 is no longer a threat, Black puts his queen on the right spot and prepares Bh3. **14.Nd5**
[14.Re1!? should have been given a serious thought, as the g2 bishop is the soul of the position, and keeping it on the board is in White's favour. Bh3 15.Bh1±]

14...Nxd5 15.cxd5 Ne7 16.d4 exd4

17.Nxd4 White would have had a pretty big edge here if his rook was on e1. As it turns out the rook is still on f1 and the bishops can be exchanged with Bh3. **17...Bh3!= 18.e4 c6 19.dxc6 Nxc6 20.Bxh3 Qxh3 21.Nxc6 bxc6 22.b4 Bb6**

(team-ch) Russia 2016
[Najer,Evgeniy]

Intro to Russian Team Championship by GM Evgeny Nager About 8-10 years ago the Russian Team Championship was the most exciting competition in the country's chess calendar. A legion of stars, Ivanchuk, Gelfand, Aronian, Mamedyarov, together with all the best Russian grandmasters, apart from Kramnik, took part year after year in this grand event. However, after the economic crisis in 2008, the tournament dropped dramatically in both status and strength. This year the Premier League began with only five teams, who played a double round-robin. Previously, one of the main incentives for the players was qualifying for the European Club Cup. However, this time, even before the clocks were started, it was clear that all the participating teams would qualify automatically as they were so strong. Oddly enough, the quality of the players in the tournament has not changed much over the years. True, now there were almost no foreign grandmasters, with the exception of Dominguez and Bu Xiangzhi in "The Bronze Horseman", but out of Russia's 14 best players, 13 came to play in Sochi! Where else in Russia can you see Vladimir Kramnik sitting at the chessboard? Only in Sochi, where

he was playing for the Siberia team for the second consecutive year - and brilliantly. He scored 4 out of 5 this time, including a victory over Svidler and two wins against Sjugirov. He missed an "open goal" against Karjakin and only at the second attempt was Svidler able to take a draw off him in more or less convincing fashion. As a result, Vladimir returned to second place in the world Elo ranking list. I might add that in the European Club competition, Kramnik played even better for the Siberia team! One gets the impression that if club competitions were held not just twice, but five or six times a year, Vladimir would find himself very quickly in close pursuit of Magnus. In spite of having such a team leader and the most powerful line up of players, Siberia's overall performance was not a success, as they only finished third. The reason for this was the bad form of a number of players who have not had any recent playing practice. In particular, Dmitry Yakovenko will probably want to forget the tournament as soon as possible. By the way, in the basic team line-up, Dmitry was the only true Siberian, as he was born in Nizhnevartovsk. Grischuk also struggled. Moreover the Siberia team, in contrast to that of Moscow and St. Petersburg, lacked adequate substitutes and so it was quite easy to prepare against them. It was quite a different mood in the Moscow team, which eventually took silver. True, Sergey Karjakin had not yet got over his Candidates' triumph, especially from the emotional point of view, and his score of 1 out of 3 is certainly not a result expected of a world title challenger. In fact it could have been even worse for Sergey had he not been the beneficiary of a good deal of luck. But the remaining Muscovites were in great shape - in fact some were in simply fantastic form, such as our second and third boards, Nepomniachtchi and Inarkiev. Ernesto had a 2900 performance, defeating Dominguez, Yakovenko and Artemyev. Only a day after the end of the team competition, he went on a punitive expedition to the European Individual Championship, where he fully deserved to win the title. If, before the tournament, someone had predicted that Moscow would finish in second place, there would probably have not been much disagreement. But at the end, bearing in mind our two brilliant victories over Siberia with a total score of +5, I felt disappointed with our silver medal. Unfortunately, the loss in our second match against Petersburg and a draw at the start of the tournament against Zhiguli, did not allow us to reach the top.

Of course, first place for the "Bronze Horseman" was no big surprise. It is a strong team, which has fielded virtually the same line-up of players for many years. The St Petersburg team is characterized by healthy conservatism. When one of their local young players merited selection for the team due to his strength and Elo rating, it was bound to happen sooner or later. But never before was the timing so right as this year, and the Petersburg line-up was expanded with the inclusion of 20-year-old Vladimir Fedoseyev. A player of the future? No way - Fedoseyev's rating is already 2685. Yet, even in this case, Petersburg relied mostly on their experienced fighters, sending the young grandmaster into battle only three times. Fedoseyev won

all three of these encounters, including a crucial last rounder against Kazan, where "The Bronze Horseman" won by the closest possible margin. In my opinion, Petersburg won the tournament thanks to their strength in depth, since none of their players failed. Initially, things didn't quite work out for Svidler, scoring just ½ out of 3 at the start of the tournament, but then he finally got his act together and won an important game against Karjakin in the match versus Moscow. The best play was produced by the "midfielders" on boards 3-5: Vitiugov, Bu Xiangzhi and Matlakov, who each won a series of games in very close yet decisive matches and without losing even once. In general, it was a hard-earned victory rather than a brilliant one for the team from St. Petersburg. **1.c4 e6 2.Nc3 d5 3.d4 Nf6 4.cxd5 Nxd5 5.Nf3** Peter refuses to occupy the centre of the board in classical fashion and switches to a Catalan structure instead.

[The computer insists on an advantage for White after 16.a6 Ba8 17.Rfd1 but, humanly, it is obvious that if Black wants to draw then he will have to put in a good deal of serious effort to achieve it. 16...a6 Diagram

17.Nd3 Though consistent, this is an extremely risky idea. White wants to prove his knight's superiority over the opponent's bishop and precisely for this purpose he forces the black pawn structure on to light squares. The problem is that he has to part with his bishop, which, of course, greatly weakens the position of the white king.

[17.Rfd1 Ba8 18.Nxc6 Bxc6 19.e4 Qd6 would have led to a roughly equal position.]

Although, judging from the course of the game, Vladimir had little cause to regret this lost opportunity. **18.Bxc6** The following sequence of moves is more or less forced. **18...Rxc6 19.Nb4 Rc4**

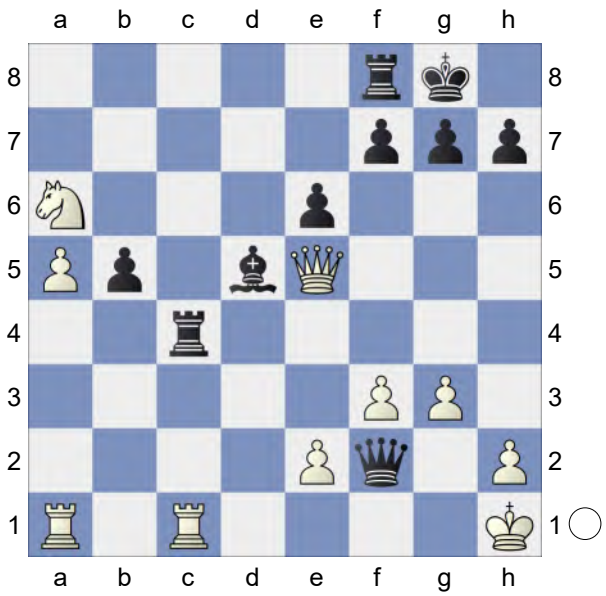
(Diagram)

27.Nc7 As is well known, tenacity in defending difficult positions is not the strong point of Peter Svidler's play. Sometimes there is the feeling that he deliberately refuses to play on in losing positions for hours on end, and prefers to save his strength and emotional stability for the next battle.

[There were some practical chances



to save the day only by 27.Rf1! Qa7 28.e4 Bxe4 29.Nc7!]

27...f6 28.Qd6 Rxc7 29.Qxc7 Qxe2 30.Ra3 And here, without waiting for the obvious 30... b4, Svidler resigned. Vladimir Kramnik played a great game, but the main cause of White's defeat was that Svidler tried too hard to squeeze more out of his position than could possibly be expected. So Siberia won their first decisive match confidently by 4 : 2 - Rublevsky also defeated Rodshtein. Who at that time could have predicted that they would lose their next two important matches? You can bet they will be especially dangerous in the European Club Cup this autumn!

Candidates Moscow (10.1) 23.03.2016
[David Cummings]

1.c4 e5 2.Nc3 Nf6 3.Nf3 Nc6 4.g3 Bb4 5.Bg2 0-0 6.0-0 d6

A solid alternative to the critical

[6...e4 for which see Caruana-Anand and Svilder-Karjakin in this month's Update, and many games in the Archives]

[6...Bxc3 is another popular move, see Dubov-Fedorchuk in the Archives]

[6...Re8 was tried by Anand in the last round of the Candidates, with Svidler again on the White side. After the quiet move 7.Ne1 *(7.Nd5 Nxd5 8.cxd5 Nd4 9.Nxd4 exd4 10.Qa4 a5 11.e3 b5 12.Qc2 Bb7 13.b3 Qg5 14.a3 Bf8 15.Bb2 Bxd5 16.e4 Bb7 17.Bxd4 c5* was about equal in So, W (2788)-Carlsen, M (2863) Shamkir 2015 1/2-1/2 (41)*)* 7...d6 *(7...h6* was seen in Malakhov-Roiz, in the Archives *)* 8.Nc2 Bc5 9.Rb1 a5 10.a3 Be6 11.d3 d5 12.cxd5 Nxd5 13.Ne3 Nce7 14.Ncxd5 Nxd5 15.Nc4 Bd6 16.d4 exd4 17.Nxd6 Qxd6 18.Qxd4 Qe7 19.e4 c5 20.Qd1 Nc7 21.Be3 b6 Black held comfortably in Svidler, P (2757)-Anand, V (2762) Moscow Candidates 2016 1/2-1/2 (35)]

7.d3 h6 Black naturally wants to prevent 8 Bg5, now that he has blocked his own dark-squared bishop's retreat with 6...d6

8.Na4!? White targets Black's bishop, aiming to gain time by pushing it back with a2-a3/b2-b4 or e2-e3/d3-d4 etc. This is quite a rare move which amazingly was played in two concurrent games in this same round of the Candidates! Aronian-Topalov was the other game which diverged at move 9 (see below).

[8.Bd2 is the most common move here, see Istratescu-Berkes in the Archives.]

8...a5 9.b3 Re8 Instead:

[9...Qe7 was Topalov's choice which Nakamura (having prepared this specific line in depth) said was less accurate 10.Bb2 Bc5 and now:

A) 11.Nxc5 dxc5 12.Nd2 Bd7 13.Nb1 Topalov said he was afraid of this manoeuvre and indeed it had been played before. *(13.Ne4* is another way to reroute the knight, when White looks slightly better*)* 13...Nd8 *(13...a4!?)* 14.Nc3 c6 15.Na4 Rb8 16.Nb6 Bg4 17.Qd2 Qc7 18.Na4 Nd7 19.f4 and White is better with the two bishops and the initiative, Mkrtchian, L (2456)-Vasiliev, O (2240) Eilat 2012 1-0 (40);

B) 11.e3 Ba7 12.Nc3 Re8 *(12...Bf5* similar to Nakamura's play, is also playable*)* 13.Nh4 Qd8 Black has lost two tempi with the queen, but *(13...Bg4*

can be answered by *14.Nd5*) 14.Qd2 Ne7 15.Rad1 c6 16.Ne2 *(16.d4* maintains more tension*)* 16...Nf5 17.Nxf5 Bxf5 18.d4 Qc8 19.Nc3 exd4 20.exd4 Ne4?! *(20...Bh3* would remain near equality *)* 21.Nxe4 Bxe4 22.Bxe4 Rxe4 23.Rfe1 Rxe1+ 24.Rxe1 Qf5?! 25.Re7 when White has taken control of the 7th rank as well as the only open file, and is much better, although he later went wrong and drew the game, Aronian, L (2786)-Topalov, V (2780) Moscow Candidates 2016 1/2-1/2 (58)]

[9...Bc5 10.Nxe5! is one of the tactical points that Black has to watch out for in this setup. Both 9...Re8 and 9...Qe7 prevent this trick.]

10.Bb2

[10.a3 Bc5 and now 11.Nxe5? doesn't work because of Rxe5 12.Bxc6 Bd4 and Black wins material]

10...Bf5 The first new move, which appears to part of Nakamura's preparation.

[10...Bc5 11.e3 *(11.Nxe5!?* is possible, and Svidler gave the line *Nxe5 12.d4 Nxc4 13.bxc4 Ba7 14.Qd3* which gives White a space advantage *)* 11...Ba7 12.Nc3 If White has to make this retreat so soon, it is a sign that he isn't getting much out of the opening Bf5 13.h3 Nb4 14.Ne1 c6 15.a3 Na6 16.Nf3 Nc5 and Black is fine, Movsesian, S (2700) -Eljanov, P (2697) Ningbo 2011 1/2-1/2 (35)]

11.e3 Alternatives:

[11.h3 is worth considering]

[11.Nh4 can be answered by Bd7 12.a3 Bc5 13.Nxc5 dxc5 with rough equality, as White's knight is far from the central light squares.]

[11.a3 Bc5 and now the typical tactic 12.Nxe5 Nxe5 13.d4 Ba7 14.dxe5 dxe5 doesn't get White anywhere since his b3-pawn is weak]

11...Qe7 Its not clear why Black shouldn't play

[11...Qd7 (with the idea of ... Bf5-h3) immediately (rather than with loss of tempo as in the game) as there doesn't appear to be a tactical drawback, for example 12.d4 *(12.a3 Bc5 13.Nxe5!? Nxe5 14.Bxe5 Rxe5 15.d4 Bg4 16.Bf3 Bxf3 17.Qxf3 Bxd4 18.exd4 Ree8* is around equal*)* 12...e4 13.d5 exf3 14.dxc6 Qxc6 15.Bxf3 Be4 which is reasonable for Black]

12.a3 Bc5 13.Nc3 White's knight manoeuvre consumes a lot of time. Instead:

[13.h3 ensures the light squared bishops stay on the board. Now:

A) 13...Qd7 can now be answered by 14.Kh2 or even *(14.g4)*;

B) 13...e4 14.Nh4 Bh7 15.Bxf6! Qxf6 16.dxe4 Bxe4 17.Bxe4 Rxe4 18.Qf3 when the endgame after Qxf3 19.Nxf3 would be a shade better for White]

[13.d4 is best answered by Ba7 *(13...e4* can now be met with *14.dxc5 exf3 15.Qxf3* with advantage*; 13...exd4 14.exd4 Ba7 15.Nc3 Bg4 16.Nd5* is also promising for white*)* 14.d5 Nb8 with a tough battle ahead]

13...Qd7 14.Nd5 Nxd5 15.cxd5 Ne7 16.d4 exd4 17.Nxd4 White now has his target pawn structure, but with the light-squared bishops coming off it is much harder to make progress. **17...Bh3** Simple and effective.

[17...Bg4 18.Qd3 Ng6 19.Qc3 gives White good play]

18.e4 If instead

[18.Bxh3 Qxh3 19.Qf3 Bxd4 20.Bxd4 Nf5 was a line discussed by the players after the game which also trends to equality after for example 21.Qg2 *(21.Rfd1?! Nh4 22.Qh1 Qg4* is unpleasant for White*)* 21...Qxg2+ 22.Kxg2 Nxd4 23.exd4 with a likely draw]

18...c6 19.dxc6 Nxc6 20.Bxh3 Qxh3 21.Nxc6 bxc6 22.b4 Bb6 23.Qxd6 Rxe4 Nakamura has calculated that he has enough resources to hold the draw **24.Qxc6 Rae8 25.Qxb6** If White tries to play for a win with

[25.Bc3 axb4 26.axb4 it is hard to see how he can make progress without taking excessive risks. For example Kh7 27.Rad1 R8e6 28.Qd5 f5 29.b5?? Rg6 and Black's attack will prevail]

25...Rh4 Forcing a perpetual **26.gxh4 Qg4+ 27.Kh1 Qf3+ 28.Kg1 Qg4+ 29.Kh1 Qf3+ 30.Kg1 Qg4+** ½-½

[John Watson]

I will borrow from Michael Golubev's notes in Chess Today for this game, adding some background to the opening and some variations. The computer engines flawlessly describe the middlegame adventures in any case.

1.e4 e6 2.d4 d5 3.e5 c5 4.c3 Qb6 5.Nf3 Nc6 6.a3 Nge7!? There doesn't seem to be a single example of this move leading to unique positions in ChessPublishing, and in spite of hundreds and hundreds of games, 6...Nge7 has transposed much more often than not in high-level practice (see the following note). But then it avoids the line

[6...Nh6 7.b4 cxd4 8.Bxh6 gxh6 9.cxd4 . For the record, I think that position is just fine for Black, but why not cut down on White's options?]

7.dxc5!? When I was younger, this move was often cited as a problem with Black's move order, but this game very much challenges that idea.

[7.b4 has been by far the most frequently-played move, when cxd4 8.cxd4 Nf5 transposes to 6...Nh6 7 b4 cxd4 8 cxd4 Nf5, arguably the main line of the Advance Variation.]

7...Qc7!

[7...Qxc5 hasn't fared well over the years, for example, : 8.Bd3!? *(or 8.b4 Qb6 9.c4!* and White is already slightly better, as in Pospisil-Nosek, Czechia (correspondence) 2004*)* 8...Bd7 *(8...Ng6 9.Qe2 Qa5 10.0-0* with the idea Re1 may give White something, but Black is right in the game *)* 9.0-0 d4? *(9...Qb6±)* 10.b4! In the first rapid game Svidler missed a large advantage, compensating for Rublevsky's missed win yesterday. The second rapid game started well for Rublevsky, but two mistakes in a row led to immediate disaster for Black. **1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.g3 d6 7.Bg2 Bd7 8.0-0 Nf6 9.Nce2 Rc8 10.a4 Qc7** A tricky move. Usually Black develops the bishop first (10...Be7) **11.b3?! Nxd4 12.Nxd4 e5 13.Nf5 d5 14.Qd3 g6?!** In his desire to take the pawn in the most convenient way Rublevsky weakens the position and allows White to keep the queens on the board.

[After 14...Bxf5 15.exf5 Qxc2 it is White who must play for a draw]

[Less clear is 14...Qxc2 15.Qxc2 Rxc2 16.Ne3]

15.Nh6 Qxc2?

[Black had to continue 15...dxe4 16.Bxe4 Nxe4 17.Qxe4 Bg7 and in opposite to the game it is more difficult for White to create threats.]

16.Qf3! Bg7 17.exd5 Now the material is equal and Black has serious problems with the king. **17...Rf8** A clear sign that things went terrible for Black. The rest was an easy task for Svidler, who quickly creates a decisive attack. **18.Re1 Rc3 19.Qf4 Kd8 20.Qh4 Rxb3**

[Sagar,Shah]

1.e4 c5 2.Nc3 Svidler played this move quickly.... **2...a6** ....while Khismatullin took a full five minutes to consider his reply! **3.Nge2!?** Maybe Svidler doesn't really want to go into the lines of closed Sicilian. Khismatullin too decides to keep his options open. **3...d6** Four minutes! That's a lot of time to make this move but Denis is making sure that Svidler doesn't move order him. **4.g3 g6** Once White has played g3, Black doesn't feel too worried if the game is transposed into Dragdorf (Dragon+Najdorf) territory. **5.d4** Now was Svidler's turn to think. After five minutes he decides that Open Sicilian is after all the best way for white to play! **5...cxd4 6.Nxd4 Bg7 7.Bg2 Nf6** We are in the fianchetto variation of

the Dragon but with the move a6 I am tempted to call this more of a Dragdorf than a pure Dragon. Whatever be the name, one thing is pretty clear - Black has no problems out of the opening. **8.b3!?** 0-0 is of course the main move but Svidler wants something original on the board. **8...0-0 9.Bb2 Bd7**

[9...Nc6 was also fine.]

10.Qd2

[10.0-0 Wasn't this your first thought! Well, then Svidler is not going to play that! He comes up with the ultra original plan of 0-0-0.]

10...Nc6 11.Nde2

[11.Nxc6 Bxc6 12.0-0-0= was much better than what happened in the game.]

11...b5! Black has not only equalized out of the opening but is already slightly better. **12.0-0-0** The main problem for White is that his b3 pawn is a ready made hook for the black queenside pawns to attack. At the same time the g6 pawn is also a hook but Black is the first one to launch an attack. **12...Ng4!?** This was a slightly unusual decision. Natural moves to consider would have been Rc8 or Qa5. But Khismatullin decides to attack the f2 pawn. White has to make an uncomfortable move like Rdf1 in order to defend it and hence this knight lunge can be jusitifed. **13.Rdf1 Qa5 14.h3 Nf6 15.Kb1 b4**

[15...Rac8 was once again the most natural. 16.f4 Rc7 17.g4 Rfc8 with an interesting position.]

16.Nd1?! What exactly happened to Svidler on this particular day is unclear. He refuses to play the most natural moves. Of course Nd5 was obvious and I can't see any reason to avoid it and make this retreat.

[16.Nd5 Nxd5 17.exd5 Bxb2 18.dxc6! *(18.Kxb2 Qa3+ 19.Ka1 Na7 20.c3∞)* 18...Bc3!? 19.Nxc3 bxc3 20.Qe3 Be6 21.h4⩲]

16...Qc7 Clearing the way for the a-pawn to ram up the board. **17.Ne3 a5 18.f4 a4!** A very bold decision by Denis who is not at all afraid to sacrifice an exchange. **19.e5** Black was already making inroads on the queenside, it was high time that Svidler did something concrete. But the central break is tactically flawed. **19...dxe5 20.fxe5 Nxe5!** This sacrifice of the a8 rook is very natural and easy for a player like Khismatullin to assess. Here after Bxa8 Rxa8 his f8 rook takes the place of the a8 rook. Hence effectively Black is sacrificing the f8 rook which is not really participating in the attack. **21.Bxa8 Rxa8∓ 22.Rf4** Making some space for the h1 rook so that a move like Bc6 would not trap it in the corner.

[22.Qxb4 looked pretty natural but after axb3 23.axb3 Bc6 White loses his exchange. 24.Rhg1 Nf3 25.Rg2 Qa7!-+]

22...axb3 23.axb3? It's very easy to give this move a question mark when you have an engine running in front of you. During the game things are not so simple. It makes sense to not open the a-file completely but with the bishop on b2, a mate is not very probable. Atleast that is what Peter must have thought. And somehow cxb3 doesn't seem correct as it opens he h7-b1 diagonal. However, in such positions it is much more important to play concretely rather than on feel. cxb3 would have kept White in the game while after axb3 it is all over.

[23.cxb3 Bh6!? 24.Rd1 *(24.Rd4*

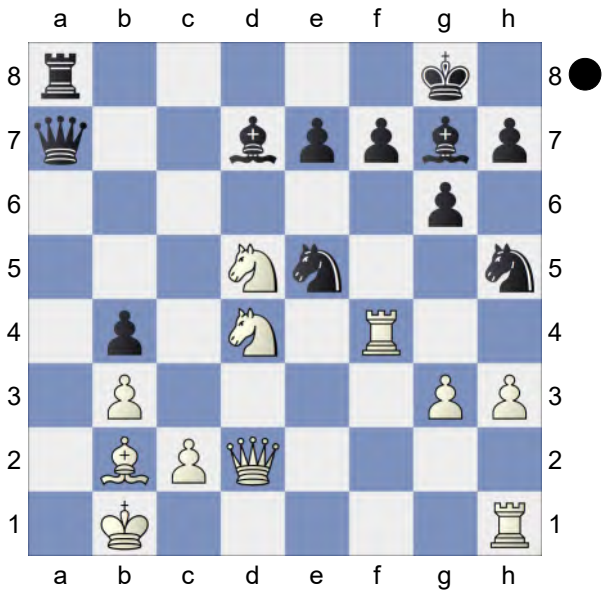
[24.Rxb4 Ne4!! 25.Rxe4 Qa2+-+ with a finish similar to the game. I don't want to spill the beans right now.]

24...Nh5 Black is clearing the pieces off the all important h8-a1 diagonal. Now only the two knights remain. **25.Nd5** Diagram

[25.Rf2 Nc6!-+]



25...Bc6!! This is not at all an easy move to see. But Khismatullin is helped by the fact that he has to clear the pieces of the crucial h1-a8 diagonal. The knight on d5 is pinned to the rook on h1 and is hanging. There is no real way to protect it. Svidler made the most obvious move after four minutes but he must have soon realised that it was a nice little trap! **26.Nxc6 Qa2+ 27.Kc1 Qa1+!**

[27...Qxb2+ also wins but it's not a mate. 28.Kd1 *(28.Kxb2 Nd3+ 29.Kb1 Ra1#)* 28...Qa1+ 29.Ke2 Qxh1-+]

28.Bxa1 Rxa1+ 29.Kb2 Nc4# Very sporting of Svidler to allow Khismatullin to mate him. While we could say that Peter was off colour today, Denis must be given his due. He played a nearly fawless game.

23.Qf2 Ng7 We can also notice some differences if compared to the Dragon, which favour Black. We have here an open file, which can always be used by the defending side for transposing to an ending by exchanging all rooks. This could happen if White tries to undermine Black's kingside fortress with Bd4, threatening Bxg7 and gxh5. Another aspect is Black's advantage of space in the centre (something unthinkable in the Dragon). Concretely, the presence of the d5-pawn restricts the activity of the white knight. También podemos observar ciertas diferencias con respecto al Dragon que favorecen a las negras. La presencía de una línea abierta ofrece a la parte en defensa simplificar la posición mediante el cambio de todas las torres. Por ejemplo. esto podía pasar en caso de Ad4, con idea de subminar la fortaleza negra del flanco de rey con Axg7 y gxh5. Otro aspecto se refiere a la ventaja de espacío en el centro de las negras, algo impensable en el Dragon. Concretamente, la presencía del peón de d5 en el centro restringe la actividad del caballo enemigo. 1.e4 c5 2.Nf3 d6 3.d4 Nf6 4.Nc3 cxd4 5.Nxd4 Nc6 6.Bc4 e6 7.Be3 Be7 8.Qe2 The Velimirovic Attack is quite a rare beast at the highest level these days, so it's interesting to see leading Sicilian authority, Peter Svidler, employing it. **8...a6 9.0-0-0 0-0**

[Black doesn't, of course, have to castle and 9...Qc7 10.Bb3 Na5 11.g4 b5 12.g5 Nxb3+ 13.axb3 Nd7 remains a popular alternative.]

10.Rhg1 Nxd4!?

[With 10...Qc7 11.Bb3 Nd7 Black could have followed one of the main lines of the Velimirovic, but Dreev wants to try to exploit White's move order.]

11.Rxd4 b5 12.Bb3 Nd7 13.g4 Nc5 14.g5 Qe8?

[I wonder if this was preparation or over the board inspiration, not least because Svidler quickly makes it look quite bad. Black could still have taken play into acceptable-enough waters with 14...Qc7 , after which, for example, 15.Qh5 g6 16.Qh6 Rd8! 17.e5 Bf8 enabled him to more than defend in De Firmian-Shirov, Biel 1995.]

15.Qh5! Direct and, from what I can see, pretty powerful. **15...f5**

[A novelty. Black had previously preferred 15...Nxb3+ 16.axb3 and only then f5 , but after 17.g6 hxg6 18.Rxg6 Bf6 19.Rxd6 b4?! 20.Nd5! he was crushed too in Pisk-Hausner, Czech League 1998.]

[Note too the line 15...Bb7 16.e5! Nxb3+ 17.axb3 f5 18.Qxe8 Rfxe8 19.exd6 , netting a rather useful pawn. White's rook went to d4 for good reasons back on move 11!]

16.g6 hxg6 17.Rxg6 f4?

[I wonder if this was already desperation or just based on a bad oversight. Black should probably have preferred 17...Bb7 , although after 18.exf5 Nxb3+ 19.axb3 exf5 20.Bg5! he would still have come under some pressure on the kingside.]

18.Bxf4 Rxf4

[This costs Black his queen, but he had already gone wrong: for example, 18...Bd7 19.Bh6 Rf7 20.e5! would have given White a crushing attack.]

19.Rxg7+! Kxg7 20.Qxe8 Rf7 Black does have a rook and a piece for the queen, but Svidler has realised that not only is his queen safe but that Black's position contains many targets, not least his king. **21.Qc6 Bb7 22.Qb6 Rc8**

[Of course, 22...Bd8 doesn't trap the queen on account of 23.Qxd6 .]

23.Rxd6! By far the best solution White transforms his material advantage as he wants to get his queen motoring on an open board. **23...Rxf2**

[Black's days would have been numbered too in the event of 23...Bxd6 24.Qxd6 Rd7 25.Qe5+ Kf7 26.f4 Nxb3+ 27.axb3 Rg8 28.Ne2 .]

24.Bxe6 b4?!
[This desperate gamble doesn't help, but White wouldn't have needed all that much technique to convert his advantage after even 24...Bxd6 25.Qxd6 Rf1+ 26.Kd2 Nxe6 27.Qxe6 Rcf8 28.Qg4+ .]

22...Bc5! Nicely completing the picture. As I said in the text, I am reminded of the Classical King's Indian where the exchange of light-squared bishops often spells problems for the prosecution of an attack against g2. Also the knight on f7 (f2 in that case) plays a perfect contribution. **23.Bxc5 Rxc5 24.Rg3 d5 25.exd5 Bxd5 26.Re1 Rc7 27.Nh4 Bc6 28.h3∓** I suspect!

[Richard Palliser]

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.Be3 Nf6 7.Qd2
[Years ago, such a direct approach was frowned upon against Black's flexible Taimanov set-up, but of late White has actually done quite well with this aggressive try at grandmaster level. That said, it's important to start with the queen move, rather than 7.f3?! d5 , when Black is already at least equal.]
[Another aggressive approach is, of course, 7.f4!? Bb4 8.Bd3 , as we've seen on several occasions.]
7...Bb4
[Having not weakened his kingside and the e3-square with f3, White is now able to meet 7...d5 with 8.exd5 exd5 *(or 8...Nxd5 9.Nxd5 Qxd5 10.c4 Qa5 11.Nxc6 Qxd2+ 12.Bxd2 bxc6 13.Bc3* , with a pleasant long-term pull *)* 9.Be2 , with an edge.]
[The text is thematic, but it's worth remembering that Black can also try to exploit White's move order with the still pretty-rare 7...Ng4!? , which we considered back in Spoelman-Movsesian, Wijk aan Zee 2008.]
[Finally, 7...Qc7 hasn't been too

popular with fans of 5...a6, but actually transposes to the line 5...Qc7 6 Be3 a6 7 Qd2 Nf6, which we'll see in Gashimov-Movsesian.]

8.f3

[This isn't forced and Naiditsch has experimented with 8.Bd3!? , which might be where White players will turn next, if they cannot improve over Svidler's play. Naiditsch-Philippe, French League 2010, continued d5 *(8...Ne5!?* is pretty ambitious, but I've by no means certain that the uncharted position reached after *9.f4 Neg4 10.Bg1 e5! 11.Nf3 d5* isn't just quite good for Black*)* 9.a3! Qa5 *(*after *9...Bxc3 10.Qxc3* Black can temporarily win a pawn, but no more than that, and *Nxd4 11.Bxd4 dxe4 12.Bxf6 Qxf6 13.Qxf6 gxf6 14.Bxe4* sees White regaining it with a clear edge*)* 10.exd5 exd5 *(10...Bxc3!? 11.bxc3 Qxd5* and if *12.c4! Qxg2 13.0-0-0 Bd7* could be the critical line, nervous though this would certainly make one over the board*)* 11.Nb3 Bxc3 12.Nxa5 Bxd2+ 13.Bxd2 0-0 14.0-0-0 and White had emerged with a definite pull thanks to his pair of bishops.]

8...d5

[This must be critical, but notably leading Sicilian exponent, Pavel Tregubov, has preferred 8...Qc7!? . Now 9.0-0-0 transposes to a position which usually comes about via 5...Qc7 6 Be3 a6 7 Qd2 Nf6 8 0-0-0 Bb4 9 f3. *(* Instead Browne-Tregubov, Las Vegas 2010, saw *9.a3 Be7 10.g4 h6 11.0-0-0* when it might seem to be a moot point whether a3 is a good addition for White, but after *b5 12.Rg1! b4 13.axb4 Bxb4 14.Nxc6 dxc6 15.Bd4 Bb7 16.g5 hxg5 17.Qxg5* Browne had managed to take control and was definitely for choice. *)*]

9.0-0-0!?

[Continuing the bold sequence of moves. Instead 9.a3 Qa5 10.Nb3 *(* here at first it seems more sensible to go *10.exd5* a la Naiditsch's approach Mamedov-Navara, European Championship, Rijeka 2010, continued *Nxd5 11.Nb3 Bxc3 12.Nxa5 Bxd2+ 13.Bxd2 Nxa5 14.Bxa5* , but now *Ne3* revealed why Bd3 is a more useful inclusion than f3 and after *15.Kf2 Nxf1 16.Rhxf1 b5 17.Rfd1 Bb7 18.Rd6 0-0 19.Rad1 Rfc8 20.c3 Bd5* Black had clearly equalised *)* 10...Bxc3 11.bxc3 Qc7 12.c4!? is quite an unclear pawn sacrifice, which Laznicka twice had to face back in the summer, in the GM event at Paks. Second time around, against Timman, he went in for the critical dxe4 *(* the earlier Robson-Laznicka, Paks 2010, had seen *12...dxc4 13.Bxc4 Ne5 14.Be2 0-0 15.Bc5 Rd8* and now *16.Qa5! Qxa5+ 17.Nxa5 b5 18.Kf2* would have retained a pull*)* 13.Bc5 Ne7 14.0-0-0 0-0 15.Bd6 Qd8 16.Qe1 *(*Black is also OK after *16.Qb4 a5! 17.Nxa5 Qxa5 18.Qxa5 Rxa5 19.Bxe7 Re8 20.Bxf6 gxf6 21.fxe4 Rxa3)* 16...exf3 17.gxf3 Re8 18.Be5 Nd7 by when White had some but possibly not quite enough compensation.]

9...Qa5

[Once again Black takes the chance to activate his queen, whereas 9...0-0 gives White definite chances to be

better after Soloviov's 10.a3 Be7 *(10...Ba5!?)* 11.exd5 Nxd5 12.Nxd5 exd5 13.h4! .]

10.Nb3

[The safer choice. Instead, as we've previously seen, 10.Nxc6 bxc6 11.Bd4 0-0 12.Qg5 , while looking scary, should be fine for Black, especially if he meets h6 13.Qg3 Be7 14.Be5 Qb6 15.f4 Bd7 16.Be2 with Bruzon's idea of Rab8! .]

10...Bxc3 11.Nxa5 Bxd2+ 12.Bxd2 dxe4 13.Nc4 Thus White has sacrificed a pawn, in return for a certain degree of pressure on the dark squares. Will Black's queenside pieces make it out OK? **13...0-0 14.Nb6 Rb8 15.Be3 Nd5!**

[Wisely returning the pawn. Black preferred 15...Re8?! in Ragger-Kabatianski, German League 2008, but after 16.Bc5 Nd5 *(* this comes too late to help, but White is also better after the messier *16...exf3!? 17.Bd6! Ne4 18.Bxb8 Nxb8 19.Nxc8 Rxc8 20.Rd4 Nf2 21.Rg1 Nc6 22.Rd7)* 17.fxe4 Nxb6 18.Bxb6 e5 19.Bc4 Be6 20.Bxe6 Rxe6 21.Rd7 White had a definite pull, which he went on to convert.]

16.Nxd5 exd5 17.Bf4 Ra8 18.Rxd5 exf3

[A natural novelty from Grischuk. Previously the Austrian Grandmaster, Markus Ragger, a leading exponent of 7 Qd2, had faced 18...Re8 and after 19.fxe4 Rxe4 20.Bg3 Be6 21.Rd2 h6 22.Be2 Rd4 23.Rhd1 Rad8 24.Bf3 Rxd2 25.Rxd2 Rxd2 26.Kxd2 g5 27.Kc3 f5 28.a4 White converted his bishop-pair advantage into victory in Ragger-Cossin, Rogaska Slatina 2009.]

19.gxf3 Be6 20.Rd2 Rfd8 Now Black is in time to challenge the d-file before White can develop his king's rook. **21.Bd6**

[Natural and clearly best. Otherwise, 21.Bd3 Nb4]

[and 21.Rxd8+?! Rxd8 22.a3 Nd4 were both well worth avoiding.]

21...Rac8 Black's counterplay is rather rapid, and now Svidler has to take steps to protect his under-fire a-pawn. **22.b3 b5 23.Bg2**

[If White wanted to avoid the coming tactical shot he might have preferred 23.Be2 Bf5 24.c3 , although after Re8 *(24...Nd4? 25.Rxd4 Rxc3+ 26.Kd2* doesn't give Black enough, with White's light-squared bishop safe and *Rc6* met by *27.Bc5)* 25.Kb2 Re6 26.Bg3 Rce8 Black would clearly have enjoyed enough activity to prevent White putting his bishops to any meaningful use.]

23...Bf5 24.c3 Nd4! 25.Bb4

[White has to acquiesce to the repetition, 25.Rxd4? failing to Rxc3+ 26.Kd1 *(*or *26.Kd2 Rc2+ 27.Ke3 Rxg2)* 26...Rc6 27.Be5 Rxd4+ 28.Bxd4 Rd6 29.Ke2 Rxd4 , with an extra pawn for Black.]

Olympiad-37 Turin (6) 27.05.2006
[Tiviakov,Sergei]

[This game took place in the central match of the 6th round. It was quite important for the 1st sensaion of the Olympiad in Turin. Our Dutch tem defeated Russia. And my solid play in this game helped that, it is always not an easy task to hold with Black against the player of a class of Svidler.] **1.e4** Tiviakov Tiviakov **1...d5** [Peter always plays 1.e4 and I recently started playing

the Scandinavian Defence, choosing it instead of the Dragon and Maroczy. The Scandinavian Defence is much more soild and safe than the Dragon. At least I don't have a risk to lose by force here. Despite the dubious reputation it is not easy for White to get even a small advantage. I played lot of games with the Scandinavian on the highest possible level and with success. For example, drew Anand, Svidler, Grischuk, Korneev, Cheparinov, won against Kamsky, not mentioning much weaker players.] **2.exd5 Qxd5 3.Nc3 Qd6 4.d4 Nf6 5.Nf3 a6**

[5...c6 is another move I play regularly. I played it against Anand, Grischuk. There is nothing wrong with it, but having played already 1 game at the Olympiad before (against Enmaul Hossain), I decided to go for 5...c6.]

6.g3 [Peter chooses the most principal continuation. Other moves pose less threats for Black.] **6...Bg4 7.Bg2 c6**

[7...Nc6 is the main continuation here with lot of theory and sharp lines, but it was not the point of the present game to play sharp. I decided to choose the safer and much more rearer 7...c6]

8.Bf4!N This move is new, but it is clearly stronger than 8.0-0. If White castles king's side, he has no chances for an opening advantage whatsoever. The following games demonstrate some plans and the ideas...

[8.0-0 e6 9.Re1 *(9.Bf4 Qd8 10.Qd3 Bd6 11.Ne5 Bf5 12.Qe2 0-0 13.h3 h6 14.Rad1 Qe7 15.a3 Nbd7 16.Rfe1 Rfd8 17.Kh2 Rac8 18.Nxd7 Rxd7 19.Bxd6 Rxd6 20.Ne4 Bxe4 21.Bxe4 Rcd8 22.c3 Nxe4 23.Qxe4 Qc7 24.Qe2 c5 25.dxc5 Qxc5* ½-½ Cristian,S-Rentner,D/playchess.com 2004/EXT 2005 (94)*; 9.a4 a5 10.h3 Bxf3 11.Qxf3 Be7 12.Bf4 Qd8 13.Rad1 0-0 14.Ne4 Nxe4 15.Qxe4 Nd7 16.c4 Re8 17.Qc2 Rc8 18.h4 Qb6 19.Rd3 Bf6 20.Rfd1 e5 21.Bh3±* 1-0 Shabalov,A-Gonzalez,R/Philadelphia 2004/CBM 101 ext (30) *)* 9...Be7 10.h3 Bxf3 11.Bxf3 0-0 12.Ne4 Nxe4 13.Bxe4 Bf6 14.c3 Qc7 15.Bf4 Qb6 16.Qc2 g6 17.h4 Nd7 18.h5 Bg7 19.Kg2 Rfe8 20.hxg6 hxg6 21.Rad1 Rac8 22.Rh1 Nf6 23.Bd3 c5 24.Be5 Qc6+ 25.f3 Ng4 26.Qe2 cxd4 27.Bxg7 Kxg7 28.cxd4 Nf6 29.Qe5 Rh8 30.Be4 Qb6 31.g4 Rxh1 32.Rxh1 Qc7 33.Qg5 Nxe4 34.Qh6+ Kf6 35.fxe4 Qc2+ 36.Kf3 Qxb2 37.Qh4+ g5 38.Qh6+ Ke7 39.Qxg5+ Kd7 40.Qg7 Rc3+ 41.Kf4 Qd2+ 42.Ke5 Rf3 43.Qh6 Qa5+ 0-1 Dworakowska,J-Ogloblin,N/Moscow 2004/EXT 2005 (43)]

8...Qd8 9.h3 White has no other useful moves and has to force the exchange on f3 immediately. **9...Bxf3 10.Qxf3 e6 11.0-0-0 Be7** [Here White has a development, space advantage and moreover the pair of bishops. Despite all that it is not easy for White to get something special from that. Meanwhile Black play is easy, he is going to finish the development by Nbd7, Nd5 and then start advancing the pawns on the queen's side - b7-b5 etc with enough counter-play. In his turn White has to advance the king's side pawn trying to create the attack on the Black king.] **12.g4 Nbd7 13.Kb1 Nd5 14.Nxd5?!** [After the game Peter was unhappy with this move. He felt he should have played

[14.Bc1!? but after b5⇄ , followed by the advance of the other queen's side pawns, Black creates enough counter-play. Position remains very complex, with chances for both sides.]

14...cxd5 15.c4 Nb6 [Later Peter told me he missed that move. But is it the only Black move in the position, he consolidates his center, transferring the knight to c6, where he will attack the pawn d4.] **16.c5 Nc4 17.Bf1 Na5** [If Black plays Nc6, puts the bishop on the diagonal a1-h8 and aftewards opens the b line, White can come in trouble. He has to prevent the development of the black bishop on the diagonal a1-h8.] **18.Qg3** [Unfortunately for Black, White can prevent the realisation of the previously mentioned plan. He is threatening to play g4-g5 and then start advancing the h pawn. Besides he is also threatening to win the knight by Bf4-c7.] **18...Bh4** [It took a lot of time to make this move. At first I was going to play 18...Nc6 or 18...Rc8 or even 18... Qd7 (with an idea Rc8, Bd8-c7). But then decided to disturb White plan and prevent the advance of the white pawns on the king's side.] **19.Qe3 h6 20.Be5** [White is playing safe, deciding to exchange the bishops.]

[20.Bh2!? , followed by f4-f5, was too risky. And according to Peter White has more chances to lose than to win.]

20...Bf6 21.Bxf6 Qxf6 22.f4 Nc6 23.g5 Qe7 24.h4 g6 [Black is not in a hurry to determine the position of the king and tries to refrain from castling as long as possible. One of the great advantages of the Scandinavian is that there is not much theory here, there is much space for creativity.] **25.Rh3**

[After 25.gxh6 0-0-0 Black will soon win the h6 pawn back, leaving White with too many weaknesses in his camp.]

25...0-0-0

[25...h5!? followed by 0-0, was possible]

26.Be2 hxg5 27.fxg5

[After 27.hxg5 Qc7 , followed by Ne7-f5, it is only White who can come in trouble]

27...e5 [After the exchanges of the queens the draw is the most likely result. I decided to call it a day and offered a draw.]

[Richard Palliser]

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e6 6.g4 Movsesian has met the Keres Attack less than one might expect of late, but it undoubtedly remains a key test of Black's pure Scheveningen move order. **6...h6**

[Black's main and most sensible choice, but the American prodigy, Ray Robson, recently preferred 6...e5!? , a radical thrust which I've long quite liked. However, Becerra Rivero-Robson, US Championship, Saint Louis 2009, continued 7.Bb5+ Bd7 8.Bxd7+ Qxd7 9.Nf5 h5 10.gxh5 Nxh5 11.Be3!? *(* simple development an important alternative is *11.Nd5 g6 12.Ng3 Bg7* - see A.Sokolov-Nisipeanu, Bundesliga 2007, in the Archive *)* 11...Na6 *(* this is a little more solid an approach than Black might like, but *11...g6 12.Ng3 Nc6 13.Qf3* also looks a little uncomfortable*)* 12.Qf3 g6 13.Ng3 Nc7 14.0-0-0 b6 (continuing Black's extremely solid approach) 15.Kb1 0-0-0 16.Rd2 Nf4 17.h4 and White had an edge. Might the simple 11 Be3, rather than the flashy 11 Bh6, just leave Black facing quite an unpleasant defence? It's certainly strange that 11 Be3 hasn't caught on before.]

7.Bg2

[It would be interesting to know what Movsesian had planned for the main line with 7.h4 . Then Nc6 *(*the alternative is *7...Be7 8.Rg1 d5 9.Bb5+!* , but White is better here*)* 8.Rg1 h5!? *(*I prefer this to *8...d5* - see Wei Ming's notes to Goh Wei Ming-Arlandi, Beijing (rapid) 2008*)* 9.gxh5 Nxh5 10.Bg5 Qc7!? turned out OK for Black in Macieja-Kasimdzhanov, Spanish Team Championship 2007, as we've seen before.]

7...a6

[A Movsesian favourite in place of 7...Nc6 8.h3 Bd7 , which Tony covered in his notes to Kosten-Tratar, Sautron 2005.]

8.h3

[An important alternative is 8.Qe2!? Qc7 9.f4 Nc6 10.Be3 Nxd4 *(*an immediate *10...e5!?* deserves consideration*)* 11.Bxd4 e5 12.Nd5! Nxd5 13.exd5 Be7 14.fxe5 Bh4+ 15.Bf2 Bxf2+ 16.Qxf2 dxe5 17.0-0-0 , which led to quite a dangerous position for Black in Short-Movsesian, Sarajevo 2007.]

8...Nc6 9.Be3

[Quite a popular choice of late against Movsesian. He has also faced 9.f4 Qb6 10.Nb3 Be7 11.Qf3 Nd7 , which Tony covered back in Naiditsch-Movsesian, Spanish Team Championship 2005.]

9...Ne5! Black wastes no time exploiting White's last to begin counterplay. **10.f4**

[Svidler is happy to give up the bishop-pair to fight for the initiative. White preferred 10.Qe2 in Timofeev-Movsesian, Russian Team Championship 2009, but after g5! (a key follow-up to Black's last) 11.0-0-0 Bd7 12.f4 gxf4 13.Bxf4 Rc8 14.Kb1 Be7 15.Rhf1 Rxc3!? 16.bxc3 Qc7 17.Qe1 Nc4 18.Bc1 Ne5 Black had reasonable play for the exchange due to his strong central

control.]

10...Nc4 11.Qe2 Nxe3!?

[A sensible novelty, especially considering the fast time limit. Black preferred to grab in Votava-Stohl, Presov 1999, but after 11...Nxb2 12.0-0 Qc7 13.Ncb5! Qa5! *(13...axb5 14.Qxb5+ Bd7 15.Qxb2* regains the piece with advantage e4-e5 will follow*)* 14.e5 dxe5 15.fxe5 White had the initiative for his pawn, although objectively-speaking matters remained far from clear.]

12.Qxe3 Qb6! A brave decision with Black still to move either bishop, but a good one at that, creating some tension along the g1-a7 diagonal. **13.e5!**

[The only way to challenge Black. Indeed, I dare say that Svidler considered 13.0-0-0 e5 14.Nd5 Nxd5 15.exd5 Be7 to be pretty comfortable for Black, especially since 16.Rhe1 can be met by Bh4 .]

13...dxe5 14.fxe5 Nd7 15.0-0-0 Be7 16.h4 Qc7 As so often in the Sicilian, we find Black a little cramped by the e5-pawn, but that pawn can easily become weak. Here Movsesian's position is very solid and, as the game shows, Black doesn't have any real problems.

17.Rde1

[The alternative was 17.Nf3 , but then Nb6 would have introduced ...Nc4 ideas while enabling Black to develop his queenside with rough equality.]

17...Nb6 18.b3 Bd7 19.Qg3

[Black would have been OK too after 19.Kb2 when 0-0-0 would have been pretty solid for him, *(*and *19...Rc8!? 20.Rd1 a5* a little more active and risky. *)*]

19...Rc8 20.Ne4 Nd5 With his queenside a little vulnerable and ...Qa5 on its way, Svidler sensibly initiates exchanges. **21.Nd6+! Bxd6 22.exd6 Qc5!** Essential and now Black forces perpetual. **23.Bxd5 Qxd4 24.Bxb7 Qa1+ 25.Kd2 Qd4+ 26.Kc1 Qa1+ 27.Kd2 Qd4+**

13.c5 d5 14.Nxe6 Bxe6 15.Bf4 b5 16.Bxb8 Qxb8 In such closed positions, the material does not always prove to be quite so decisive; the potential of the pieces is often more important. For example, if White still had a black-squared bishop instead of a white-squared one, a black bishop would quickly appear on f3 and Black would take the initiative. In this position, however, White has no big weaknesses, so Black would have to open the position with g6/h6/g5/f4 if he had ambitions. This operation, however, opens up lines which, as is well known, cannot be used so optimally by diagonal players. In this case, the superiority of white rooks over black rooks would become noticeable. Therefore, Black should rather keep quiet and wait to see if White does something crazy, like sacrificing on b5. White, on the other hand, can hardly open up the position in any meaningful way either, which means that the situation at hand should simply end peacefully with risk neutrality on both sides. In solch geschlossenen Stellungen erweist sich das Material nicht immer als ganz so entscheidend, wichtiger ist oft das Potential der Figuren. Hätte Weiß beispielsweise noch einen schwarzfeldrigen Läufer, statt eines weißfeldrigen, würde schnellstens ein schwarzer Läufer auf f3 auftauchen und Schwarz würde die Initiative übernehmen. In dieser Stellung hat Weiß allerdings keine großartigen Schwächen, womit Schwarz mittels g6/h6/g5/f4 die Stellung öffnen müsste, falls er Ambitionen hätte. Durch diese Operation werden allerdings Linien geöffnet, die bekanntermaßen von Schrägschießern nicht so optimal genutzt werden können. In diesem Falle würde sich die Überzahl von weißen gegenüber schwarzen Türmen bemerkbar machen. Daher sollte Schwarz eher ruhig halten und abwarten, ob Weiß etwas verrücktes macht, wie z. B. auf b5 zu opfern. Weiß hingegen kann die Stellung auch kaum sinnvoll öffnen, womit die vorliegende Situation bei beiderseitiger Risikoneutralität schlichtweg friedlich enden sollte.

17.Ne2 a5 18.Nf4 Bf7 19.Be2 g6 20.Qc3 Qc7 21.0-0-0 Ra8 22.Kb1 Qd7 23.Rdg1 h5 24.Rc1 Bd8 25.Qd2 Kg7 26.Rc2 What you can take away from this game: 1) After the slow 2.g3, the proposed setup with e5/Be7/d6/f5 can be taken favorably without worrying about flying apart right in the center. 2) Nh4!? is an interesting motif/sacrifice to

seriously consider in such situations, as it gives the knight more options (e.g. also e3) 3) Bg5 only really makes sense in these structures if Black already has c6/d5, otherwise Black can go over to the c5!? plans 4) Na6/Nc7 is a typical very harmonic maneuver. Was man von dieser Partie mitnehmen kann: 1) Nach dem langsamen 2.g3 lässt sich das vorgeschlagene Setup mit e5/Le7/d6/f5 günstig einnehmen ohne Sorge zu haben, dass man direkt im Zentrum auseinanderfliegt 2) Sh4!? ist ein interessantes Motiv/Opfer, was man in solchen Situationen ernsthaft in Erwägung ziehen sollte, da es dem Springer mehr Möglichkeiten bietet (z.B. auch e3) 3) Lg5 ergibt in diesen Strukturen nur wirklich Sinn, wenn Schwarz bereits c6/d5 stehen hat, sonst kann Schwarz zu den c5!?-Plänen übergehen 4) Sa6/Sc7 ist ein typisches sehr harmonisches Manöver

1.d4 Ftacnik,L **1...Nf6 2.c4 e6 3.Nf3 d5 4.Nc3 Be7 5.Qc2** The early queen move is nothing special in different openings after 1.d4. In the Queen's Gambit it means the investment of a vital tempo and it gives Black the chance to try pointing out its drawbacks. **5...c5 6.dxc5 d4 7.Nb5 e5!** Without the witty move 7..e5! the whole black setup would be rather pointless. The defender is ready to sacrifice some material in order to lure White's pieces on to unnatural squares.

A3) 14.Rd2 sieht am logischsten aus, aber auch andere Ideen sind interessant. 14...c5 15.Rfd1 Be6 16.Ne2 g5⇄ Anand - Kramnik (Mainz, 2001);
B) 13...c5 14.Rfe1 *(*Nach *14.Nd5 a5! 15.a4 c4!* wurde Weiß praktisch gezwungen, den Bauer zu opfern: *16.e6 fxe6 17.Nf4 cxb3 18.cxb3 Bd6 19.Ng6 Rg8 20.Nfe5 Be8∓* Wonach Schwarz eindeutig besser stand in Stellwagen - Efimenko (Wattenscheid, 2008). *)*
B1) 14...Ne7 Die Überführung des Springers nach g6 ist ein typischer Manöver - von dort aus kontrolliert er das Feld f4. 15.Nd2 *(15.Ne2 Ng6=* Leko - Jakovenko (Jermuk, 2009) *)* 15...Be6 16.Nde4 c4 17.Kh2 cxb3 18.cxb3 Ng6 19.Nb5 Bd7 20.Nec3 Bc5

4...Nf6 5.Nc3 Bc5 6.d4

[White has a number of alternatives at this juncture: A) 6.b3 0-0 7.g3 *(7.Bb2 Re8 8.d4 exd3 9.Qxd3 Ne5 10.Qd2* is more solid, though still rather comfortable for Black *)*

A) 7...Re8 8.Bg2 a5 9.0-0 d6 10.Ne3 Nd4 11.d3 exd3 12.Qxd3 Nd7 with approximately equal chances, Rubinstein, A-Saemisch, F/Breslau 1925;

C) 7...d5! When I wrote my book on 1 c4 e5, I rather indiscriminately quoted ECO, which gives this move as leading to equality (probably based on the outcome of the game, which was a short draw), but matters are far from that simple. Alternatively Black has also tried a couple of less critical continuations: 8.cxd5?! *(8.Bg2 dxc4 9.bxc4* is relatively better, but still quite good for Black. *)*

C1) As Alekhine himself pointed out (and I'm baffled why this hasn't made it into the ECO), Black has the considerably stronger 8...Ng4! available (the following analysis is by Alekhine, except where noted), e.g.

C1a) 9.e3 Nce5 10.Nxe4 *(10.d4 Nf3+ 11.Ke2 Ngxh2! 12.dxc5 Bg4-+; 10.Be2 Nd3+! 11.Bxd3 exd3)* 10...Qxd5 *(*CH: *10...Bf5!?* also looks rather promising *11.d3 Qxd5 12.f3 Rad8* with a distinct advantage for Black *)*

C1a1) CH: 11.Bg2! is the lesser evil, e.g. Nd3+ 12.Kf1 Qf5 13.f3 *(13.f4!?)* 13...Bb6 14.Ba3 Re8 15.h3 Nh6 16.g4 , and while ugly, White's position is probably survivable;

C1a2) 11.f3 f5! *(* CH: Again Black should give thought to *11...Bf5!?* , e.g. *12.d3 Rad8 13.h3 Nh6* with a strong initiative to compensate for the pawn. *)*

C1a21) CH: This is just an absolutely terrible move that loses on the spot, whereas 12.Bc4!? Qxc4 *(12...Nxc4 13.bxc4 Qxc4 14.Nxc5* is much better for White - analysis by ChessBase*)* 13.Nf6+ Rxf6 14.bxc4 Nd3+

18...Ne7 19.a4

better for Black]

19...c6 20.g3

[White could possibly do better with 20.Re1 Qd6 21.Rad1 Ng6 22.g3 with only a minimal disadvantage for White.]

20...Qd7 21.Qf3 Qf5

[Black invites a repetition of moves. Alternatively he could consider 21...Ng6 with an edge.]

22.Qe2 Qe6

[22...Qh3 23.Rd3 h5 leaves Black with the initiative and the better position, but unfortunately he is ready to settle for a draw.]

23.Qd3 Qf5 24.Qe2 Qe6 , and here a draw was agreed, although Black's position is undoubtedly to be preferred.

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Bd3 This move was tried by strong players in the 90's, but it mainly gained popularity in the last few years. **6...e5 7.Nde2 Be6!?** A flexible continuation. Black reasonably delays the development of his k-side for a while.

[Somewhat more common is 7...Be7 8.0-0 0-0 *(*Less precise is *8...Nc6* , as in Sek,K (2446) -Wojtaszek,R (2725) Moscow RUS 2019 [Roiz,M]*)* 9.Ng3 Be6 10.Nd5 Bxd5 11.exd5 g6 12.c4 Nbd7 13.Bh6 Re8 14.Rc1 This important theoretical position is covered in detail in Nepomniachtchi,I (2773)-Wojtaszek,R (2724) Moscow RUS 2019 [Roiz,M]]

8.0-0

[The immediate 8.f4 should be calmly met by Be7 *(*Worse is *8...exf4 9.Nxf4 Nc6 10.Nxe6 fxe6 11.Bc4±)* 9.0-0 *(9.f5 Bd7 10.0-0 Bc6* looks fine for Black.*)* 9...exf4 10.Nxf4 Nc6 11.Nxe6 *(* Another plan is *11.b3!? 8...Nc6 9.f4 This move is always tempting when Black's bishop is on e6 - the 'squeezing' f4-f5 might be very annoying.

[After 9.Ng3 Be7 a few moves were recently tested at the high level, but

none seems to offer White anything special 10.Nh5 *(10.a3 Rc8 11.Re1 h6 12.Nf1 d5=* Nepomniachtchi,I - Ding,L Chess.com INT 2019*; 10.Bg5 0-0 11.Qd2 Rc8 12.Rad1 Re8=* Abdusattorov,N - Dominguez Perez,L chess24.com INT 2020*)* 10...Nxh5 11.Qxh5 Nb4= Adams,M (2694)-Giri, A (2780) Batumi 2019]

9...exf4 10.Nxf4

[The other recapture - 10.Bxf4 looks very natural as White develops his bishop at once, but after Be7 11.Kh1 0-0 12.Qd2 Ne5= Black has nothing to worry about due to the strong Ne5.]

10...Ne5 11.a4 This natural move is a novelty. I am not sure if this was prepared by Peter at home or he was improvising over the board. In any case, Sam reacted well.

[The preceding game saw 11.Kh1 Be7 *(Worth attention is also 11...g6!?)* 12.Be3 0-0 13.a4 Rc8 14.Bd4 Nfd7 Black had a solid position, but eventually lost in Paravyan,D - Sarana,A Lichess.org INT 2020]

11...g6! This way of development is the most attractive.

[In case of 11...Be7 12.Be3 0-0 13.a5 Rc8 14.Bd4 White has a definite space advantage due to his Pa5. I am not sure if Black is worse here, but his play isn't as comfortable as in the game.]

12.Be2

[In my opinion, more challenging still was 12.Be3!? Bg7 13.a5 0-0 14.Kh1 Rc8 , though here Black's setup is very flexible.]

12...Bg7 13.Be3 0-0 14.a5 Rc8 Sam has plenty of counterplay on the c-file now. **15.Ra4 Re8**

[Possible was also 15...Qd7!? 16.Rb4 Nc6 17.Ra4 Ne5=]

16.h3 Qe7 Both sides struggle to make any progress in this position. **17.Bd4 h5?!** This careless move could have invited some trouble.

[More to the point was 17...Bd7 18.Nfd5 *(18.Rb4 Bc6=)* 18...Nxd5 19.Nxd5 Qe6 20.Ra3 Bc6=]

18.Qe1?! Peter returns the favor.

18...Bd7! Sam comes back to the correct idea. **19.Nfd5** White reasonably invites simplifications.

[Had he played 19.Rb4?! Bc6 20.Nfd5 Bxd5 21.exd5 Nfd7↑ Black's pressure on the e-file would be very dangerous.]

19...Nxd5 20.Nxd5 Qe6 21.Nf4= A silent draw offer. Neither side can avoid the repetition. **21...Qe7 22.Nd5 Qe6 23.Nf4 Qe7 24.Nd5**

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 Qc7 6.Be3 Nf6 7.f4!? A critical test of Black's move order.

7...Bb4

[This position can, of course, come about with ...a6 played instead of ...

Qc7, but it's too late for 7...a6?! here, with 8.e5 Nd5 9.Nxd5 exd5 10.Bd3 simply rather good for White.]

[I see my computer touts 7...Qb6? , but if this worked nobody would be playing this variation as White. The move was essayed for the first time in Shirov-C.Horvath, Hungarian League 2012, but I can only assume that Black hadn't prepared the line in advance, as Shirov was quick to hand out punishment: 8.e5! Ng4 9.Bg1 Bc5 *(or 9...Qxb2 10.Ncb5 Bb4+ 11.Ke2* with too many threats*)* 10.Qxg4! Qxb2 11.Ndb5 Qxa1+ 12.Kd2 Bxg1 *(12...Bf8* would have defended against both threats, but after *13.Bd3 Qb2 14.Qg5!* White is doing extremely well in any case *)* 13.Qxg7 Bf2 *(13...Qxf1 14.Qxh8+ Ke7 15.Ne2* doesn't help either *)* 14.Qxh8+ Ke7 15.Qf6+ Kf8 16.Nd1 Bc5 17.Bd3 and Black was crushed in short order.]

[A much better alternative is 7...Nxd4 8.Qxd4 b6!? , as we considered in A. Zhigalko-Mamedyarov, European Club Cup, Plovdiv 2010, but Timofeev was evidently happy with the main line.]

8.Ndb5 Qa5 9.e5 Ne4!? I've previously wondered about this. Alternatives are:

[a) 9...a6?! 10.Nd6+ Bxd6 11.Qxd6 Ne4 12.Qd3 Nxc3 13.Bd2! is good for White - see Izoria-Gagunashvili, Kusadasi 2006, as annotated by John-Paul Wallace in the Archive.]

[b) 9...Nd5 10.Bd2 Nxc3 11.Bxc3 *(*rare instead *11.Nxc3 d5* seems OK for Black - see, amongst others, the notes to Volokitin-Grachev, Russian Team Championship 2008*,;* but White has often preferred *11.bxc3!?* , as we've noted*)* 11...Bxc3+?! *(* already Black falters *11...0-0* , and if *12.Qd2 Bxc3 13.Nxc3 f6* , was indicated and has done OK in practice*)* 12.Nxc3 0-0 13.Qd6! (a much better square for the queen than d2) b5 14.Bd3 Rb8? 15.Bxh7+! Kxh7 16.Qxf8 and Black already gave up in Macieja-Manea, European Championship, Plovdiv 2012.]

10.Qd3 f5?!

[But this I don't like. Black should prefer 10...Nxc3 whereupon 11.bxc3!? *(11.Nxc3 Bxc3+ 12.bxc3 b6 13.Be2 Bb7* seems reasonable enough for Black too*)* 11...Be7 12.g3 0-0 13.Bg2 f6! 14.exf6 Bxf6 15.0-0 d5 gives him 'a decent enough position', as we've noted before, although in a recent test 16.Rab1 Rd8 17.Rfe1 b6? *(17...a6* was required*)* 18.c4! Ba6 19.cxd5 Nb4 20.Qd2 Qxb5 21.Rxb4 Qa5 22.Bd4 Rxd5!? would have left White with a powerful initiative in Brkic-Hracek, Croatian Team Championship 2011, had he rejected the exchange in favour of 23.c3! .]

11.exf6 Nxf6 12.0-0-0! Escaping the pin and clamping down on the d6-square. The position is already looking grim for Black. **12...0-0 13.a3 Be7?!**

[Now White obtains his perfect bind. He would have enjoyed a pretty strong one too after 13...a6!? 14.Nd6! *(* it's by no means impossible that Timofeev thought he was losing material after *14.axb4 Nxb4 15.Qd6* , but Black is saved by a tactical resource: *Ne8! 16.Qb6 Qa1+ 17.Kd2 Qxb2 18.Nd4 Qxc3+!*

19.Kxc3 Nd5+ , regaining the queen*)* 14...Bxc3 15.Qxc3 Qxc3 16.bxc3 Nd5 17.Kd2 Nxf4 18.c4 and I can see why Timofeev rejected this, but at least Black is a pawn up here and might try b5 . The text quickly leads to an even worse form of suffering.]

14.Nd6

[Logical and good, although 14.Be2 d5 15.g4 a6 16.Nd4 Nxd4 17.Bxd4 also left White doing well in Demianjuk-Kudelya, Belorechensk 2010.]

14...a6 Advancing the b-pawn won't greatly inconvenience White, but it's not clear what else Black might have tried his queenside has to be developed somehow. **15.g3**

[The simple choice, although I dare say that Svidler was also tempted by 15.Nc4!? Qc7 16.Nb6 Rb8 17.g3 maintaining something of a grip on the queenside.]

15...b5 16.Bg2 Qc7

[Extremely grim for Black would have been 16...b4 17.Bxc6 dxc6 18.Nc4 Qf5 19.axb4 Bxb4 20.Na4 , but the text is scarcely any better.]

17.Nce4! Getting out of the way of the b-pawn and beginning to increase the pressure. **17...Nd5**

[Alternatively, 17...Nxe4 18.Bxe4 Bxd6 19.Qxd6 Qxd6 20.Rxd6 Rb8 21.Rhd1 and the black cause is virtually hopeless.]

18.Bc5 Nd8?

[Timofeev must have been rather dispirited by this point, but he had to try 18...Rb8 , and if 19.h4 h6! .]

19.h4

[Svidler wants to attack, but White might instead have netted an exchange with 19.Nxb5!? axb5 20.Bxe7 Nxe7 21.Ng5 .]

19...Rb8 20.Ng5 Nf6

[This is hopeless, but the attack would surely have swept all before it in the event of 20...g6 21.Nxc8 Rxc8 22.Bxe7 Nxe7 23.h5 .]

21.b4 Cementing his bishop in place and leaving Black helpless against the various threats, including Nxb5. **21...h6 22.Qg6!** Now Black could hardly allow the h-file to open, but capturing on d6 costs him at least the exchange. Timofeev prefers a different exit: **22...a5 23.Nf5! exf5 24.Bxe7** There's no good defence to the threat to exchange on f6 and invade with the queen on h7.

[The aforementioned game went 8...e6 9.e3 Svidler,P (2739)-Kramnik,V (2781) Moscow 2011 CBM 144 [Marin,M] (1-0, 44). In my old notes I wrote that 8...e5 "weakens the d5-square, justifying White's plan directed against the g6-bishop." As we will see in the current game, things are not that clear.]

9.e3 Bd6 Apart from the fact that it over-defends the (unttacked yet) e5-pawn, this move has some hidden merits, too.
[If 9...Bc5 10.Qe2 0-0 White can consider 11.Nf1 since ...e5-e4 would not interfere with the plan based on ♘f1-g3. Ne8 Laznicka,V (2703)-Iordachescu,V (2648) Porto Carras 2011 (½-½, 28) 12.Nxg6 fxg6 *(It is safer to keep a pawn on the h-file. 11...dxc4 12.Nxc4 Bb4+ This is a natural move, of course, but not the only good one. First of all, f1 may prove a good square for the king, depending on the circumstances.
[Secondly, the developing 12...0-0-0 is playable, too, since 13.Nxd6+? would lead to disaster on d3. Qxd6 14.Nxg6 hxg6∓]

13.Kf1 Nb6 14.Nxg6 hxg6 15.g5 Nh5 16.Qg4 0-0 17.Nxb6 This looks like a concession, but otherwise White risked to lose stability on the light squares.

17...axb6 But now there are some problems with completing the queenside development. **18.Be4** A beautiful square for the bishop. However, most of White's other pieces are undeveloped, reducing his chances for an advantage. **18...b5 19.Rg1 Bc5 20.Qd1** It seems that Svidler did not feel comfortable with his position. He practically suggests a draw by repetition, but also gives Black a choice to play actively.
[20.Rg2 looks like a reasonable regrouping, although it is far from clear whether any of the players can make progress.]

One for the theory hounds. **1.e4 c6 2.d4 d5 3.Nd2 dxe4 4.Nxe4 Nd7 5.Ng5** Seems to be the critical move. The idea is to regroup with the eventual aim of occupying e5. White's King Bishop comes to d3 without loss of time

in contradistinction to 5Bc4 **5...Ngf6 6.Bd3 e6 7.N1f3 Bd6 8.Qe2 h6 9.Ne4 Nxe4 10.Qxe4 c5** Karpov's move. Bologan will show that it is an improvement on 10... Nf6. The point is that Black has to play ...c6-c5 at some stage so he plays it immediately. **11.0-0**

11...Nf6 12.Qh4 Ruling out kingside castling for Black in the foreseeable future. Bxh6 would then be too strong.

[12 Bb5+, displacing the Black king is also worthy of close consideration. [Marin,Mihail]

1.e4 Marin,M Marin,M **1...e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1**

b5 7.Bb3 0-0 Given the tournament situation, Anand chooses the safe (nowadays) Marshall Attack. A couple of decades ago, this comment would have been pure nonsense. Teniendo en cuenta la situación favorable en el torneo, Anand elije el seguro (hoy en día) Ataque Marshall. Hace unas docenas de años, este comentarío no hubiera tenido ningún sentido. **8.h3 Bb7 9.d3 Re8 10.a4 h6** Black is in no hurry to consolidate his centre with ...d6, because he wants to keep the possibility ...d5, in the spirit of the Marshall Attack in reserve. Besides, the a3-f8 diagonal could be useful still, in case of an eventual ♘c3, which could eventually be answered with ... ♗b4. White will try to combine the pressure against the b5-pawn with the central plan c3 and d4, although this is connected with a loss of time. Curiously, the variation had been seen twice this year in games played between the same opponents, but with... reversed colours. **11.axb5** It is not easy to decide which is the correct move order.

[En Wijk aan Zee 2007, la partida entre los mismos contrincantes, pero con colores inversos, continuó 11.c3 b4 Anand,V (2779)-Svidler,P (2728)/Wijk aan Zee 2007/CBM 117/[Marin] (1-0, 21)]

[11.Nbd2 Bf8 12.c3 Anand,V (2779)-Svidler,P (2728)/Morelia/Linares 2007/CBM 117/[Mihail Marin] (½-½, 47)]

11...axb5 12.Rxa8 Bxa8 13.c3 Bf8

[Deviating from another game where Svidler had black and which continued 13...d6 White immediately took advantage of the fact that the a3-f8 diagonal has been closed and answered 14.Na3 Ivanchuk,V (2750)-Svidler,P (2728)/Morelia/Linares 2007/CBM 117/[Mihail Marin] (½-½, 44). True, this did not offer him an objective advantage.]

14.d4 d6 Finally consolidating the centre, now that the possibility of ...d5 has been physically removed. The position is typical for the Zaitsev system. La posición se ha vuelto típica para la Variante Zaitsev.

[What about the e4-pawn? Is it not hanging? The first thought is that 14...exd4 is simply bad because of 15.e5 , winning space for White in the centre. However, Black can answer with the unexpected Na5!? , maintaining a playable position. 16.Bc2 The only way to keep Black under pressure. *(16.exf6?* is simply bad because almost all White's pieces are hanging: *Bxf3 17.Rxe8 Qxe8 18.gxf3 Nxb3 19.Qxb3 Qe1+ 20.Kg2 Qxc1 21.Na3 d3-+; 16.Ba2* leaves the e4-square available to the knight. *Ne4 17.cxd4 d5⇄* and Black's position looks normal. *)* 16...Bxf3 17.gxf3 *(17.Qxf3 Nc6!∓* maintains Black's material advantage, without making any important concession.*)* 17...Nd5 18.Qxd4± White has advantage of space in the centre and a mighty pair of bishops. However, he is slightly underdeveloped (which is compensated by the fact that Black's already developed knights are unstable) and has kingside weaknesses. Generally, the position looks shaky for Black and it is not the kind of stuff one should embark in when a draw brings you closer to the World Crown.]

15.d5 After Black's previous move, the

threat against the e4-pawn became real. Therefore, White should do something about it. Svidler's move looks like a radical solution, but half-measures seem to offer Black good counterplay in the centre. Which is quite logical, since he is in fact a tempo up compared to the normal variations.

[15.Bc2 exd4 16.cxd4 Nb4⇄]

[15.Nbd2 exd4 16.cxd4 Nb4 17.d5 c6⇄]

15...Na5 16.Ba2 c6 17.Na3 Black has the more flexible structure, but White intends to play b4, forcing ... Nb7, when the knight would remain passive for a long time. Las negras tienen estructura más flexible, pero las blancas amenazan con b4, cuando la retirada ...Cb7 dejaría al caballo pásivo por largo rato. **17...Qc7!** Solving the problems of coordination by simple tactical means. Resolviendo los problemas de coordinación por medios tácticos sencillos. **18.Qe2**

[18.b4 would be answered by sería contestado por Nc4 , for instance por ejemplo 19.Nxc4 bxc4 20.Bxc4? *(20.dxc6=)* 20...cxd5 21.Bxd5 Nxd5 22.exd5 Qc4 recovering the pawn with excellent play. recuperando el peón con excelente juego.]

[18.dxc6 Bxc6 would solve Black's problems of piece coordination.]

18...cxd5 19.Nxb5 Qd7 20.exd5 Bxd5 21.Bxd5 Nxd5 22.Rd1 Nf6 In the long run, Black's centre should offer him the better chances, but a draw brings Anand a step closer to his goal. A largo plazo, los peones centrales les asegurarían a las negras mejores posibilidades, pero unas tablas le acercan a Anand a su meta.

7.g4 Be7 8.Bg2 Nfd7!? Ivanisevic is happy to follow in Topalov and Ivanchuk's footsteps with this prophylactic retreat, which currently appears to be quite a good option for Black in what is now a line of the Keres Attack. **9.Be3 Nc6 10.Qd2**

[As we've noted before, after 10.0-0 0-0 11.f4 Nxd4 12.Qxd4 both e5 *(*and Ivanchuk's *12...b5!?* should give Black enough counterplay. *)*]

10...0-0

[This natural move is surprisingly a novelty! We really are in fertile territory after 8...Nfd7. Then 12.Qe2 b5 13.f4 Nxd4 14.Bxd4 Nc6 is one possible

continuation, and Black should be OK here. He has easy counterplay on the queenside and certainly shouldn't fear the centre taking on French-like characteristics with 15.e5 Nxd4 16.Rxd4 d5 .]

11...Nde5 12.b3 This avoids moving the queen again, but such an approach is hardly going to trouble Black. Perhaps 8...Nfd7 is just something of a problem for White and it will be interesting to see what the leading 6 h3 aficionados like David Howell come up with here.

12...Nxd4 13.Bxd4 * 13...b5 14.a4

[Playing on the queenside doesn't lead to much, but neither would 14.f4 Nc6 15.Be3 Bb7 16.Ne2 Rc8 have been especially troubling for Black.]

FIDE World Cup 2019 (1.2) 12.09.2019

[Sam Collins]

This game was the jewel of the first round in the World Cup. Peter Svidler gave detailed commentary after the post-mortem, which I'll gladly draw on. **1.e4 c5 2.Nf3 Nc6 3.Bb5 d6 4.0-0 Bd7 5.Re1 Nf6 6.c3 a6 7.Bf1 Bg4 8.d4 Bxf3 9.gxf3 cxd4 10.cxd4 d5 11.e5**

[11.Nc3 e6 12.Bg5 Be7 13.Bxf6 Bxf6 14.exd5 Nxd4 15.Re4 is a theoretical line where Svidler thought his opponent knew how to make a draw. All games to reach this position proceeded Nf5 16.dxe6 0-0 17.exf7+ Kh8 , and now after 18.Qxd8 *(18.Qb3 Nd4 19.Qxb7 Nxf3+ 20.Kg2* M.Chigaev - I. Keleptrishvili, Ureki 2015 (1-0 in 56) *Nd2⩱* with full compensation for the material.*;* The engine makes a case for *18.Qd5!?* , which deserves further tests. *)* 18...Raxd8 19.Rd1 Rxd1 20.Nxd1 g6 21.Ne3 Rxf7 Black held the endgame without many problems in A.Naiditsch -X.Bu, Antalya 2013 (1/2-1/2 in 59). White's pawn majority is crippled and strong drawing tendencies are exerted by the opposite coloured bishops and reduced material.]

11...Nh5 This move was strongly preferred (over the alternative retreat to d7) by both Svidler and Psakhis in their game commentaries. These guys know where the pieces should be placed so when they both agree, they are probably right!

[11...Nd7 12.e6 fxe6 13.Bh3 Qb6 *(*Psakhis' suggestion of *13...g6 14.Bxe6 Bg7* isn't favoured by modern engines after *15.Nc3±)* 14.Bxe6 Qxd4 *(14...Nxd4* loses to *15.Bxd7+ Kxd7 16.Nc3+-* with a decisive attack*)* 15.Nc3 Qxd1 16.Rxd1 Nc5 17.Bxd5± left Black with a very unpleasant endgame in Z. Zhang - H.Ni,Yongchuan 2003 (1-0 in 44) and I.Kurnosov - C.Csiszar, Bad Wiessee 2004 (1-0 in 45). The weakness of the white kingside is utterly academic compared to the bishop pair, lead in development and awkward black king.]

12.e6

[12.f4 g6 13.f5 Ng7 14.f6 exf6 15.exf6+ Ne6 16.Nc3∞ was quite unclear in V.Papin - MVL, Heraklio 2004 (1-0 in 26).]

12...g6 Praised by Svidler.

[12...fxe6 13.Bh3 g6 14.Nc3 Ng7 15.Na4± was more pleasant for White in Y.Yu - X.Bu, Danzhou 2011 (1/2-1/2 in 30).]

13.Nc3 f5 Svidler strongly criticised this

move, and his suggested alternatives are important for the theory of the line.

[Svidler thought that 13...Bg7 led more or less to a "forced draw" after 14.exf7+ Kxf7 15.Bh3 Nxd4 *(15...Bxd4* is also possible*)* 16.Be3 Nf5 17.Nxd5 e6 with a balanced endgame once the knight moves.]

[Svidler also analysed the more ambitious 13...Ng7 14.Bh3 Nxe6 when he was intending

A) Albornoz Carbera avoided 13... Ng7 because of 15.Bxe6⩲ fxe6 16.Na4 Bg7 *(* Svidler's elaborate *16...b6!? 17.Rxe6 Rc8* is also fine for Black *)* 17.Nc5 , but Svidler suggested 0-0! 18.Nxe6 Qd7 19.Nxf8 Rxf8⩲ when Black has, at a minimum, full compensation for the exchange. This line is like a very good version of the 3.. .Nf6 French Tarrasch where an exchange is often sacrificed on f3.;

B) 15.Rxe6 fxe6 16.Bxe6 Bg7 17.Be3 Qd6 18.Nxd5 Svidler reached this point in his calculations and thought the position was interesting. The engine suggests Black can equalise with Rd8 *(18...Kd8* , which convinced the players in the post-mortem, fails to lots of moves, including 19.Nb6 or Svidler's press-conference suggestion of *19.Qb3 Qxe6 20.Qb6++-)* 19.Bf4 Be5!! (good luck finding this move over the board) 20.Bxe5 Nxe5 21.dxe5 Qxe6 22.Nc7+ Kf7 23.Nxe6 Rxd1+ 24.Rxd1 Kxe6 and the rook endgame is closer to a draw than to a white win.]

14.Qb3 Nxd4 15.Qxb7 Rb8

[The position after 15...Bg7 had already been tested in practice. Svidler intended 16.Rd1! *(16.Nxd5 Rb8* was played in S.Kristjansson - T. Koop, Reykjavik 2016 (0-1 in 30) , where White blundered a full rook by playing his queen to a7. Instead *17.Qd7+□ Qxd7 18.exd7+ Kxd7 19.Rxe7+ Kd6 20.Be3! Kxd5 21.Rd1±* leads to an advantageous endgame for White once the dust settles. *)* 16...0-0 17.Qxd5 *(17.Nxd5!* leads to some advantage, for example *Ra7 18.Qxa7 Qxd5 19.Rxd4! Bxd4 20.Qd7 Qc5 21.Bh6!±* and I haven't found equality for Black.*)* 17...Qb6 18.Na4 Qb4 19.Nc5 Nxf3+ 20.Qxf3 Qxc5 21.Rd7 Svidler explained that he would then attack the e7-pawn without much concern for the loss of his queenside pawns, but the engine isn't convinced, assessing the position as equal after f4! (limiting the c1-bishop and creating an option of ... Qg5+ in some lines) the e7-pawn is held and the position is roughly balanced.]

16.Qxa6 Nxf3+ 17.Kh1 Qc7 18.Qa4+ Kd8 19.Bf4

[Svidler also considered 19.Re5!? Nxe5 20.Nxd5 Qc6 21.Qa5+ Ke8 22.Bg2]

19...Nxf4 20.Nb5 Qb6

[Svidler gives 20...Rxb5 21.Qxb5 and all moves by the f4-knight allow 22.Qxd5+ followed by capturing the f3-knight, while Nxe1 22.Rc1 wins.]

[Svidler gave a beautiful line with 20...Qb7 21.Rac1 threatening Rc7 *(21.Na7!* is the engine's recommendation*)* 21...Nxe1 22.Nd4 with a decisive attack, for example *(22.Rc7!)* 22...Rc8 23.Qa5+ Rc7 24.Rxc7 Qxc7 25.Nc6+ Kc8

with a choice of mates in two, 26.Ba6+ *(or 26.Qa8+ Qb8 27.Qxb8# (Svidler))* 26...Qb7 27.Qd8# (Miroshnichenko)]

Marin,Mihail: 'The unfaithful queen *** Since the times of Lasker's and Capablanca's chess textbooks (or maybe even earlier) players of all levels (including the beginners) knew that the right priorities' order in the opening is advancing two or three pawns, developing knights, bishops, castling and only then the queen, thus connecting rooks. Of course this is just an abstract scenario and the game of chess is complicated enough to allow lots of exceptions. But in principle deviating too much for this recommended course is likely to end up in an early catastrophe. *** As

mentioned above, the queen is supposed to be the last piece to develop and there are a few good reasons for that. First of all, the strongest piece on board has a wide range of action from its initial square and moving with it actually just allows connecting rooks. Moreover, the early queen development is likely to cause her troubles, as she can be easily attacked by the enemy weaker and disrespectful pieces. *** And yet, it is sometimes psychologically difficult to keep such a tremendous fighting unit in reserve until the early middlegame. How could one resist starting heroic actions in the opening and how to do that without the active participation of the queen? *** We are talking, of course, about positions where it seems that the opponent has created some opportunities for us. But the main risk of neglecting the general rules is that wasting tempi with the queen would leave the king uncastled. The king is a very sensitive piece; if his better half, the queen, abandons him for remote adventures, he may have not only a broken heart but also a tragic fate. This will be the main theme of the present article. *** The first impression is that such scenarios are typical for beginners' games only, but practice has shown that strong and very strong players tend falling into this psychological trap at least occasionally. As in earlier articles, we will start with a last-hour example at top level.' **1.c4** Marin,Mihail **1...Nf6 2.Nf3 e6 3.Nc3 d5 4.d4 Bb4** Milos Pavlovic: 'Ragozin is hugely popular nowadays.' I always like to choose a rook endgame for my articles. They are the most prominent endgames these days, and certainly the toughest as well. With a little time on the clock, it is easy for anyone to make a mistake, but I think this is what makes them the best to learn from. In this position, with the passed a-pawn, White should be able to convert this position given Black's king being far away, but avoiding to give Black counterplay is very important. Diagram

47.Rb6+?! Is in my opinion not the best practical choice for White. It is of course still winning, but White does not need complications.
[Instead 47.e4 trading the e-pawn with Black's f-pawn helps White maintain both his a- and h-pawns protected and could follow with a king march to support the a-pawn to promotion. In addition, the rook would

be keeping Black's king from entering in front of his a-pawn. fxe4 48.Kxe4 Kf6 49.Kd5 Ke7 50.Kc6 Kd8 51.Kb6 Kc8 52.a5 Rf3 53.h5 Rf6+ 54.Ka7 Rf7+ 55.Ka6 Rf5 56.Rb5 Rf4 57.Rb6+-]

50.Kxf5?? The mistake that loses the chance to win the game because after the text move, Black is in time for counterplay as the game proceeded.

[50.Rd4 Had to be played first. It is very important to try to keep farther away passed pawns even if it may seem a little longer to the win, but it would be a win without couunterplay form the opponent. Ra1 51.Ke5 Ra3 now 52.e4! fxe4 53.Rxe4+- Diagram

[Grivas,Efstratios]

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Qb6 5.Nb3 Nf6 6.Bd3 This is what I call the Eros variation subline - a big survey was published in CBM 140. By choosing the text move White retains the possibility of a well-timed c4, but Black should face no problems if she reacts at the right moment with the typical ...d5 advance. **6...e6**

[6...d5 is also a good alternative:

7.exd5 Nxd5 8.0-0 e5! and Black is doing well according to my extensivly published analysis.]

7.0-0 Be7 8.c4

[8.Nc3 d6 9.Be3 Qc7 10.f4 a6 transposes to more 'main' lines, where White can choose between: a) 11.a4 - the Hermes variation *(b) 11.a3* - the Hestia variation*;* c) *11.Qe2* - the Athena variation*;* d) *11.Qf3* - the Zeus variation. *)*]

8...d5

[This is objectively the best continuation. Black has also tried 8...Ne5 9.Nc3 a6 10.Be2 d6 11.Be3 Qc7 12.Rc1 b6 13.f4 Ned7 14.Bf3 Bb7 15.Qe2 0-0 16.Nd4± Milos,G-Morozevich,A Internet 2000.]

9.cxd5 exd5 10.Nc3

[The main alternative is 10.Be3 Qc7 11.exd5 Nxd5 12.Bc5 Be6

A) 13.Bxe7 Qxe7! *(13...Ncxe7 14.Nd4 Bd7 15.Na3 0-0 16.Re1 Qf4 17.Re4 Qf6=* Wehmeier, S-Illner,A Germany 2008*)* 14.Qf3 0-0∓;

11.exd5 Nxd5 12.Nxd5 Bxd5 13.Be3?!

[I think here White could gain the upper hand with 13.Re1 Qd8 14.Qg4! *(14.Bg5 0-0=*) 14...0-0 15.Bh6 Bf6 16.Rad1 .]

13...Qb4! Probably White missed this strong and energetic move, which allows Black to obtain even play. **14.Qc2**

[An invitation to a draw. If White wanted to continue he should go for 14.Re1 0-0-0 *(14...0-0? 15.Qh5+-)* 15.Bd2 Qh4 when a sharp battle is on the cards.]

14...Bxg2 Accepted! **15.Kxg2 Qg4+ 16.Kh1 Qf3+ 17.Kg1 Qg4+**

7.Bd2 Qe7+ 8.Qe2 Bxd2+ 9.Kxd2 Qxe2+ 10.Bxe2± White has some space advantage and wins back the d4-pawn. He is also better developed and can activate the rooks very fast. **10...Nb4**

[10...Nb8? allows White to get a huge advantage after 11.Rhe1 0-0 12.Nxd4 Black is badly developed! d6 13.Nb5 Na6 14.Bc4! Now White enters the 7th rank! Bd7 15.Re7 Rfd8 16.Rae1 Kf8 17.a4+- Looks very funny - Black is getting in a kind of zugzwang! Actually White has a winning position.]

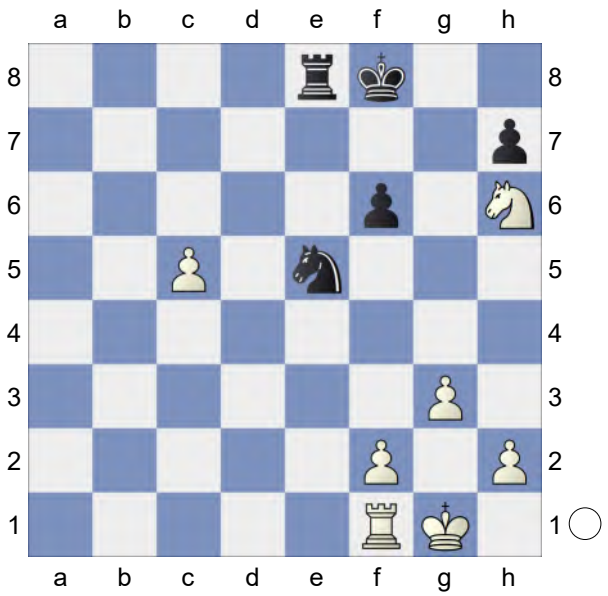
When you play a really good game and outplay your opponent as Svidler did against Mamedyarov, but in a matter of seconds things turn around, we are tempted to say chess is a cruel game! Maybe it is, but that is one of the reasons we are all so attracted to it?! In this position Svidler is not only up two pawns, but he also had ample amount of



time on the clock. However, his next few decisions where questionable. **42.Rc1 Rc8 43.Nf5?** The first mistake that allows Black to recoup a very important pawn.

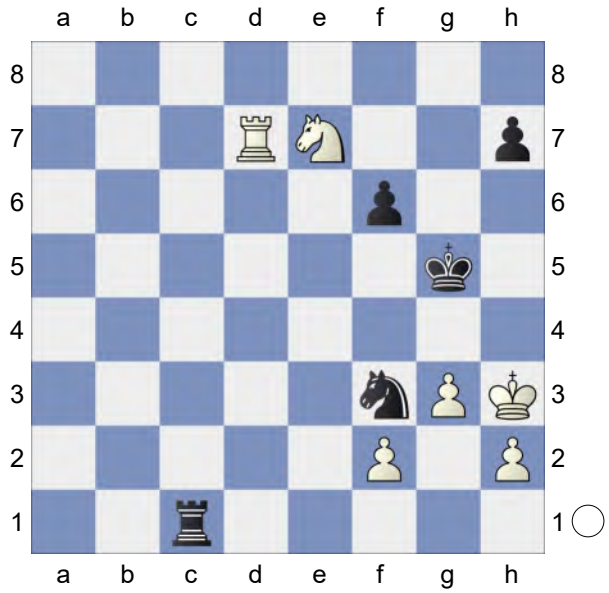
[With 43.Rc3 White would have controlled the d3-square and kept his passed pawn secure. He could later follow with Nf5, which of course is needed to bring the knight back into play! Nc6 *(43...Nd7* wouldn't help Black as *44.c6 Nb8 45.c7 Na6 46.Rc6!+-* and the c-pawn doesn't fall without gaining another one, which would clear the position a little bit more on the way to a win for White.*)* 44.Nf5+- followed by g4 to stabilise the knight. Once White brings the king closer to the centre, White should be able to cruise to victory.]

43...Nd3 44.Ra1 Rxc5 Now, with only an extra pawn and on the same side of the board things are more complicated. **45.Ra8+ Kf7 46.Ra7+ Kg6** White still has chances to improve his position, but should not forget about Black's try to activate all his pieces and create some pressure on f2, so a bit more precise play is required. **47.Ne7+?!** This is not the best decision, inviting Black's king into White's territory without a clear plan or keeping the pieces coordinated.

[Despite it's location 47.Nh4+ helps Black's to keep defending his weaknesses as follows: Kg5 48.Rg7+ Kh6 49.Rf7 Kg5 50.h3 trying to create some mating net. f5 *(50...Rc2??* allows for a nice finish *51.Rg7+ Kh5 52.Nf5* and the mate is innevitable.*)* 51.Kg2 now it is clear that Black has to stay passivle, while White will try to slowly improve.]

47...Kg5 48.Ng8?⊕

[48.Rd7 is the engine's only suggestion to maintain the advantage, but it isn't an easy move to go for in time trouble. Rc1+ 49.Kg2 Ne1+ 50.Kh3 *(50.Kf1 Nf3+)* 50...Nf3 Diagram



51.Nd5! back trying to put pressure on the f6 weakness and passivise Black, so that White can find his way back to push the pawns on the kingside.]

48...Kg6 Repeating the position to gain some time, but...

[48...Rc2! 49.Rg7+ Kf5 50.Nh6+

Ke6 and Black's counterplay suffices for a draw.]

49.Ne7+ Kg5 Once the opportunity was given again, Svidler went for the correct:

50.Rd7! Rc3 51.Nd5?

[51.Kg2! as now Black doesn't have the opportunity to focus on attacks on f2, White should take advantage to bring in the most important piece into play! Ne1+ 52.Kf1 Nf3 53.Nd5! Rc2 54.Rxh7+-]

51...Rc1+ 52.Kg2 Rc2! This is the difference, that now Black has enough play on f2. **53.h4+ Kh6?** Mamedyarov, gives Svidler yet another chance.

[53...Kg6 54.Ne7+ Kf7 55.Rxd3 Kxe7 and this endgame should end in a draw!]

This was a tough moment for Svidler, as he intended to go Kf3, but he immediately spotted the fork on e5. Dejected and disgusted he kept the king in his hand for some time and then dropped it on g1, but by then he was already flagged! A tragic start for Svidler but his comeback in this event was just impressive! **54.Kg1⊕**

[54.Ne3 would have kept the game going as follows: Rxf2+ 55.Kg1 Ne5 56.Rxh7+ Kxh7 57.Kxf2 but this should end in a draw.]

10.0-0 Qxc5 11.Nb5 Be6 12.Bd3 Qb4 13.Nc7N Till here the players were following the game Lysyj-Svidler from November 2014. Lysyj had played a3 but Tomashevsky played Nc7. Both of them were making their moves quickly which meant that they were well

prepared. **13...Bxa2 14.Nxa8 Rxa8 15.Ra1 Be6** White has his pieces well developed and Black has only a pawn for the exchange. Don't you think White should be better here? 17...Nxf4 18.Nxf4 Bb3 19.Qxb4 Nxb4 20.Rac1 Once again Black's deficit in material is compensated by the weak b2 pawn and queenside majority. Svidler plays this pretty well. **20...a5! 21.Rc7 a4 22.Rxb7 Bxb2 23.Be2 Na2 24.Bf3** Tomashevsky plays with great accuracy. [Black chooses one of the oldest systems of development, employed by such players like Botvinnik and Fischer. Of course, the forced variations arising after 10...Bg4 Svidler,Peter: 'Marin,Mihail' 11.f3 Na5 would entirely suit Topalov's style of play (and home preparation).]
[In Linares, Svidler tried 10...Na5 Svidler,Peter: 'Marin,Mihail' against the same opponent, but failed to solve the opening problems.]
11.Rc1 Rd8 12.Bf4
[This move started becoming very popular in the late eighties. Previously, 12.Qd2 Svidler,Peter: 'Marin,Mihail' was considered to be the main move. The greatest specialist of the past with this system, Boris Spassky, always played f4 in this variation, immediately or after such preparatory moves as 12.h3 or 12.♕e1. Quite successfully, I must say, since he twice inflicted two painfull defeats to his successor to the champion's throne: Robert Fischer.]
12...Qd7 Svidler,Peter: 'Glenn Flear: 'The most trustworthy move. After''
[12...e5 (Svidler,Peter) White has 13.Bg5 Rd6 14.Bd5 when the pin on the c-file allied with the bishop outpost negate the pressure on d4. White is then somewhat better.]
13.d5
[Sakaev recommended 13.dxc5 (Svidler,Peter) in his 2004 book 'How to get the Edge against the Grünfeld' and his main line goes Qe8 14.Bd5 Bd7 15.Qd3 in order to meet ...e6 with Bxc6 followed by Bd6. This idea has been tested in a couple of notable games since then, for instance Gustafsson, J-Mamedyarov, S

Gothenburg 2005 continued with Bf6!? *(Instead Quinn, M-Knott, S Scarborough 2004 varied with 15...e6 16.Bxc6 Bxc6 17.Bd6 b6 18.Qe3* with a clear advantage to White according to Sakaev but Simon Knott is generally well prepared and he continued with *Bb7 19.e5 Qc6 20.f3 bxc5 21.c4 Rac8 22.Be7 Rd7 23.Bf6 h6 24.Rfd1 Bxf6 25.exf6 Kh7* and soon drew.*)* 16.Qe3 e6 17.Bxc6 Bxc6 18.Bd6 e5 19.c4 h6!? 20.Qxh6 Bxe4 21.Nc3 Bc6 22.Nd5 Bxd5 23.cxd5 b6 and Black was worse but managed to draw. Although Sakaev's recommendation has merit it hasn't yet caught on and Topalov sticks to the most popular move.]

13...Na5

[13...Ne5 (Svidler,Peter) is also respectable e.g. 14.Bb3 b5!]

14.Bd3 The black knight certainly looks awkward on a5, but Black plans to make the d6-square available for it, by either ...e5 or ...e6 and ...exd5. Svidler,Peter: 'Marin,Mihail: 'The black knight certainly looks awkward on a5, but Black plans to make the d6-square available for it, by either ...e5 or ...e6 and ...exd5.'' Glenn Flear: 'Marin,M: 'The black knight certainly looks awkward on a5, but Black plans to make the d6-square available for it, by either ...e5 or ...e6 and ...exd5.''' **14...b5**

18th European Teams (4.1) 06.11.2011

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0 8.h3 Lately White rarely goes for the main lines of the Marshall Attack and the current game is no exception. **8...Bb7 9.d3 Re8**

[9...d6 is the main line. Gashimov, V (2734)-Ivanchuk, V (2741)/Astrakhan RUS 2010/[Mikhalevski, V]]

10.a3 White shows that he wants to leave the light-squared bishop on the a2-g8 diagonal. The move is flexible as White retains the option of Nc3.

[10.c3 Cheparinov, I (2646)-Tkachiev, V (2652)/Dresden GER 2007/[Glenn Flear].]

[10.Nc3 fighting for the d5-square is the most popular continuation.]

10...h6 Black is delaying ...d7-d6 to keep ...d5 as an option and preparing to move the bishop away from the e-file, as in case of the immediate ...d5 the e5-pawn would have been hanging.

[10...Bf8 11.Bg5]

11.Nbd2!? Topalov surprises Svidler with a side line. Instead of fighting for the d5-square the knight will be transferred to the kingside.

[11.Nc3 used to be the main line.]

11...Bc5

[11...Bf8 is a natural alternative. 12.Ba2 d6 *(12...d5* seems to make sense, but after *13.exd5 Nxd5 14.Ne4* there is no coordination between the pieces. For example, *Nf6?!* is dangerous in view of *15.Bg5!* with a dangerous initiative.*)* 13.Nf1

Ne7 14.Nh4 *(14.Ng3!?)* 14...d5 15.Qf3 Qd6 16.exd5 Bxd5 17.Bxd5 Nexd5 18.Nf5 Qe6 and Black equalized in Short, N (2676)-Adams, M (2750)/Birmingham 2001.]

12.c3 Bb6 13.Ba2!? An attempt to improve upon earlier games. The move is useful as it avoids the ...Na5 idea.

[Earlier White tested two other moves. 13.a4 d6 *(13...d5!?)* 14.Nf1 d5?! 15.exd5 Nxd5 16.axb5 axb5 17.Rxa8 Bxa8 18.d4! e4 19.N3d2 Nf6 20.Bc2 and Black started to experience problems in Brodsky, M (2545)-Yurtaev, L (2520)/St Petersburg 1997.]

[13.Nf1 d5! The point of Black's setup. Now he equalizes easily. 14.exd5 Nxd5 15.d4?! *(15.Ng3!?=)* 15...e4 *(15...Qd6!)* 16.N3h2?! Na5! 17.Bc2 f5∓ and Black's chances were higher in Anand, V (2762)-Khalifman, A (2667)/New Delhi/Teheran 2000.]

13...d6

[After 13...d5 14.exd5 Nxd5 15.Ne4 Nf6 16.Be3! Black still has problems to solve as his knight on c6 is misplaced.]

14.Nf1

[14.Nh4!? d5 15.Qf3 looks like an interesting alternative, creating some pressure on the kingside.]

14...d5! 15.exd5 Nxd5 16.Qb3!? White provokes 16...Na5 where the knight will be misplaced.

[He could have also continued with his plan. 16.Ng3!?]

16...Na5 17.Qc2 Qd6 18.b4 As a result of the intermediate move 16. Qb3 White has won a tempo, but the position remains balanced. **18...Nc6 19.Ng3 Rad8 20.Ne4 Qg6 21.g4!?** A very aggressive move. When kids make such a move we consider it to be a mistake as it seems to weaken the king, but when a World class player comes up with such an idea we must try to understand it. So, the idea behind this move is to take the h5-square away from Black's queen and prepare 22.Nh4. Though objectively it might be not the best it creates practical problems.

[It has to be mentioned that the immediate 21.Nh4 leads to a repetition after Qh5 22.Nf3 Qg6]

21...Nf6 Black creates a threat of 22... Nxg4, but it turns out to be an inaccuracy.

[21...Kh8!? deserved attention, removing the king from the a2-g8 diagonal and trying to prepare ...f5 by means of ...Qh7.]

22.Nh4 Qh7 23.Nf5?! This natural move turns out to be wrong.

[23.g5! was probably better. Nd5 *(23...hxg5* seems to run into *24.Bxf7+!* , but the position which arises after *Kf8 25.Ng6+ Kxf7 26.Nxg5+ Kxg6 27.d4+ e4 28.Nxh7 Kxh7 29.Bg5 Ne7* is not entirely clear despite a very optimistic evaluation from my computer.*)* 24.gxh6 Re6! *(24...f5? 25.Ng5 Qxh6 26.Nxf5 Qg6 27.d4!+-)* 25.Ng5 *(25.Qe2! gxh6 26.Kh2 Kh8 27.Bd2±* is slightly better for White.*)* 25...Qxh6 26.Re4! *(*But not *26.Nxe6? Qxh4∓* with a dangerous attack.*)* 26...Rf6! 27.Nxf7 Qh7 28.Nxd8 Nxd8 29.Be3 Nf7! and despite being an exchange down Black's initiative is very dangerous.]

23...Qg6 Svidler is satisfied with a repetition, but he had a stronger option.

[23...Nxe4! 24.dxe4 Ne7! Getting rid of White's active pieces would be

better and promised Black good play.]
24.Nh4! Qh7 25.Qe2?! Not the best way to avoid a repetition.
[25.g5! was better. See 23.g5.]
25...Ne7! Now the f5-square is covered.
26.Qf3 Nxe4 27.dxe4
[27.Bxf7+? is wrong as after Kh8 28.dxe4 *(28.Bxe8 Bxf2+ 29.Kh2 Bxe1-+)* 28...Rf8!∓ the pin along the f-file is very annoying.]
27...g6 Peter is covering the f5-square, but his queen is now misplaced on h7.
[27...g5!? was an interesting alternative, preventing White's 28.g5. 28.Nf5 *(28.Ng2? Nc8!∓* with the subsequent ...Nd6 is better for Black.*)* 28...Nxf5 29.gxf5 Rd6= doubling rooks along the d-file and Black's chances are not worse. *(29...Qg7!?=)*]
28.g5! Veselin doesn't miss any opportunity to fight for the initiative.
28...Rd6? A mistake. Black shouldn't have sacrificed the h6-pawn.
[After the correct 28...hxg5 29.Bxg5 Rd6 30.Rad1 Nc8!= the weaknesses of both sides compensate each other.]
29.gxh6 Nf5! A clever idea, which doesn't allow Black to equalize, however.
30.Bg5! White protects the knight and keeps his extra pawn as after **30...Nxh4 31.Bxh4** the weakness of the f7-pawn stops Black from restoring material balance. **31...Bc8!** The best defense. Black brings the bishop to e6 in order to reduce pressure on f7. **32.Red1** A logical idea. White exchanges Black's active rook and retains an extra pawn and better chances. However he had even a better idea at his disposal.
[32.Bf6! Transferring the bishop to g7 was extremely strong as after
A) 32...Qxh6? 33.Bxf7+! Kh7 34.Rad1!+- with a decisive advantage. *(34.Bxe8? Qf8!)*;
B) 32...Bxh3 33.Bg7!± Black's queen is trapped and can't enter the game.]
32...Be6± 33.Rxd6 cxd6 34.Bg5!?
[White could have also played 34.Bxe6 fxe6 35.Rd1 Rf8 *(35...Qxh6 36.Rxd6 Qxh4 37.Rxb6±)* 36.Qg2 Bc7 37.Bg5 Bb6 38.Rd2±]
34...Bxa2 35.Rxa2 Rf8?
[The immediate 35...f6 was necessary, but it wasn't easy to spot that the pawn is untouchable. 36.Be3!± *(*Both *36.Bxf6? Qf7!;* and *36.Qxf6? Bd8!* lose the bishop. *)*]
36.a4! f6 37.Be3 Bxe3 38.Qxe3± White retains an extra pawn and Black's king is becoming vulnerable. **38...bxa4**
[38...Qf7!? 39.Ra1±]
39.Rxa4 Qb7 40.Qd3 Qb5 41.Qxb5? Surprisingly White's mistake come after time trouble.
[41.Qd5+! was strong. Qxd5 42.exd5 Ra8 43.Ra5!±]
41...axb5 42.Ra7 Rc8 Suddenly Black obtains some chances to survive.
43.Rg7+ Kh8 44.Rxg6 Rxc3 45.Rxf6 Rc4 46.f3 d5! 47.exd5 Rxb4 Now Black's idea is to trade the b and d-pawns and then to win the h6-pawn, which leads to a theoretically drawn rook endgame with f and h-pawns.
48.Re6 Rd4 49.Rxe5 b4 50.Kf2 b3 51.Re3 Rxd5 52.Rxb3 Kh7? A surprising mistake one step from a drawish position.
[After the correct 52...Rd6! Black wins the h6-pawn and obtains a theoretically drawn position, even though White retains practical

chances for a win.]
53.Rb6 Now the position is lost as White's king can hide behind the h3-pawn. **53...Rd2+ 54.Kg3 Rd1 55.f4** The line with 11. Nbd2 is almost unexplored but interesting and so it deserves further practical tests.

12...d5 Mikhalevski,V: 'A novelty. Svidler takes control of the c4-square and sacrifices a pawn.' Another interesting thing is that I found only one game played in same manner dated all the way back to 1962!

22...h6 Mikhalevski,V: '!?'

11.Nc3 This is a very natural line if White doesn't want to take risks (which is obvoiusly the case here). He will play d4 and get some plus, which is not easy to realize, but almost impossible to lose.
[More complicated is 11.Nbd2 For example, same opponents played here: Rae8 12.c3 d5 13.Ba2 dxe4 14.dxe4 Nh5 15.Nb3 Qxd1 16.Rxd1 Nf6 17.Re1= ½-½ Topalov,V (2700)-

Svidler,P (2713)/Linares 1999/CBM 070 (35)]

11...Nd8 Instead of moving the knight to a5, Black is looking for a better place for it, but it costs him - White gets an important tempo - he has no need to withdraw the Bishop to a2 - and he makes use of it.

[Less convincing is 11...Rae8 12.a4! b4 13.Nd5 Nxd5 14.Bxd5 Nd8 15.Bxb7 Nxb7 16.d4 exd4 17.Qxd4 a5 18.Qd5± 1-0 Svidler,P (2689)-De Vreugt,D (2511)/Esbjerg 2000/CBM 078 (37)]

[13...c4 is more forcing, but somehow Black can't defend the c7-square in a proper way. I couldn't come to a clear verdict on this position, for sure there is a lot of life. 14.Nb5!
A) 14...Kd7 is not ideal, White now has time to bring the bishop to the long diagonal 15.Bd2 Nac6 16.Bc3 and Black has problems with the knights Bxc3 17.bxc3 Nc2 *(17...Na6 18.d4* with big advantage *)* 18.Rd1 cxd3 19.Rxd3+ Kc8 20.hxg6 and Black's pieces are all misplaced. Since the h8-square is of the same colour as White's bishop Black is completely lost. It has to be said that Black didn't manage to solve his opening problems and so the ball is now in his court, though there are ways to deviate from the line which occurred in the game.'
